

Microsoft

Exam Questions MD-100

Windows 10

NEW QUESTION 1

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from Audit Policy in the

local Group Policy, you configure Audit object access.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html

NEW QUESTION 2

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to configure User Account Control (UAC) to prompt administrators for their credentials. Which settings should you modify?

- A. Administrators Properties in Local Users and Groups
- B. User Account Control Settings in Control Panel
- C. Security Options in Local Group Policy Editor
- D. User Rights Assignment in Local Group Policy Editor

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-control>

NEW QUESTION 3

- (Exam Topic 4)

You have 20 computers that run Windows 10.

You configure all the computers to forward all the events from all the logs to a computer named Computer1 that runs Windows 10.

When you sign in to Computer1, you cannot see any security events from other computers. You can see all the other forwarded events from the other computers.

You need to ensure that the security events are forwarded to Computer1. What should you do?

- A. On each computer, run `wecutil ac /q`.
- B. On each computer, add the NETWORK SERVICE account to the Event Log Readers group.
- C. On each computer, run `winrm qc -q`.
- D. On Computer1, add the account of Computer1 to the Event Log Readers group.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/use-windows-event-forwarding-to-assist-in>

NEW QUESTION 4

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 connects to multiple wireless networks.

You need to view the wireless networks to which Computer1 connects. What should you use?

- A. the System log in Event Viewer
- B. Wi-Fi in the Settings app
- C. the properties of the wireless adapter in Network Connections in Control Panel
- D. the Details tab for the wireless adapter in Device Manager

Answer: B

Explanation:

Reference:

<https://www.windowscentral.com/how-connect-wi-fi-network-windows-10>

NEW QUESTION 5

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks. You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet. Solution: From Network & Internet in the Settings app, you set a data limit. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 6

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has an application named App1. You need to use Performance Monitor to collect data about the processor utilization of App1. Which performance object should you monitor?

- A. Process
- B. Processor Performance
- C. Processor Information
- D. Processor

Answer: A

Explanation:

References:

https://www.cse.wustl.edu/~jain/cse567-06/ftp/os_monitors/index.html

NEW QUESTION 7

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains a folder named C:\ISOs that is shared in ISOs. You run several commands on the computer as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 8

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. The relevant services on Computer1 are shown in the following table.

Which service will start after you restart Computer1?

- A. Service3 and Services only
- B. Service 1, Setvice2. and Services
- C. Service2, Services, and Service6
- D. Services only

Answer: C

Explanation:

Service1 cannot start because it is dependent on Service3 which is disabled.

Service2 will start because it is set to Automatic. Service2 starting will cause Service6 to start. Service3 will not start because it is disabled.

Service4 will not start because it is disabled.

Service5 will start because it is set to Automatic and is not dependent on any other services. Service6 will start because Service2 is dependent on Service6.

NEW QUESTION 9

- (Exam Topic 3)

Which Windows 10 computers can you ping successfully from Computer1 and Computer2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

Box 1: Computer3 only.

Computer1 and Computer2 are domain joined so both will be using the Domain profile. The firewall rules on Computer1 allow outbound ICMP on all profiles so outbound ICMP will be allowed on the Domain profile.

The firewall rules on Computer2 allow inbound ICMP on the Public profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot be pinged.

The firewall rules on Computer3 allow inbound ICMP on all profiles. Therefore, Computer3 will not block the inbound pings.

Box 2: No Windows 10 computers.

The firewall rules on Computer2 allow outbound ICMP on the Private profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot ping any computers.

NEW QUESTION 10

- (Exam Topic 2)

You need to meet the technical requirement for Computer1.

What should you do? To answer, select the appropriate options in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 10

- (Exam Topic 2)

You need to meet the technical requirements for the helpdesk users.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.itprotoday.com/compute-engines/what-group-policy-creator-owners-group>

NEW QUESTION 14

- (Exam Topic 2)

You need to meet the technical requirements for the San Diego office computers. Which Windows 10 deployment method should you use?

- A. wipe and load refresh
- B. Windows Autopilot
- C. provisioning Packages
- D. in-place upgrade

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

NEW QUESTION 17

- (Exam Topic 2)

You need to meet the technical requirement for the IT department users. What should you do first?

- A. Issue computer certificates
- B. Distribute USB keys to the IT department users.

- C. Enable screen saver and configure a timeout.
- D. Turn on Bluetooth.

Answer: D

Explanation:

References:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 22

- (Exam Topic 1)

You need to implement a solution to configure the contractors' computers.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

NEW QUESTION 24

- (Exam Topic 1)

You need to reduce the amount of time it takes to restart Application1 when the application crashes. What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://www.howto-connect.com/how-to-attach-a-task-to-this-event-in-event-viewer-in-windows-10/>

NEW QUESTION 27

- (Exam Topic 1)

You need to ensure that User10 can activate Computer10. What should you do?

- A. Request that a Windows 10 Enterprise license be assigned to User10, and then activate Computer10.
- B. From the Microsoft Deployment Toolkit (MDT), add a Volume License Key to a task sequence, and then redeploy Computer10.
- C. From System Properties on Computer10, enter a Volume License Key, and then activate Computer10.
- D. Request that User10 perform a local AutoPilot Reset on Computer10, and then activate Computer10.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-requirements-lice>

NEW QUESTION 32

- (Exam Topic 1)

You need to take remote control of an employee's computer to troubleshoot an issue. What should you send to the employee to initiate a remote session?

- A. a numeric security code
- B. a connection file
- C. an Easy Connect request
- D. a password

Answer: A

Explanation:

References:

<https://support.microsoft.com/en-us/help/4027243/windows-10-solve-pc-problems-with-quick-assist>

NEW QUESTION 33

- (Exam Topic 4)

You have a computer named Computer 1 that runs Windows 10.

You turn on System Protection and create a restore point named Point1. You perform the following changes:

Add four files named File1.txt, File2.dll, File3.sys, and File4.exe to the desktop.

Run a configuration script that adds the following four registry keys:

- Key1 to HKEY_CURRENT_USER
- Key2 to HKEY_CLASSES_ROOT
- Key3 to HKEY_LOCAL_MACHINE\SYSTEM
- Key4 to HKEY_CURRENT_CONFIG

You restore Point1.

Which files and registry keys are removed? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.maketecheasier.com/what-system-restore-can-and-cannot-do-to-your-windows-system/> <https://superuser.com/questions/343112/what-does-windows-system-restore-exactly-back-up-and-restore>

NEW QUESTION 37

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source.

You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the `necsh int ip resec` command
- B. the `Resec-NetAdapcerAdvancedPropercy` cmdlet
- C. the `netcf g -d` command
- D. the `Debug-NetworkController` cmdlet

Answer: A

Explanation:

Reference: <https://howtofix.guide/reset-tcp-ip/>

NEW QUESTION 40

- (Exam Topic 4)

A user has a computer that runs Windows 10.

When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.

You run the ipconfig command and receive the following output.

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

- A. the DNS servers
- B. the IPv4 address
- C. the subnet mask
- D. the default gateway address

Answer: A

NEW QUESTION 44

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that Windows feature updates on Client1 are deferred for 15 days when the updates become generally available.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

See explanation below.

Select the Start button, then select Settings > Update & Security > Windows Update.

Under Update settings, select Advanced options.

From the boxes under Choose when updates are installed, select the number of days you would like to defer a feature update or a quality update. Reference:

<https://support.microsoft.com/en-us/help/4026834/windows-10-defer-feature-updates>

NEW QUESTION 45

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

You need to view the settings to Computer1 by Group Policy objects (GPOs) in the domain and local Group Policies.

Which command should you run?

- A. gpresult
- B. secedit
- C. gpupdate
- D. gpfixup

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/administration/windows-commands/gpresult>

NEW QUESTION 47

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

You need to ensure that Computer1 will respond to ping requests.

How should you configure Windows Defender Firewall on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 50

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The Guest account is enabled on both computers.

The computers contain the users shown in the following table.

The computers contain the shared folders shown in the following table.

Computer1 has password-protected sharing turned on. Computer2 has password-protected sharing turned off. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

When password protected sharing is turned on, only people who have a user account and password on your computer can access shared files.

Box 1: Yes

Password protected sharing is turned off on Computer2 so User1 can access Share2 from Computer1.

Box 2: Yes

Password protected sharing is turned on on Computer1. User2 has an account on Computer1 so User2 can access Share1 from Computer2.

Box 3: Yes

The answer to this question depends on which version of Windows 10 is running on the computers. This isn't specified in the question so it's likely that the question will be updated in future.

Password protected sharing is turned on on Computer1. User3 does not have an account on Computer1 so User3 cannot access Share1 from Computer2.

However, the Guest account is enabled which could provide access depending on which version of Windows 10 is running. If it is Windows 10 Home or Pro, then the

answer to this question is Yes. The Guest account does provide access. However, in later versions of Windows 10 Enterprise and Windows 10 Education (from build 1709 onwards), the Guest account does not enable access to the shared folder.

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/networking/guest-access-in-smb2-is-disabled-by>

NEW QUESTION 53

- (Exam Topic 4)

Your network contains an Active Directory domain. the domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Computer contains the shared folders shown in the following table.

The shared folders have the permissions shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Share1\$ is a hidden share (dollar sign appended) so the share will never be visible.

Box 2: Yes

User2 is in Group1 and Group2. Both groups have access to Share1\$. Therefore, the contents of the shared folder will be visible.

Box 3: No

User1 is in Group1. Group1 does not have the necessary security permission to access Share2. You need both security permissions (NTFS permissions) AND share permissions to view the contents of a shared folder. User1 has the necessary share permissions (Everyone: Read), but not the security permission.

NEW QUESTION 55

- (Exam Topic 4)

You have 100 computers that run Windows 10. The computers are in a workgroup. The computers have a low-bandwidth metered Internet connection.

You need to reduce the amount of Internet bandwidth consumed to download updates. What should you configure?

- A. BranchCache in hosted mode
- B. BranchCache in distributed cache mode
- C. Delivery Optimization
- D. Background intelligent Transfer Service (BITS)

Answer: C

Explanation:

References:

<https://support.microsoft.com/en-us/help/4468254/windows-update-delivery-optimization-faq>

NEW QUESTION 60

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted

from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

Administrators report that they cannot use Event Viewer to remotely view the event logs on Client3.

You need to ensure that the administrators can access the event logs remotely on Client3. The solution must ensure that Windows Firewall remains enabled.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. Go to Control Panel -> System and Security -> Windows Firewall.
- * 2. Click on the Advanced settings link in the left-hand side.
- * 3. Enable COM+ Network Access (DCOM-In).
- * 4. Enable all the rules in the Remote Event Log Management group.

<https://www.zubairalexander.com/blog/unable-to-access-event-viewer-on-a-remote-computer/>

NEW QUESTION 61

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10.

You need to configure Windows Hello for sign-in to Computer1 by using a physical security key. What should you use?

- A. a USB 3.0 device that supports BitLocker Drive Encryption (BitLocker)
- B. a USB device that supports FIDO2
- C. a USB 3.0 device that has a certificate from a trusted certification authority (CA)
- D. a USB device that supports RSA SecurID

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/user-help/security-info-setup-security-key>

NEW QUESTION 66

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 7. Computer1 has a local user named User1 who has a customized profile. On Computer1, you perform a clean installation of Windows 10 without formatting the drives. You need to migrate the settings of User1 from Windows7 to Windows 10.

Which two actions should you perform? To answer, drag the appropriate actions to the correct targets. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-how-it-works>

NEW QUESTION 71

- (Exam Topic 4)

You are a network administrator at your company.

A user attempts to start a computer and receives the following error message: "Bootmgr is missing."

You need to resolve the issue.

You start the computer in recovery mode.

Which command should you run next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References: https://neosmart.net/wiki/bootrec/#Bootrec_in_Windows10

NEW QUESTION 72

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

You need to modify the registry of Computer1 by using Registry Editor from Computer2. Which two registry hives can you modify? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. HKEY_CURRENT_USER
- B. HKEY_LOCAL_MACHINE
- C. HKEY_USERS
- D. HKEY_CLASSES_ROOT
- E. HKEY_CURRENT_CONFIG

Answer: BC

NEW QUESTION 75

- (Exam Topic 4)

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

You need to enable the Prohibit User from manually redirecting Profile Folders Group Policy setting only for the administrative users of Client3.
To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. Open the Administrator Group Local Group Policy Editor.
- * 2. In the left pane, click on User Configuration, Administrative Templates, and Desktop.
- * 3. In the right pane, right click on Prohibit User from Manually redirecting Profile Folders and click on Properties.
- * 4. To Prevent User Profile Folders Location Change Select (dot) Enabled and click on OK.
- * 5. Close the Local Group Policy Editor window. References:
<https://www.vistax64.com/threads/user-profile-folders-prevent-or-allow-location-change.180719/>

NEW QUESTION 80

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.
You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.
Solution. You use System image manager (Windows SIM) to create an answer file. You use Windows Deployment Service (WDS) to add an install image. You start each computer by using PXE, and then install the image.
Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 83

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

You create a folder named Folder1 that has the permissions shown in the following table.

You create a file named File1.txt in Folder1 and allow Group2 Full control permissions to File1.txt. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 87

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows10. Computer1 is in a workgroup. Computer1 contains the users shown in the following table.

You need to apply the same Group Policy settings to only User1, User2 and User3. The solution must use a minimum number of local Group Policy objects (GPOs).

How many local GPOs should you create?

- A. 1
- B. 2
- C. 3

Answer: A

Explanation:

You can use security filtering to restrict the GPO to the required users. Only users with the Read and Apply Group Policy permissions will have the GPO applied to them.

NEW QUESTION 88

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has the local users shown in the following table.

Which users can analyze the event logs on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/local-accounts#sec-localsy>

NEW QUESTION 90

- (Exam Topic 4)

You plan to deploy Windows 10 to 100 secure computers.

You need to select a version of Windows 10 that meets the following requirements:

Uses Microsoft Edge as the default browser
Minimizes the attack surface on the computer
Supports joining Microsoft Azure Active Directory (Azure AD)
Only allows the installation of applications from the Microsoft Store
What is the best version to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Windows 10 Pro in S mode
- B. Windows 10 Home in S mode
- C. Windows 10 Pro
- D. Windows 10 Enterprise

Answer: A

Explanation:

References:

Uses Microsoft Edge as the default browser Minimizes the attack surface on the computer Supports joining Microsoft Azure Active Directory (Azure AD) Only allows the installation of applications from the Microsoft Store <https://docs.microsoft.com/es-es/windows/deployment/s-mode>

NEW QUESTION 94

- (Exam Topic 4)

You have 10 computers that run Windows 10 and have BitLocker Drive Encryption (BitLocker) enabled. You plan to update the firmware of the computers.

You need to ensure that you are not prompted for the BitLocker recovery key on the next restart. The drive must be protected by BitLocker on subsequent restarts.

Which cmdlet should you run?

- A. Unlock-BitLocker
- B. Disable-BitLocker
- C. Add-BitLockerKeyProtector
- D. Suspend-BitLocker

Answer: D

Explanation:

References:

<https://support.microsoft.com/en-us/help/4057282/bitlocker-recovery-key-prompt-after-surface-uefi-tpm-firmwa>

NEW QUESTION 97

- (Exam Topic 4)

Your network contains the segments shown in the following table.

You have computers that run Windows 10 and are configured as shown in the following table.

Windows Defender Firewall has the File and Printer Sharing allowed apps rule shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 98

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer is in a workgroup. The computer is used to provide visitors with access to the Internet.

You need to configure the computer to meet the following requirements:

Always sign in automatically as User1.

Start an application named App1.exe at sign-in.

What should you use to meet each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<http://www.itexpertmag.com/server/complete-manageability-at-no-extra-cost>

NEW QUESTION 101

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to set the minimum password length to 12 characters. What should you use?

- A. Local Group Policy Editor
- B. User Accounts in Control Panel
- C. System Protection in System Properties
- D. Sign-in options in the Settings app

Answer: A

NEW QUESTION 102

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the computers shown in the following table.

On which computers can you perform an in-place upgrade to Windows 10 Enterprise?

- A. Computer3 only
- B. Computed and Computer3 only
- C. Computed only
- D. Compute
- E. Computed, and Computer3

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths> <https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-edition-upgrades>

NEW QUESTION 107

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Update & Security in the Settings app, you turn on Pause Updates. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

NEW QUESTION 108

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 in the Documents library.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

NEW QUESTION 111

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

NEW QUESTION 112

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to prevent standard users from changing the wireless network settings on Computer1. The solution must allow administrators to modify the wireless network settings.

What should you use?

- A. Windows Configuration Designer
- B. MSConfig
- C. Local Group Policy Editor
- D. an MMC console that has the Group Policy Object Editor snap-in

Answer: C

NEW QUESTION 117

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and is joined to an Active Directory domain named adatum.com.

A user named Admin1 signs in to Computer1 and runs the whoami command as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 121

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User2 is a domain user, not an administrator. Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 125

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains named Computer1 that runs Windows 10.

On Computer1, you create an NTFS folder and assign Full control permissions to Everyone. You share the folder as Share1 and assign the permissions shown in the following table.

When accessing Share1, which two actions can be performed by User1 but not by User2? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Delete a file created by another user.
- B. Set the permissions for a file.
- C. Rename a file created by another user.
- D. Take ownership of file.
- E. Copy a file created by another user to a subfolder.

Answer: BD

Explanation:

References:

<https://www.varonis.com/blog/ntfs-permissions-vs-share/>

NEW QUESTION 130

- (Exam Topic 4)

You have a computer that runs Windows 8.1.

When you attempt to perform an in-place upgrade to Windows 10, the computer fails to start after the first restart.

You need to view the setup logs on the computer. Which folder contains the logs?

- A. %\$Windows.~BT\Sources\Panther\
- B. %Windows%\Logs
- C. %Windows%\Temp
- D. %\$Windows.~BT\Inf

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-setup-log-files-and-eventlo>

NEW QUESTION 133

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that the File History of Contoso\Administrator on Client1 is backed up automatically to \\DC1\Backups.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

How to set up and enable File History

* 1. On Client1, go to Start > Settings > Update & Security.

* 2. Select Backup and click "Add a drive."

* 3. Select the drive or network location (\\DC1\Backups) you want to use for File History's backups.

Now click "More options." Here you can start a backup, change when your files are backed up, select how long to keep backed up files, add or exclude a folder, or switch File History to a different drive.

Click the "Back up now" button to start your first File History backup. Reference:

<https://lifehacker.com/how-to-back-up-your-computer-automatically-with-windows-1762867473>

NEW QUESTION 135

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains two local user accounts named User1 and User2. User2 is a member of the local Administrators group.

User1 performs the actions shown in the following table.

User2 performs the actions shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 136

- (Exam Topic 4)

You have a computer named Computer5 that runs Windows 10 that is used to share documents in a workgroup.

You create three users named User-a, User-b, User-c. The users plan to access Computer5 from the network only.

You have a folder named Data. The Advanced Security Settings for the Data folder are shown in the Security exhibit. (Click the Security Exhibit tab).

You share the Data folder. The permission for User-a are shown in the User-a exhibit (Click the User-a tab.)

The permissions for user-b are shown in the User-b exhibit. (Click the User-b tab.)

The permissions for user-c are shown in the User-c exhibit. (Click the User-c tab.)

For each of the following statements, select Yes if the statements is true. Otherwise, select No.

NOTE: Reach correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

No No Yes

NEW QUESTION 141

- (Exam Topic 4)

A user purchases a new computer that has Windows 10 Home preinstalled. The computer has a biometric fingerprint reader.

You need to ensure that the user can use the fingerprint reader to sign in to the computer by using an Azure Active Directory (Azure AD) account.

What should you do first?

- A. Register the computer to Azure AD.
- B. Install the latest feature updates on the computer.
- C. Upgrade the computer to Windows 10 Enterprise.
- D. Upgrade the computer to Windows 10 Pro.

Answer: B

NEW QUESTION 144

- (Exam Topic 4)

You have a VPN server that accepts PPTP and L2TP connections and is configured as shown in the following exhibit.

A user named User1 has a computer that runs Windows 10 and has a VPN connection configured as shown in the following exhibit.

User1 fails to establish a VPN connection when connected to a home network. You need to identify which VPN client setting must be modified. What should you identify?

- A. ServerAddress
- B. TunnelType
- C. AuthenticationMethod
- D. L2tpIPsecAuth
- E. EncryptionLevel

Answer: A

Explanation:

The server address is a private IP address. This needs to be the public IP address of the VPN server.

NEW QUESTION 146

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Computer1 contains the folders shown in the following table.

You move Folder1 into Folder2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

If you move a shared folder, the share will no longer work.

Box 2: No

Folder1 will inherit the permissions of Folder2. User1 does not have permission to access Folder2.

Box 3: Yes

User2 is a member of the Administrators group so he can access the administrative share \\Computer1\E\$. User2 has Full Control permission to Folder2 so he can access \\Computer1\E\$\Folder2.

Folder1 will inherit the permissions of Folder2 so User2 can access \\Computer1\E\$\Folder2\Folder1.

NEW QUESTION 150

- (Exam Topic 4)

You have several computers that run Windows 10.

All users have Microsoft OneDrive for Business installed. Users frequently save files to their desktop.

You need to ensure that all the users can recover the files on their desktop from OneDrive for Business. Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Copy ADMX and ADML files to C:\Users\Public\Desktop\
- B. From Backup in the Settings app, add a drive
- C. Configure the Silently move Windows known folders to OneDrive settings
- D. Copy ADMX and ADML files to C:\Windows\PolicyDefinitions
- E. Configure the Save documents to OneDrive by default setting

Answer: CD

Explanation:

References:

<https://docs.microsoft.com/en-us/onedrive/plan-onedrive-enterprise> <https://docs.microsoft.com/en-us/onedrive/use-group-policy#KFMOptInNoWizard>

NEW QUESTION 155

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains a user named user1@contoso.com. You have a computer named Computer1 that runs Windows 10.

You join Computer1 to Azure AD. You enable Remote Desktop on Computer1.

User1@contoso.com attempts to connect to Computer1 by using Remote Desktop and receives the following error message: "The logon attempt failed."

You need to ensure that the user can connect to Computer1 by using Remote Desktop. What should you do first?

- A. In Azure AD, assign user1@contoso.com the Cloud device administrator role.
- B. From the local Group Policy, modify the Allow log on through Remote Desktop Services user right.
- C. In Azure AD, assign user1@contoso.com the Security administrator role.
- D. On Computer1, create a local user and add the new user to the Remote Desktop Users group.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/client-management/connect-to-remote-aadj-pc>

NEW QUESTION 156

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From a command prompt, you run set.exe PATHEXT=d:\scripts. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 160

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named File1.txt in a folder named Folder1 on the C drive of Client2. You need to ensure that a user named User1 can read the contents of File1.txt. The solution must prevent User1 from modifying the file.

To complete this task, sign in to Client2 and perform the required action.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

See explanation below.

After creating File1.txt in Folder1, right-click the file and select Properties.

Access the Security tab, click Disable inheritance

Click on Remove all inherited permissions from this object, click Apply, and select Yes in the dialog box that appears.

Click OK

Back on the Security tab select Edit to change permissions.

Click Add, then enter User1 in the Enter the object names to select section.

Click Check Names, and then click OK.

Check only the Read box in the Allow column. ?

Click apply, Ok, and OK

NEW QUESTION 163

- (Exam Topic 4)

You have 15 computers that run Windows 10. Each computer has two network interfaces named Interface1 and Interface2. You need to ensure that network traffic uses Interface1, unless Interface1 is unavailable. What should you do?

- A. Run the Set-NetIPInterface –InterfaceAlias Interface1 –InterfaceMetric 1 command.
- B. Run the Set-NetAdapterBinding –Name Interface2 –Enabled \$true –ComponentID ms_tcpip –ThrottleLimit 0 command.
- C. Set a static IP address on Interface 1.
- D. From Network Connections in Control Pane, modify the Provider Order.

Answer: A

Explanation:

References:

<https://tradingtechnologies.atlassian.net/wiki/spaces/KB/pages/27439127/How+to+Change+Network+Adapter+> <https://docs.microsoft.com/en-us/powershell/module/nettcpip/set-netipinterface?view=win10-ps>

NEW QUESTION 166

- (Exam Topic 4)

HOTSPOT

You have 100 computers that run Windows 10 and are members of an Active Directory domain.

Two support technicians named Tech1 and Tech2 will be responsible for monitoring the performance of the computers.

You need to configure the computers to meet the following requirements:

Ensure that Tech1 can create and manage Data Collector Sets (DCSs).

Ensure that Tech2 can start and stop the DCSs.

Use the principle of least privilege.

To which group should you add each technician? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 170

- (Exam Topic 4)

Your network contains an Active Directory domain that contains the objects shown in the following table.

Computer1 contains the shared folders shown in the following table.

The computers have the network configurations shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User1 is in Group1 which has permission to access the share so the share will be visible.

Box 2: No

User2 is in Group2 which does not have permission to access Share1. Access-based enumeration is enabled so Share1 will not be listed as User2 does not have permission to access it.

Box 3: No

Share2\$ is a hidden share (dollar sign appended) so the share will never be listed.

NEW QUESTION 171

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

The domain contains the user accounts shown in the following table.

Computer2 contains the local groups shown in the following table.

The relevant user rights assignments for Computer2 are shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User1 is an administrator and has the Allow log on through Remote Desktop Services.

Box 2: No

User2 is a member of Group2 which has the Deny log on through Remote Desktop Services.

Box 3: Yes

User3 is a member of the administrators group and has the Allow log on through Remote Desktop Services.

Note: Deny permissions take precedence over Allow permissions. If a user belongs to two groups, and one of them has a specific permission set to Deny, that user is not able to perform tasks that require that permission even if they belong to a group that has that permission set to Allow.

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/security/about-permissions?view=azure-devops&ta>

NEW QUESTION 175

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

User Account Control (UAC) on Computer1 is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 2: Yes

User1 is a member of Administrators group.

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 3: Yes

User Account Control: Behavior of the elevation prompt for standard users is set to Prompt for credentials (Default) When an operation requires elevation of privilege, the user is prompted to enter an administrative user name and password. If the user enters valid credentials, the operation continues with the applicable privilege.

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-contro>

NEW QUESTION 178

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to connect to your company's network and create a VPN connection on Client2 named VPN1 that meets the following requirements:

VPN1 must connect to a server named vpn.contoso.com.

Only traffic to your company's network must be routed through VPN1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

See explanation below.

On Client2, click on the Start button and go to settings.

Select Network & Internet.

Select VPN on the left-hand side

Click on the Add a VPN connection button.

Next, select the VPN provider—This will almost always be Windows (built-in).

Name your connection and enter the server name as provided by your IT technician. (VPN1 and vpn.contoso.com).

Add in your username and password as provided by your IT technician.

Click Save when done.

Closeout the PC settings windows.

NEW QUESTION 187

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Services console, you disable the Link-Layer Topology Discovery Mapper service. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 188

- (Exam Topic 4)

You have a computer that runs Windows 10. You view the domain services status as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Device is Azure AD joined; not domain joined.

The MDM URLs in the exhibit indicate the device is enrolled in Intune. References:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/troubleshoot-device-dsregcmd>

NEW QUESTION 191

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a network share. From Windows 8.1 on Computer1, you run setup.exe from the network share.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 194

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From PowerShell, you run `$env:Path += ";d:\scripts"`. Does this meet the goal?

- A. Yes

B. No

Answer: A

Explanation:

References:

https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/about/about_environment_varia

NEW QUESTION 197

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm quickconfig command.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.

References:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

NEW QUESTION 198

- (Exam Topic 4)

You have a public computer named Computer1 that runs Windows 10/ Computer1 contains a folder named Folder1.

You need to provide a user named User1 with the ability to modify the permissions of Folder1. The solution must use the principle of least privilege.

Which NTFS permission should you assign to User1?

A. Full control

B. Modify

C. Write

D. Read & execute

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc73288>

<http://www.mdmarra.com/2013/11/full-control-v-modify-why-you-should-be.html>

NEW QUESTION 201

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016 and a computer named Computer1 that runs Windows 10.

Server1 contains a share named Backup. All users can read and write data in Backup.

On Monday at 13:00, you configure Backup and Restore (Windows 7) on Computer1 to use the following settings:

Backup Destination: \\Server1\Backup

What do you want to back up?: Local Disk (D:), Include a system image of drives: System Reserved, (C:)

Schedule: Daily at 23:00

You need to identify how many backups will be available on Thursday at 17:00.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

https://www.windowscentral.com/how-make-full-backup-windows-10#create_system_image_windows10<https://www.surepassexam.com/MD-100-exam-dumps.html>

NEW QUESTION 205

- (Exam Topic 4)

You have a computer that runs Windows 10.

The computer fails to start, and you receive the following error message: "BOOTMGR image is corrupt. The system cannot boot".

You need to repair the system partition.

Which command should you run from Windows Recovery Environment (WinRE)?

- A. fdisk.exe
- B. chkdsk.exe
- C. diskpart.exe
- D. bcdboot.exe

Answer: C

Explanation:

DiskPart, which has replaced fdisk, is a command-line utility that provides the ability to manage disks, partitions or volumes in your computer running all versions of operating system since Windows 2000.

References:

<https://www.diskpart.com/windows-10/diskpart-windows-10-1203.html>

NEW QUESTION 206

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup and have BitLocker Drive Encryption (BitLocker) enabled.

You join the computers to Microsoft Azure Active Directory (Azure AD).

You need to ensure that you can recover the BitLocker recovery key for the computers from Azure AD. What should you do first?

- A. Disable BitLocker.
- B. Add a BitLocker key protector.
- C. Suspend BitLocker.
- D. Disable the TPM chip.

Answer: B

Explanation:

References:

[https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/prepare-your-organization-f](https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/prepare-your-organization-for-bitlocker)

NEW QUESTION 207

- (Exam Topic 4)

Your company has an isolated network used for testing. The network contains 20 computers that run Windows 10. The computers are in a workgroup. During testing, the computers must remain in the workgroup.

You discover that none of the computers are activated.

You need to recommend a solution to activate the computers without connecting the network to the Internet. What should you include in the recommendation?

- A. Volume Activation Management Tool (VAMT)
- B. Key Management Service (KMS)
- C. Active Directory-based activation
- D. the Get-WindowsDeveloperLicense cmdlet

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/introduction-vamt>

NEW QUESTION 210

- (Exam Topic 4)

A user has a computer that runs Windows 10. The user has access to the following storage locations:

- A USB flash drive
- Microsoft OneDrive
- OneDrive for Business
- A drive mapped to network share
- A secondary partition on the system drive

You need to configure Back up using File History from the Settings app.

Which two storage locations can you select by using File History? Each correct answer presents complete solution.

NOTE: Each correct selection is worth one point.

- A. OneDrive for Business
- B. OneDrive
- C. the USB flash drive
- D. the secondary partition on the system drive

E. the drive mapped to a network share

Answer: CE

NEW QUESTION 211

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You set up Backup and Restore (Windows 7) and include Folder1 in the backup. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

NEW QUESTION 215

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you configure Application1 to sign in as the LocalSystem account and select the Allow service to interact with desktop check box. You delete the Service1 account.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/win32/services/localsystem-account>

NEW QUESTION 216

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. You are troubleshooting connectivity issues on Computer1.

You need to view the remote addresses to which Computer1 has active TCP connections. Which tool should you use?

- A. Performance Monitor
- B. Task Manager
- C. Resource Monitor
- D. Windows Defender Firewall with Advanced Security

Answer: C

NEW QUESTION 219

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other users at your company.

You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.

Solution: From System Restore, you revert the system state to a restore point that was created before the update was installed.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

NEW QUESTION 224

- (Exam Topic 4)

You have computers that run Windows 10 Enterprise as shown in the following table.

Both computers have applications installed and contain user data.

You plan to configure both computers to run Windows 10 Enterprise LTSC 2019 and to retain all the existing applications and data.

You need to recommend a method to deploy Windows 10 Enterprise LTSC 2019 to the computers. The solution must minimize effort to install and configure the applications.

What should you include in the recommendation for each computer? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths>

NEW QUESTION 226

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10 and are joined to the domain.

On Computer1, you create an event subscription named Subscription1 for Computer2 as shown in the Subscription1 exhibit. (Click the Subscription1 tab.)

Subscription1 is configured to use forwarded events as the destination log.

On Computer1, you create a custom view named View1 as shown in the View1 exhibit. (Click the View1 tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 228

- (Exam Topic 4)

HOTSPOT

You have a computer named Computer1 that runs Windows 10.
You are troubleshooting Group Policy objects (GPOs) on Computer1.
You run gpresult /user user1 /v and receive the output shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:
<https://www.windowcentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 233

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.
A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.
You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User4 on Computer1.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User4 is a server operator, not an administrator. Members of the Server Operators group can sign in to a server interactively, create and delete network shared resources, start and stop services, back up and restore files, format the hard disk drive of the computer, and shut down the computer.

Use User3's credentials instead.

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 234

- (Exam Topic 4)

You have the computer shown in the following table.

You plan to configure deployment rings for Windows 10 quality and feature updates.

What is the maximum number of days you can defer installing quality updates, and which computers support installing feature updates from Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-configure-wufb>

NEW QUESTION 236

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. Users in the finance department use the computers.

You have a computer named Computer1 that runs Windows 10.

From Computer1, you plan to run a script that executes Windows PowerShell commands on the finance department computers.

You need to ensure that you can run the PowerShell commands on the finance department from Computer1. What should you do on the finance department computers?

- A. From the local Group Policy, enable the Allow Remote Shell Access setting.
- B. From the local Group Policy, enable the Turn on Script Execution setting.
- C. From the Windows PowerShell, run the Enable-MMAgent cmdlet.
- D. From the Windows PowerShell, run the Enable-PSRemoting cmdlet.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=powershell-6>

NEW QUESTION 238

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

The configuration must be managed from a central location.

Internet traffic must be minimized.
Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-optimize-windows-10-updates> <https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization>

NEW QUESTION 243

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

A web service installed on Client1 is used for testing.

You discover that users cannot connect to the web service by using HTTP. You need to allow inbound HTTP connections to Client1.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To create an inbound port rule

In the navigation pane, click Inbound Rules.

Click Action, and then click New rule.

On the Rule Type page of the New Inbound Rule Wizard, click Custom, and then click Next.

On the Program page, click All programs, and then click Next.

On the Protocol and Ports page, select the protocol type that you want to allow. To restrict the rule to a specified port number, you must select either TCP or UDP.

Because this is an incoming rule, you typically configure only the local port number. TCP port 80. When you have configured the protocols and ports, click Next.

On the Scope page, you can specify that the rule applies only to network traffic to or from the IP addresses entered on this page. Configure as appropriate for your design, and then click Next.

On the Action page, select Allow the connection, and then click Next.

On the Profile page, select the network location types to which this rule applies, and then click Next.

On the Name page, type a name and description for your rule, and then click Finish.

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-firewall/create-an-inbound-port-r>

https://en.wikipedia.org/wiki/List_of_TCP_and_UDP_port_numbers

NEW QUESTION 246

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup. You need to prevent users from using Microsoft Store apps on their computer.

What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From Security Settings in the local Group Policy, configure Security Options.
- B. From Administrative Templates in the local Group Policy, configure the Store settings.
- C. From Security Settings in the local Group Policy, configure Software Restriction Policies.
- D. From Security Settings in the local Group Policy, configure Application Control Policies.

Answer: BD

Explanation:

References:

<https://www.techrepublic.com/article/how-to-manage-your-organizations-microsoft-store-group-policy/>

NEW QUESTION 250

- (Exam Topic 4)

A user named User1 has a computer named Computer1 that runs Windows 10.

User1 connects to a Microsoft Azure virtual machine named VM1 by using Remote Desktop. User1 creates a VPN connection to a partner organization.

When the VPN connection is established, User1 cannot connect to VM1. When User1 disconnects from the VPN, the user can connect to VM1.

You need to ensure that User1 can connect to VM1 while connected to the VPN. What should you do?

- A. From the proxy settings, add the IP address of VM1 to the bypass list to bypass the proxy.
- B. From the properties of VPN1, clear the Use default gateway on remote network check box.
- C. From the properties of the Remote Desktop connection to VM1, specify a Remote Desktop Gateway (RDGateway).
- D. From the properties of VPN1, configure a static default gateway address.

Answer: B

Explanation:

References:

<https://www.stevejenkins.com/blog/2010/01/using-the-local-default-gateway-with-a-windows-vpn-connection/>

NEW QUESTION 251

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. From File Explorer, you open OneDrive as shown in the following exhibit.

Use the drop-down menus to select the answer choice that answers each question based on the information presented on the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 256

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant.

Some users signs in to that computer by using Windows hello for Business. A user User1 purchases a new computer and joins the computer to Azure AD. User1 attempts to configure the sign-in options and receives the error message shown in the exhibit. (Click the Exhibit tab.)

You open device Manager and confirmed that all the hardware works correctly.

You need to ensure that user1 can use Windows Hello for Business facial recognition to sign in to the computer.

What should you do first.

- A. Purchase an infrared (IR) camera.
- B. Install a virtual TPM driver.
- C. Enable UEF Secure Boot.
- D. Upgrade the computer to windows 10 Enterprise.

Answer: D

NEW QUESTION 258

- (Exam Topic 4)

You are troubleshooting an issue that prevents you from installing Windows 10 updates. You discover that the issue relates to corrupt protected system files. You need to restore the corrupt system files. Which command should you run?

- A. scansca
- B. sfc
- C. chlcdslc
- D. chkncfs

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-us/topic/use-the-system-file-checker-tool-to-repair-missing-or-corrupted-syste>
