## Exam Questions AB-731

AI Transformation Leader (beta)

**NEW QUESTION 1**

You need to recommend a service that supports indexing information and knowledge mining by extracting insights from documents. What should you recommend?

- A. Microsoft Foundry
- B. Azure Vision in Foundry Tools
- C. Azure Document Intelligence in Foundry Tools
- D. Azure AI Search

**Answer:** D

**NEW QUESTION 2**

Your company sells hiking and camping gear online. You need a generative AI solution that can interact with customers and ask questions about their needs. What should you include in the solution?

- A. a chatbot
- B. predictive AI
- C. computer vision
- D. a recommendation engine

**Answer:** A

**NEW QUESTION 3**

You plan to meet with a group of stakeholders to discuss how generative AI can benefit your company. You need to provide the stakeholders with a relevant description of generative AI during the meeting. Which description should you use?

- A. Generative AI is designed to translate documents into other languages.
- B. Generative AI is designed to predict future trends based on historical data.
- C. Generative AI is designed to generate responses based on a user's natural language prompts.
- D. Generative AI is designed to recommend products based on user behavior.

**Answer:** C

**Explanation:**

Generative AI's defining characteristic is that it creates new content (text, images, code, summaries, drafts) in response to instructions—most commonly natural language prompts. Option C captures that general-purpose description in a stakeholder-friendly way: users provide prompts and the system generates responses or content. This framing is broad enough to cover common business value scenarios such as summarizing documents, drafting communications, creating marketing copy, generating reports, building assistants, and producing structured outputs from unstructured requests.

Option A is a single use case (translation), not the defining description. Option B describes predictive analytics/forecasting, which is a different AI category focused on outcomes and probabilities rather than content creation. Option D describes recommendation systems, typically driven by ranking/behavioral signals; while AI can enhance recommendations, that is not the core definition of generative AI. Therefore, the most accurate and relevant description for stakeholders is C.

**NEW QUESTION 4**

**HOTSPOT**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
A manufacturer can use Azure Vision in Foundry Tools to identify product defects on an assembly line.	<input type="radio"/>	<input type="radio"/>
A logistics company can use Azure Vision in Foundry Tools to recognize package shipping labels.	<input type="radio"/>	<input type="radio"/>
The HR department at your company can only use Azure Vision in Foundry Tools to extract written content from Microsoft Word files.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

**Statements**

	Yes	No
A manufacturer can use Azure Vision in Foundry Tools to identify product defects on an assembly line.	<input checked="" type="radio"/>	<input type="radio"/>
A logistics company can use Azure Vision in Foundry Tools to recognize package shipping labels.	<input checked="" type="radio"/>	<input type="radio"/>
The HR department at your company can only use Azure Vision in Foundry Tools to extract written content from Microsoft Word files.	<input type="radio"/>	<input checked="" type="radio"/>

**NEW QUESTION 5**

**HOTSPOT**

- Select the answer that correctly completes the sentence.

The cost of using generative AI language models is based typically on the number of \_\_\_\_ processed.

The cost of using generative AI language models is based typically on the number of  processed.

- documents
- requests
- tokens
- words

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

The cost of using generative AI language models is based typically on the number of  processed.

- documents
- requests
- tokens
- words

**NEW QUESTION 6**

You have a business unit that uses an AI solution to process loan applications. You discover that the solution rejects the application of all applicants that are older than 60 years of age. Which Microsoft responsible AI principle is this violating?

- A. accountability
- B. transparency
- C. fairness
- D. reliability and safety

**Answer:** C

**NEW QUESTION 7**

**HOTSPOT**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

**Answer Area**

**Statements**

	Yes	No
Microsoft 365 Copilot helps users create and analyze content in Microsoft 365 apps.	<input type="radio"/>	<input type="radio"/>
Microsoft Copilot Studio can only be used to customize Microsoft 365 Copilot.	<input type="radio"/>	<input type="radio"/>
Microsoft Security Copilot uses AI to assign sensitivity labels to documents.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

**Statements**

Microsoft 365 Copilot helps users create and analyze content in Microsoft 365 apps.

Yes

No

Microsoft Copilot Studio can only be used to customize Microsoft 365 Copilot.

Yes

No

Microsoft Security Copilot uses AI to assign sensitivity labels to documents.

Yes

No

**NEW QUESTION 8**

Your company plans to use generative AI to help build a website that will showcase various existing products. Which capability best describes a benefit of using generative AI for this project? Select the BEST answer.

- A. translating product descriptions into a different language
- B. analyzing product sales to identify patterns and trends
- C. designing a new product based on customer requirements
- D. creating product descriptions based on product specifications

**Answer:** D

**NEW QUESTION 9**

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

**Statements**

Using incomplete or poor-quality data during generative AI model training can increase costs.

Yes

No

AI models rely on training data to learn patterns and identify relationships to produce outputs.

Yes

No

Generative AI models trained on non-representative datasets can produce inaccurate or unbalanced results.

Yes

No

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

**Statements**

Using incomplete or poor-quality data during generative AI model training can increase costs.

Yes

No

AI models rely on training data to learn patterns and identify relationships to produce outputs.

Yes

No

Generative AI models trained on non-representative datasets can produce inaccurate or unbalanced results.

Yes

No

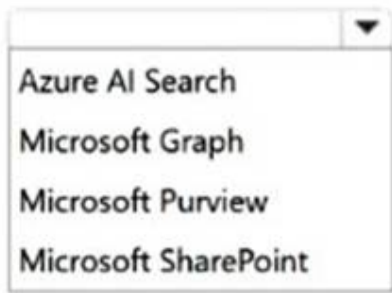

**NEW QUESTION 10**

HOTSPOT

- Select the answer that correctly completes the sentence.

When you use Microsoft 365 Copilot connectors to connect external content to \_\_\_\_\_, your users can find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

**Answer Area**

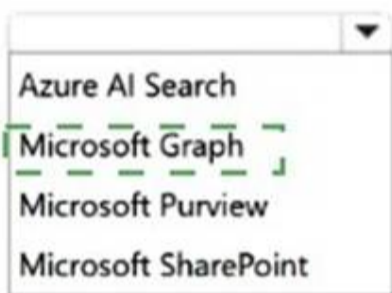

When you use Microsoft 365 Copilot connectors to connect external content to , your users can find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

When you use Microsoft 365 Copilot connectors to connect external content to , your users can find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

**NEW QUESTION 10**

Your company stores thousands of reports and documents across multiple systems. You recommend using Azure AI Search as part of a new generative AI solution to improve information discovery. What is a key benefit of using Azure AI Search in this scenario?

- A. generates responses to customer questions without referencing the existing data
- B. queries and retrieves information from large collections of data by using natural language
- C. automates document workflows based on the document content
- D. improves model accuracy by fine-tuning organizational data

**Answer:** B

**NEW QUESTION 11**

Your company is developing an AI-powered customer support agent. You need to ensure that the solution follows Microsoft responsible AI principles. Which two actions should you perform? Select the two BEST answers. Each correct answer presents part of the solution.

- A. Retain all customer conversations.
- B. Test the agent to ensure that responses are inclusive and culturally sensitive.
- C. Enable the agent to operate independently.
- D. Ensure that the agent can be used for multiple purposes.
- E. Provide a clear disclaimer that users are interacting with an AI solution.

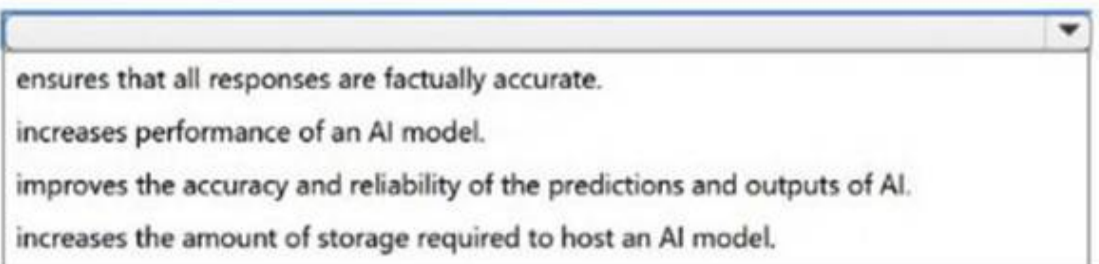

**Answer:** BE

**NEW QUESTION 15**

**HOTSPOT**

- Select the answer that correctly completes the sentence.  
 Using high-quality grounding data in a generative AI solution .

**Answer Area**

Using high-quality grounding data in a generative AI solution  ensures that all responses are factually accurate.  
 increases performance of an AI model.  
 improves the accuracy and reliability of the predictions and outputs of AI.  
 increases the amount of storage required to host an AI model.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Using high-quality grounding data in a generative AI solution

ensures that all responses are factually accurate.

increases performance of an AI model.

**improves the accuracy and reliability of the predictions and outputs of AI.**

increases the amount of storage required to host an AI model.

**NEW QUESTION 17**

Your company purchases Microsoft 365 Copilot for its sales department. The sales department needs to find and summarize information across internal documents quickly. From which two data sources can the sales department obtain results by default? (Select TWO.)

- A. an on-premises file share
- B. a custom customer relationship management (CRM) system
- C. Microsoft SharePoint
- D. Microsoft OneDrive
- E. Microsoft Sway

**Answer:** CD

**Explanation:**

By default, Microsoft 365 Copilot is grounded in your organization's Microsoft 365 data through Microsoft Graph, and it respects the user's existing permissions. For finding and summarizing information across internal documents, the most direct default document repositories in Microsoft 365 are SharePoint (team sites and shared libraries) and OneDrive (a user's work files). That is why C (Microsoft SharePoint) and D (Microsoft OneDrive) are the correct selections. Microsoft explicitly describes Copilot as accessing organizational content via Microsoft Graph, including user documents and related work content. The other options are not by default sources. A (on-premises file share) is not automatically part of Microsoft Graph unless you integrate/migrate content or use connectors to make it discoverable in Microsoft 365 experiences. B (custom CRM) similarly requires an integration approach (for example, Microsoft 365 Copilot connectors / Graph connectors) to index and expose that data for Copilot to use. E (Microsoft Sway) is not a primary default content source for Copilot's document grounding and is not typically referenced as a core internal document repository compared to SharePoint/OneDrive. So, for immediate, out-of-the-box internal document discovery and summarization within Microsoft 365, SharePoint + OneDrive are the default answer.

**NEW QUESTION 18**

HOTSPOT

HOTSPOT - For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Larger datasets can increase the cost of a generative AI solution that uses an Azure Machine Learning workspace.	<input type="radio"/>	<input type="radio"/>
The cost of consuming Azure OpenAI models is primarily identified by the number of input and output tokens processed.	<input type="radio"/>	<input type="radio"/>
The cost of custom generative AI solutions always remains the same regardless of the model version or capability used.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Statements	Yes	No
Larger datasets can increase the cost of a generative AI solution that uses an Azure Machine Learning workspace.	<input checked="" type="radio"/>	<input type="radio"/>
The cost of consuming Azure OpenAI models is primarily identified by the number of input and output tokens processed.	<input checked="" type="radio"/>	<input type="radio"/>
The cost of custom generative AI solutions always remains the same regardless of the model version or capability used.	<input type="radio"/>	<input checked="" type="radio"/>
