SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	☒	☐
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	☒	☐

NEW QUESTION 5

HOTSPOT

Your organization has a Microsoft 365 subscription.

You need to use Microsoft Purview to meet the following requirements:

Prevent users from sharing files that contain Personally Identifiable Information (PII). Use machine learning to train a model that detects sensitive content.

Which Microsoft Purview solution should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Prevent users from sharing PII:

Communication Compliance

Data Loss Prevention

DSPM for AI

Information Protection

Insider Risk Management

Use machine learning to train a model:

Communication Compliance

Data Loss Prevention

DSPM for AI

Information Protection

Insider Risk Management

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Prevent users from sharing PII:

Communication Compliance

Data Loss Prevention

DSPM for AI

Information Protection

Insider Risk Management

Use machine learning to train a model:

Communication Compliance

Data Loss Prevention

DSPM for AI

Information Protection

Insider Risk Management

NEW QUESTION 6

Your organization has a Microsoft 365 subscription. All users are assigned a Microsoft 365 Copilot license.

You need to prevent the users from generating images by using Copilot. What should you use?

- A. the Microsoft Defender portal
- B. the Microsoft Purview portal
- C. the Microsoft 365 admin center
- D. the Microsoft Entra admin center

Answer: C

Explanation:

The correct answer isC. the Microsoft 365 admin center. Microsoft Learn documents a specificCopilot image generationsetting in theMicrosoft 365 admin centerunderCopilot>Settings>Copilot actions>Copilot image generation. Microsoft states that when this scenario is allowed, users can ask Copilot to create, design, and edit images. When it is not allowed, Copilot doesn'tgenerate images and instead responds with stock or brand images. This directly matches the requirement to prevent users from generating images by using Copilot.

The other options are incorrect because Microsoft does not document this control as being managed from Defender, Purview, or Entra for this scenario. Microsoft also separately notes that organizations can control access to Designer image generation through policy, but the admin experience for managing the Microsoft 365 Copilot scenario itself is explicitly surfaced in theMicrosoft 365 admin center. Therefore, for an exam question focused on where an admin should go to disable image generation in Copilot, the best and documented answer isthe Microsoft 365 admin center.

NEW QUESTION 7

HOTSPOT

You are evaluating Microsoft Purview solutions.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
A Communication Compliance policy can detect inappropriate text in Microsoft Teams messages.	☐	☐
