NEW QUESTION 2

An administrator has configured all the back-end servers with a maximum warm-up state rate. Under which conditions is the maximum rate enforced by the FortiADC? (Choose two.)

- A. When the status of a server is set to Enabled from Maintain or Disabled
- B. When multiple health check methods have been configured for a server and some of them are failing but at least one is up
- C. During a warm-up period, when a server is back online after a health check downtime
- D. As long as a server keeps replying to the health check

Answer: CD

NEW QUESTION 3

What actions can FortiADC take with the GeoIP block list when receiving requests from a blocked country's address space? (Choose two.)

- A. Redirect the request
- B. Deny access
- C. Archive the request
- D. Send a 404 Not Found message

Answer: AB

Explanation:

NEW QUESTION 4

Which of the following statements about FortiADC logs are true? (Choose two.)

- A. They can be uploaded automatically to an FTP server.
- B. They can be stored in the FortiCloud.
- C. Only logs whose severity level is equal to or exceeding the configured log severity level are generated.
- D. They can record events related to security features.

Answer: CD

NEW QUESTION 5

To which types of virtual servers can web application firewall profiles be applied? (Choose two.)

- A. HTTPS virtual server
- B. HTTP virtual server
- C. FTP virtual server
- D. HTTP Turbo virtual server

Answer: AB

Explanation:

WAF profiles can be applied to HTTP and HTTPS virtual servers but not HTTP Turbo virtual servers.

Reference: <http://help.fortinet.com/fadc/4-8-0/olh/Content/FortiADC/handbook/waf.htm?tocpath=Chapter%208%3A%20Web%20Application%20Firewall%7C0>

NEW QUESTION 6

To which of these objects can link policies apply in FortiADC? (Choose two.)

- A. Link group
- B. Gateway
- C. Virtual tunnel
- D. Virtual server

Answer: AC

Explanation:

A link policy specifies the source/destination/service matches to which the policy applies. You apply a link policy to a link group or a virtual tunnel. Reference: https://docs.fortinet.com/uploaded/files/2308/FortiADC_4_2_1_Handbook_D_Series_Revision2.pdf page 74

NEW QUESTION 7

Which of the following are valid FortiADC use cases? (Choose three.)

- A. Balance traffic among multiple servers located in four different physical locations
- B. Balance traffic among three IP tunnels that interconnect two remote locations
- C. Balance traffic among three next-hop gateways
- D. Balance traffic among multiple servers based on the type of service (ToS) IP-header field

Answer: ABC

NEW QUESTION 8

Which of the following statements about layer 2 load balancing are true? (Choose two.)

- A. HTTP content can be modified
- B. It's useful when the real IP addresses of the back-end servers are unknown by the FortiADC administrator.
- C. Load balancing decisions are made based on the destination MAC address of the client traffic.
- D. It supports IPv6.

Answer: AB

NEW QUESTION 9

What is the maximum number of sites (or peers) supported in a global load-balancing solution based on FortiAD?

- A. 2
- B. 64
- C. 32
- D. 256

Answer: B

NEW QUESTION 10

An administrator wants to implement load balancing persistence by configuring the FortiADC to prefix the server ID to an existing cookie sent by the back-end servers. Which persistence method can the administrator use?

- A. Persistence cookie
- B. Insert cookie
- C. Hash cookie
- D. Embedded cookie

Answer: D
