

# Microsoft

## Exam Questions MS-101

Microsoft 365 Mobility and Security (beta)

### NEW QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals- Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You discover that some external users accessed content on a Microsoft SharePoint site. You modify the SharePoint sharing policy to prevent sharing outside your organization.

You need to be notified if the SharePoint sharing policy is modified in the future. Solution: From the SharePoint site, you create an alert.

Does this meet the goal?

A. Yes

B. No

**Answer: B**

### NEW QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals- Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).

You configure pilot co-management

You add a new device named Device 1 to the domain. You install the Configuration Manager client on Device1.

You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.

Solution: You create a device configuration profile from the Intune admin center. Does this meet the goal?

A. Yes

B. No

**Answer: B**

### NEW QUESTION 3

Your network contains an on premises Active Directory domain.

Your company has a security policy that prevents additional software from txnrwj installed on domain controllers.

You need to monitor a domain controller by using Microsoft Azure Advanced Threat Protection (ATP). What should you do? More than one answer choice may achieve the goal. Select the BEST answer.

A. Deploy an Azure ATP sensor, and then configure port mirroring.

B. Deploy an Azure ATP sensor, and then configure detections.

C. Deploy an Azure ATP standalone sensor, and then configure detections.

D. Deploy an Azure ATP standalone sensor, and then configure port mirroring.

**Answer: D**

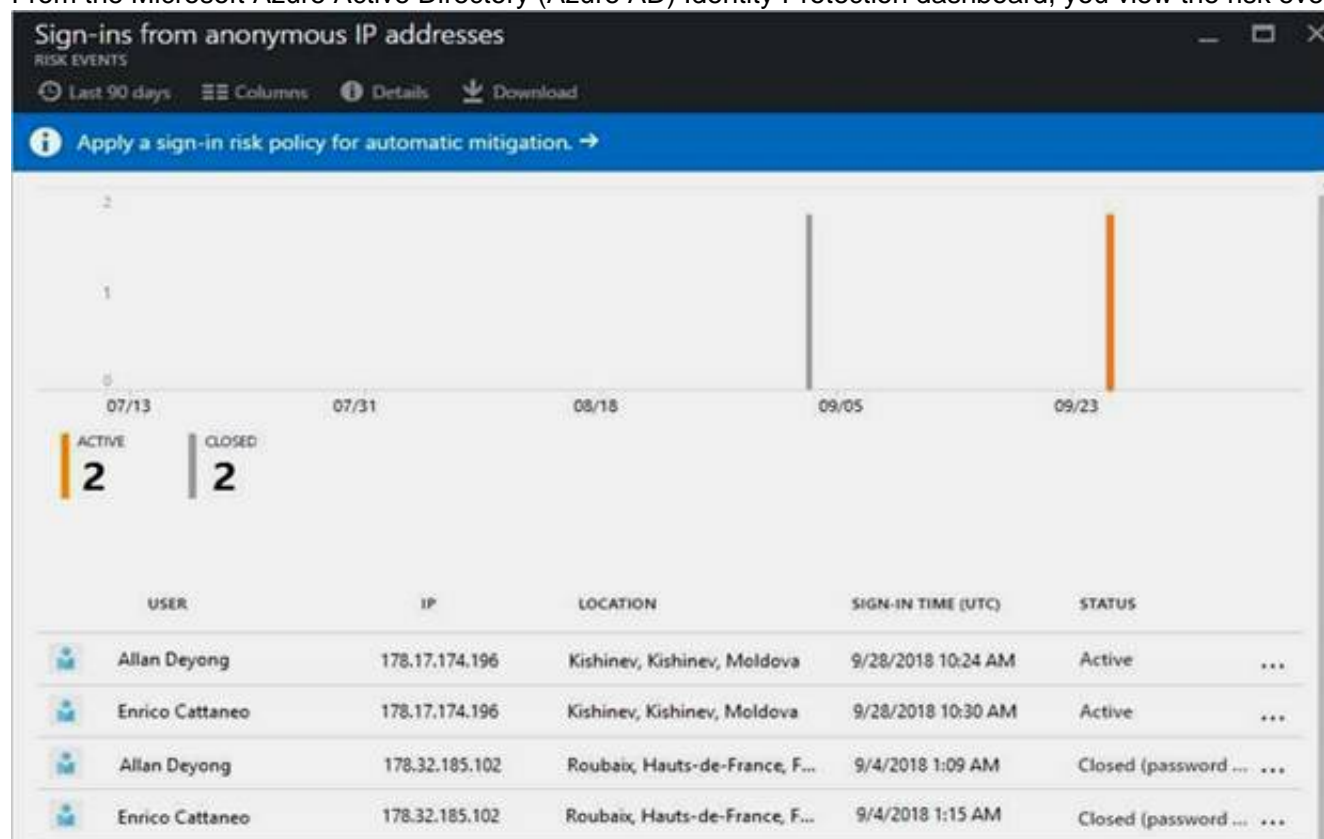

#### Explanation:

References:

<https://docs.microsoft.com/en-us/azure-advanced-threat-protection/install-atp-step5>all-atp-step5

### NEW QUESTION 4

From the Microsoft Azure Active Directory (Azure AD) Identity Protection dashboard, you view the risk events shown in the exhibit. (Click the Exhibit tab.)

You need to reduce the likelihood that the sign-ins are identified at risky. What should you do?

- A. From the Security & Compliance admin center, create a classification label.
- B. From the Security & Compliance admin center, add the users to the Security Readers role group.
- C. From the Azure Active Directory admin center, configure the trusted IPs for multi-factor authentication.
- D. From the Conditional access blade in the Azure Active Directory admin center, create named locations.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>

**NEW QUESTION 5**

Your company has a Microsoft 365 E5 subscription.

Users in the research department work with sensitive data.

You need to prevent the research department users from accessing potentially unsafe websites by using hyperlinks embedded in email messages and documents.

Users in other departments must not be restricted.

What should you do from the Security & Compliance admin center?

- A. Create a data loss prevention (DLP) policy that has a Content is shared condition.
- B. Modify the default safe links policy.
- C. Create a data loss prevention (DLP) policy that has a Content contains condition.
- D. Create a new safe links policy.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-atp-safe-links-policies#policies-that-apply-to-specific-email-recipients>

**NEW QUESTION 6**

**HOTSPOT**

Your company uses Windows Defender Advanced Threat Protection (ATP). Windows Defender ATP contains the device groups shown in the following table.

| Rank | Machine group                | Member                                     |
|------|------------------------------|--|
| 1    | Group1                       | Name starts with COMP                      |
| 2    | Group2                       | Name starts with Comp And OS In Windows 10 |
| 3    | Group3                       | OS In Windows Server 2016                  |
| Last | Ungrouped machines (default) | Not applicable                             |

You onboard computers to Windows Defender ATP as shown in the following table.

| Name      | Operating system    |
|-----------|---------------------|
| Computer1 | Windows 10          |
| Computer2 | Windows Server 2016 |

Of which groups are Computer1 and Computer2 members? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1: 

Group1 only

Group2 only

Group1 and Group2

Ungrouped machines

Computer2: 

Group1 only

Group3 only

Group1 and Group3

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Computer1: 

▼  
Group1 only  
Group2 only  
Group1 and Group2  
Ungrouped machines

Computer2: 

▼  
Group1 only  
Group3 only  
Group1 and Group3

#### NEW QUESTION 7

##### HOTSPOT

You have several devices enrolled in Microsoft Intune.

You have a Microsoft Azure Active Directory (Azure AD) tenant that includes the users shown in the following table.

| Name  | Role                       | Member of |
|-------|----------------------------|-----------|
| User1 | Cloud device administrator | Group1    |
| User2 | Intune administrator       | Group2    |
| User3 | None                       | None      |

The device limit restrictions in Intune are configured as shown in the following table.

| Priority | Name      | Device limit | Assigned to |
|----------|-----------|--------------|-------------|
| 1        | Policy1   | 15           | Group2      |
| 2        | Policy2   | 10           | Group1      |
| Default  | All users | 5            | All users   |

You add User3 as a device enrollment manager in Intune.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

| Statements   | Yes                   | No                    |
|--|-----------------------|-----------------------|
| User1 can enroll a maximum of 10 devices in Intune.        | <input type="radio"/> | <input type="radio"/> |
| User2 can enroll a maximum of 10 devices in Intune.        | <input type="radio"/> | <input type="radio"/> |
| User3 can enroll an unlimited number of devices in Intune. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

##### Explanation:

References:

<https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/enroll-devices-with-device-enrollment-manager>

#### NEW QUESTION 8

##### HOTSPOT

You plan to allow users from the engineering department to enroll their mobile device in mobile device management (MDM).

The device type restrictions are configured as shown in the following table.

| Priority | Name      | Allowed platform | Assigned to |
|----------|-----------|------------------|-------------|
| 1        | iOS       | iOS              | Marketing   |
| 2        | Android   | Android          | Engineering |
| Default  | All users | All platforms    | All users   |

The device limit restrictions are configured as shown in the following table.

| Priority | Name        | Device limit | Assigned to |
|----------|-------------|--------------|-------------|
| 1        | Engineering | 15           | Engineering |
| 2        | Wet Region  | 5            | Engineering |
| Default  | All users   | 10           | All users   |

What is the effective configuration for the members of the Engineering group? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device limit:

|    |
|----|
| ▼  |
| 5  |
| 10 |
| 15 |

Allowed platform:

|               |
|---------------|
| ▼             |
| Android only  |
| iOS only      |
| All platforms |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Device limit:

|    |
|----|
| ▼  |
| 5  |
| 10 |
| 15 |

Allowed platform:

|               |
|---------------|
| ▼             |
| Android only  |
| iOS only      |
| All platforms |

#### NEW QUESTION 9

Your network contains an Active Directory domain named contoso.com. The domain contains 100 Windows 8.1 devices. You plan to deploy a custom Windows 10 Enterprise image to the Windows 8.1 devices. You need to recommend a Windows 10 deployment method. What should you recommend?

- A. a provisioning package
- B. an in place upgrade
- C. wipe and load refresh
- D. Windows Autopilot

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/microsoft-365/enterprise/windHYPERLINK> "https://docs.microsoft.com/en-us/microsoft-365/enterprise/windows10-infrastructure"ows10- infrastructure

#### NEW QUESTION 10

You have Windows 10 Pro devices that are joined to an Active Directory domain. You plan to create a Microsoft 365 tenant and to upgrade the devices to Windows 10 Enterprise. You are evaluating whether to deploy Windows Hello for Business for SSO to Microsoft 365 services. What are two prerequisites of the deployment? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Microsoft Azure Active Directory (Azure AD)
- B. smartcards
- C. Microsoft Intune enrollment
- D. TPM-enabled devices
- E. computers that have biometric hardware features

**Answer:** AC

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-hybrid-aadj-sso-base>

#### NEW QUESTION 10

Your company has a Microsoft 365 E3 subscription.

All devices run Windows 10 Pro and are joined to Microsoft Azure Active Directory (Azure AD).

You need to change the edition of Windows 10 to Enterprise the next time users sign in to their computer. The solution must minimize downtime for the users. What should you use?

- A. Windows Autopilot
- B. Windows Update
- C. Subscription Activation

D. an in-place upgrade

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

**NEW QUESTION 14**

HOTSPOT

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. Your company implements Windows Information Protection (WIP).

You need to modify which users and applications are affected by WIP.

What should you do? To answer, select the appropriate options m the answer area.

NOTE: Each correct selection is worth one point.

To modify which users are affected by WIP, configure:

The Azure AD app registration

The Azure AD device settings

The MAM User scope

The mobile device management (MDM) authority

To modify which applications are affected by WIP, configure:

App configuration policies

App protection policies

Compliance policies

Device configuration profiles

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protect>[HYPERLINK "https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune-azure"](https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune-azure)ion/create-wip- policy-using-intune-azure

**NEW QUESTION 18**

Your company has a Microsoft 365 subscription.

You need to identify which users performed the following privileged administration tasks:

- Deleted a folder from the second-stage Recycle Bin of Microsoft SharePoint
  - Opened a mailbox of which the user was not the owner
  - Reset a user password
- What should you use?

A. Microsoft Azure Active Directory (Azure AD) audit logs

B. Security & Compliance content search

C. Microsoft Azure Active Directory (Azure AD) sign-ins

D. Security & Compliance audit tag search

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/activity-logs-overview>[HYPERLINK "https://docs.microsoft.com/en-us/azure/azure-monitor/platform/activity-logs-overview"](https://docs.microsoft.com/en-us/azure/azure-monitor/platform/activity-logs-overview)docs.microsoft.com/en-us/azure/azure-monitor/platform/activity-logs-overview

**NEW QUESTION 23**

HOTSPOT

Your network contains an Active Directory domain named contoso.com. The domain contains the file servers shown in the following table.

| Name    | IP address   |
|---------|--------------|
| Server1 | 192.168.1.10 |
| Server2 | 192.168.2.10 |

A file named File1.abc is stored on Server1. A file named File2.abc is stored on Server2. Three apps named App1, App2, and App3 all open files that have the .abc file extension.

You implement Windows Information Protection (WIP) by using the following configurations:

Exempt apps: App2

Protected apps: App1

Windows Information Protection mode: Block

Network boundary: IPv4 range of: 192.168.1.1-192.168-1.255

You need to identify the apps from which you can open File1.abc.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements                      | Yes                   | No                    |
|---------------------------------|-----------------------|-----------------------|
| You can open File1.abc in App1. | <input type="radio"/> | <input type="radio"/> |
| You can open File1.abc in App2. | <input type="radio"/> | <input type="radio"/> |
| You can open File1.abc in App3. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune-azure>

**NEW QUESTION 24**

In Microsoft 365, you configure a data loss prevention (DLP) policy named Policy1. Policy1 detects the sharing of United States (US) bank account numbers in email messages and attachments.

Policy1 is configured as shown in the exhibit. (Click the Exhibit tab.)

Use actions to protect content when the conditions are met.

Restrict access or encrypt the content

☒ Block people from sharing and restrict access to shared content  
By default, users are blocked from sending email messages to people. You can choose who has access to shared SharePoint and OneDrive content.  
Block these people from accessing SharePoint and OneDrive content

☐ Everyone. Only the content owner, the last modifier, and the site admin will continue to have access

☒ Only people outside your organization. People inside your organization will continue to have access.

☐ Encrypt email messages (applies only to content in Exchange)

You need to ensure that internal users can email documents that contain US bank account numbers to external users who have an email suffix of contoso.com. What should you configure?

- A. an action  
B. a group  
C. an exception  
D. a condition

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies#how-dlp-policies-work>

**NEW QUESTION 27**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).

You configure pilot co-management.

You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.

You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.

Solution: You add Device1 to an Active Directory group. Does this meet the goal?

- A. Yes  
B. No

**Answer:** A

**Explanation:**

References:

<https://www.sccconfigmgr.com/2017/11/30/how-to-setup-co-management-part-6/>

**NEW QUESTION 31**

Your company has a Microsoft 365 subscription.

You implement Microsoft Azure Information Protection.

You need to automatically protect email messages that contain the word Confidential in the subject line.

What should you create?

- A. a mail flow rule from the Exchange admin center  
B. a message trace from the Security & Compliance admin center  
C. a supervision policy from the Security & Compliance admin center  
D. a sharing policy from the Exchange admin center

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/information-protection/configure-exo-rules>

NEW QUESTION 36

You create a new Microsoft 365 subscription and assign Microsoft 365 E3 licenses to 100 users. From the Security & Compliance admin center, you enable auditing.

You are planning the auditing strategy.

Which three activities will be audited by default? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. An administrator creates a new Microsoft SharePoint site collection.
- B. An administrator creates a new mail flow rule.
- C. A user shares a Microsoft SharePoint folder with an external user.
- D. A user delegates permissions to their mailbox.
- E. A user purges messages from their mailbox.

Answer: ABC

Explanation:

References:

[https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-andcompliance?redirectSourcePath=%25HYPERLINK "https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-andcompliance?redirectSourcePath=%2farticle%2f0d4d0f35-390b-4518-800e-0c7ec95e946c"2farticle%252f0d4d0f35-390b-4518-800e-0c7ec95e946c](https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-andcompliance?redirectSourcePath=%25HYPERLINK%20https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-andcompliance?redirectSourcePath=%2farticle%2f0d4d0f35-390b-4518-800e-0c7ec95e946c%2farticle%252f0d4d0f35-390b-4518-800e-0c7ec95e946c)

NEW QUESTION 37

HOTSPOT

You purchase a new Microsoft 365 subscription.

You create 100 users who are assigned Microsoft 365 E3 licenses. From the Security & Compliance admin center, you enable auditing.

Six months later, a manager sends you an email message asking the following questions: Question1: Who created a team named Team1 14 days ago?

Question2: Who signed in to the mailbox of User1 30 days ago?

Question3: Who changed the site collection administrators of a site 60 days ago?

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

| Statements   | Yes                   | No                    |
|--|-----------------------|-----------------------|
| An audit log search from the Security & Compliance admin center will provide the answer to question 1. | <input type="radio"/> | <input type="radio"/> |
| An audit log search from the Security & Compliance admin center will provide the answer to question 2. | <input type="radio"/> | <input type="radio"/> |
| An audit log search from the Security & Compliance admin center will provide the answer to question 3. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-and-compliance?redirectSourcePath=%2farticle%2f0d4d0f35-390b-4518-800e-0c7ec95e946c>  
<https://docs.microsoft.com/en-us/office365/securitycompliance/enable-mailbox-auditing>

NEW QUESTION 41

From the Security & Compliance admin center, you create a content export as shown in the exhibit. (Click the Exhibit tab.)

SharePoint Content\_Export

Restart report

Download report

Delete

**Status:**  
The export has completed. You can start downloading the results.

**Items included from the search:**  
All items, excluding ones that have unrecognized format, are encrypted, or weren't indexed for other reasons.

**Exchange content format:**  
One PST file for each mailbox.

**De-duplication for Exchange content:**  
Not enabled.

**SharePoint document versions:**  
Included

**Export files in a compressed (zipped) folder:**  
Yes

**The export data was prepared within region:**  
Default region

Close

Feedback

What will be excluded from the export?

- A. a 60-MB DOCX file
- B. a 5-MB MP3 file
- C. a 10-MB XLSX file
- D. a 5-KB RTF file

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/export-a-content-search-report>

**NEW QUESTION 42**

Your company has a Microsoft 365 tenant.

The company sells products online and processes credit card information.

You need to be notified if a file stored in Microsoft SharePoint Online contains credit card information. The file must be removed automatically from its current location until an administrator can review its contents.

What should you use?

- A. a Security & Compliance data loss prevention (DLP) policy
- B. a Microsoft Cloud App Security access policy
- C. a Security & Compliance retention policy
- D. a Microsoft Cloud App Security file policy

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

**NEW QUESTION 47**

Your company has five security information and event management (SIEM) appliances. The traffic logs from each appliance are saved to a file share named Logs.

You need to analyze the traffic logs.

What should you do from Microsoft Cloud App Security?

- A. Click Investigate, and then click Activity log.
- B. Click Control, and then click Policie
- C. Create a file policy.
- D. Click Discover, and then click Create snapshot report.
- E. Click Investigate, and then click Files.

**Answer:** A

**Explanation:**  
References:  
<https://docs.microsoft.com/en-us/office365/securitycompliance/investigate-an-activity-in-office-365-cas>

**NEW QUESTION 52**

You have a Microsoft 365 subscription.  
You need to be notified if users receive email containing a file that has a virus. What should you do?

- A. From the Exchange admin center, create an in-place eDiscovery & hold.
- B. From the Security & Compliance admin center, create a data governance event.
- C. From the Exchange admin center, create an anti-malware policy.
- D. From the Security & Compliance admin center, create a safe attachments policy.

**Answer:** C

**Explanation:**  
References:  
<https://docs.microsoft.com/en-us/office365/servicedescriptions/exchange-online-service-description/anti-spamand-anti-malware-protection>

**NEW QUESTION 56**

HOTSPOT

You configure an anti-phishing policy as shown in the following exhibit.

| Policy setting    | Policy name<br>Description<br>Applied to  | Managers  |
|-------------------|---|---|
|                   |   | If the email is sent to:<br>IrvinS@M365x289755.OnMicrosoft.com<br>MiriamG@M365x289755.OnMicrosoft.com<br>Except if the email is sent to member of:<br>test1ww@M365x289755.OnMicrosoft.com |
| Impersonation     | Users to protect<br>Protect all domains I own<br>Protect specific domains<br>Action > User impersonation<br>Action > Domain impersonation<br>Safety tips > User impersonation<br>Safety tips > Domain impersonation<br>Safety tips > Unusual characters<br>Mailbox intelligence | On - 3 User(s) specified<br>On<br>On - 2 Domain(s) specified<br>Move message to the recipients' Junk Email folders<br>Delete the message before it's delivered                            |
| Spoof             | Enable antispoofting protection<br>Action   | On<br>Quarantine the message  |
| Advanced settings | Advanced phishing thresholds  | 3 - More Aggressive   |

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

If a message is identified as a domain impersonation, [answer choice].

the message is delivered to the Inbox folder

the message is moved to the Deleted Items folder

the messages are moved to the Junk Email folder

To reduce the likelihood of the impersonation policy generating false positives, configure [answer choice].

Advanced phishing thresholds

Domain impersonation

Enable antispoofting protection

Mailbox intelligence

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**  
References:  
<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-anti-phishing-policies#learn-about-HYPERLINK> "https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-anti-phishing-policies#learn-about-atp-anti-phishing-policy-options"atp-anti-phishing-policy-options

**NEW QUESTION 60**

HOTSPOT

Your network contains an Active Directory domain named contoso.com that uses Microsoft System Center Configuration Manager (Current Branch).  
You have Windows 10 and Windows 8.1 devices.  
You need to ensure that you can analyze the upgrade readiness of all the Windows 8.1 devices and analyze the update compliance of all the Windows 10 devices.  
What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

First action to perform:

|   |
|---|
| ▼   |
| Enroll the devices in Microsoft Intune.                     |
| Configure device compliance in Microsoft Intune.            |
| Create a Microsoft Azure Log Analytics workspace.           |
| Add an alias (CNAME) record to the DNS zone of contoso.com. |

Second action to perform:

|  |
|--|
| ▼  |
| Configure all the devices to have a commercial ID.                   |
| Configure software inventory in Configuration Manager.               |
| Configure all the devices to join the Windows Insider Program.       |
| Configure and restart the Windows Update service on all the devices. |

- A. Mastered
- B. Not Mastered

**Answer:** A

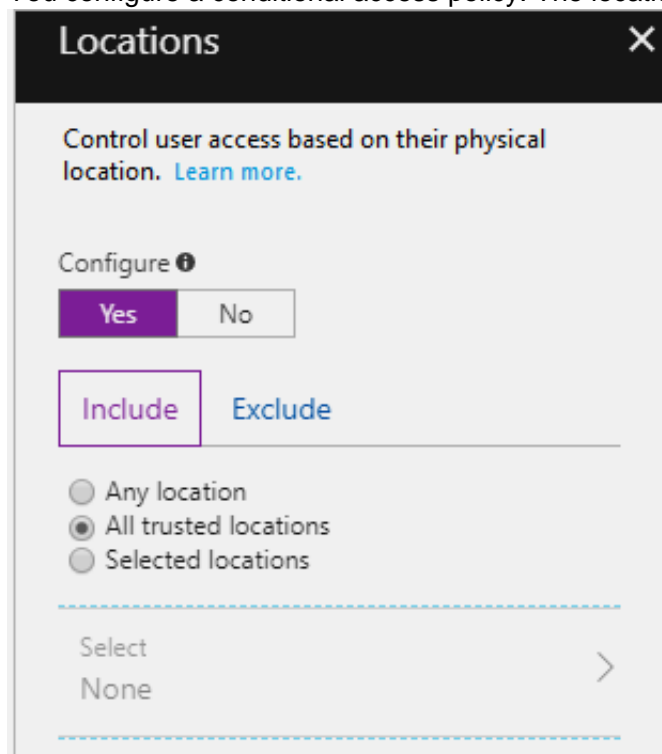

**Explanation:**

**NEW QUESTION 62**

You configure a conditional access policy. The locations settings are configured as shown in the Locations exhibit. (Click the Locations tab.)

The users and groups settings are configured as shown in the Users and Groups exhibit. (Click Users and Groups tab.)

Members of the Security reader group report that they cannot sign in to Microsoft Active Directory (Azure AD) on their device while they are in the office. You need to ensure that the members of the Security reader group can sign in to Azure AD on their device while they are in the office. The solution must use the principle of least privilege. What should you do?

- A. From the conditional access policy, configure the device state.
- B. From the Azure Active Directory admin center, create a custom control.
- C. From the Intune admin center, create a device compliance policy.
- D. From the Azure Active Directory admin center, create a named location.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>

**NEW QUESTION 64**

Your company uses on-premises Windows Server File Classification Infrastructure (FCI). Some documents on the on-premises file servers are classified as Confidential.

You migrate the files from the on-premises file servers to Microsoft SharePoint Online.

You need to ensure that you can implement data loss prevention (DLP) policies for the uploaded file based on the Confidential classification.

What should you do first?

- A. From the SharePoint admin center, configure hybrid search.
- B. From the SharePoint admin center, create a managed property.
- C. From the Security & Compliance Center PowerShell, run the New-DataClassification cmdlet.
- D. From the Security & Compliance Center PowerShell, run the New-DlpComplianceRule cmdlet.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powershell/module/exchange/policy-and-compliance-dlp/newdataclassification?view=exchange-ps>

**NEW QUESTION 65**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

From the Security & Compliance admin center, you create a role group named US eDiscovery Managers by copying the eDiscovery Manager role group.

You need to ensure that the users in the new role group can only perform content searches of mailbox content for users in the United States.

Solution: From Windows PowerShell, you run the New-ComplianceSecurityFilter cmdlet with the appropriate parameters.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/permissions-filtering-for-content-search>

<https://docs.microsoft.com/en-us/powershell/module/exchange/policy-and-compliance-content-search/newcompliancesecurityfilter?view=exchange-ps>

**NEW QUESTION 67**

HOTSPOT

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.

A user named User1 has files on a Windows 10 device as shown in the following table.

| Name       | Text in file   |
|------------|--|
| File1.docx | Importing and exporting is easy. For import, you need a source, and for export, you need a destination.                              |
| File2.docx | You must declare what you want to import. Dangerous items cannot be imported. If you want to import valuables, you must pay customs. |
| File3.docx | IM are initials for instant messaging. You can use Microsoft Skype for IM, but there are also other IM programs.                     |

In Azure Information Protection, you create a label named Label1 that is configured to apply automatically. Label1 is configured as shown in the following exhibit.

NEW QUESTION 73

You have a Microsoft 365 subscription.

You plan to enable Microsoft Azure Information Protection.

You need to ensure that only the members of a group named PilotUsers can protect content. What should you do?

- A. Run the Add-AadrmRoleBasedAdministrator cmdlet.
- B. Create an Azure Information Protection policy.
- C. Configure the protection activation status for Azure Information Protection.
- D. Run the Set-AadrmOnboardingControlPolicy cmdlet.

**Answer: D**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/information-protection/activate-service>

**NEW QUESTION 76**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

From the Security & Compliance admin center, you create a role group named US eDiscovery Managers by copying the eDiscovery Manager role group.

You need to ensure that the users in the new role group can only perform content searches of mailbox content for users in the United States.

Solution: From Windows PowerShell, you run the New-AzureRmRoleAssignment cmdlet with the appropriate parameters.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powershell/module/azurerms/resources/new-azurermroleassignment?view=azurermps-6.13.0>

**NEW QUESTION 80**

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You sign for Microsoft Store for Business.

The tenant contains the users shown in the following table.

| Name  | Microsoft Store for Business role | Azure AD role                   |
|-------|-----------------------------------|---------------------------------|
| User1 | Purchaser                         | None                            |
| User2 | Basic Purchaser                   | None                            |
| User3 | None                              | Application administrator       |
| User4 | None                              | Cloud application administrator |
| User5 | None                              | None                            |

Microsoft Store for Business has the following Shopping behavior settings: Allow users to shop is set to On

Make everyone a Basic Purchaser is set to Off

You need to identify which users can install apps from the Microsoft for Business private store.

Which users should you identify?

- A. User1, User2, User3, User4, and User5
- B. User1 only
- C. User1 and User2 only
- D. User3 and User4 only
- E. User1, User2, User3, and User4 only

**Answer: C**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/microsoft-store/acquire-apps-microsoft-store-for-business>

**NEW QUESTION 85**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result these questions will not appear In the review screen.

You have a Microsoft Azure Active directory (Azure AD) tenant named contoso.com.

You create an Azure Advanced Threat Protection (ATP) workspace named Workspace1. The tenet contains the users shown in the following table .

| Name  | Member of group                     | Azure AD role          |
|-------|-------------------------------------|------------------------|
| User1 | Azure ATP Workspace1 Administrators | None                   |
| User2 | Azure ATP Workspace1 Users          | None                   |
| User3 | None                                | Security administrator |
| User4 | Azure ATP Workspace1 Users          | Global administrator   |

You need to modify the configuration of the Azure ATP sensors.

Solution: You instruct User 3 to modify the Azure ATP sensor configuration- Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 87

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result these questions will not appear In the review screen.

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You create an Azure Advanced Threat Protection (ATP) workspace named Workspace1. The tenant contains users shown in the following table.

| Name  | Member of group                     | Azure AD role          |
|-------|-------------------------------------|------------------------|
| User1 | Azure ATP Workspace1 Administrators | None                   |
| User2 | Azure ATP Workspace1 Users          | None                   |
| User3 | None                                | Security administrator |
| User4 | Azure ATP Workspace1 Users          | Global administrator   |

You need to modify the configuration of the Azure ATP sensors.

Solution: You instruct User1 to modify the Azure ATP sensor configuration. Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 92

HOTSPOT

Your company has a Microsoft 365 subscription.

You need to configure Microsoft 365 to meet the following requirements:

- Malware found in email attachments must be quarantined for 20 days.
- The email address of senders to your company must be verified.

Which two options should you configure in the Security & Compliance admin center? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

ATP anti-phishing

Protect users from phishing attacks (like impersonation and spoofing), and use safety tips to warn users about potentially harmful messages.

ATP safe attachments

Protect your organization from malicious content in email attachments and files in SharePoint, OneDrive, and Teams.

ATP Safe Links

Protect your users from opening and sharing malicious links in email messages and Office 2016 desktop apps.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

ATP anti-phishing

Protect users from phishing attacks (like impersonation and spoofing), and use safety tips to warn users about potentially harmful messages.

ATP safe attachments

Protect your organization from malicious content in email attachments and files in SharePoint, OneDrive, and Teams.

ATP Safe Links

Protect your users from opening and sharing malicious links in email messages and Office 2016 desktop apps.

NEW QUESTION 97

HOTSPOT

You need to meet the Intune requirements for the Windows 10 devices.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Settings to configure in Azure AD:

Device settings

Mobility (MDM and MAM)

Organizational relationships

User settings

Settings to configure in Intune:

Device compliance

Device configuration

Device enrollment

Mobile Device Management Authority

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/intune/windows-enroll>

**NEW QUESTION 100**

HOTSPOT

As of March, how long will the computers in each office remain supported by Microsoft? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows a hotspot question interface. It contains two dropdown menus. The first dropdown is labeled 'Seattle:' and the second is labeled 'New York:'. Both dropdowns have a downward arrow icon in the top right corner. The options for both dropdowns are: 6 months, 18 months, 24 months, 30 months, and 5 years.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://www.windowscentral.com/whats-difference-HYPERLINK> "https://www.windowscentral.com/whats-difference-between-quality-updates-and-feature-updates-windows-10"between-quality-updates-and-feature-updates-windows-10

**NEW QUESTION 102**

You need to ensure that User1 can enroll the devices to meet the technical requirements. What should you do?

- A. From the Azure Active Directory admin center, assign User1 the Cloud device administrator role.
- B. From the Azure Active Directory admin center, configure the Maximum number of devices per user setting.
- C. From the Intune admin center, add User1 as a device enrollment manager.
- D. From the Intune admin center, configure the Enrollment restrictions.

**Answer:** C

**Explanation:**

<https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/enroll-devices-with-device-enrHYPERLINK> "https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/enroll-devices-with-device-enrollment-manager"ollment-manager

**NEW QUESTION 106**

You need to create the Microsoft Store for Business. Which user can create the store?

- A. User2
- B. User3
- C. User4
- D. User5

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business>

Case Study: 2

A. Datum Case Study: Overview

Existing Environment

This is a case study Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next

section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question. Current Infrastructure

A. Datum recently purchased a Microsoft 365 subscription. All user files are migrated to Microsoft 365.

All mailboxes are hosted in Microsoft 365. The users in each office have email suffixes that include the country of the user, for example, user1@us.adatum.com or user2#uk.adatum.com.

Each office has a security information and event management (SIEM) appliance. The appliances come from three different vendors.

A. Datum uses and processes Personally Identifiable Information (PII).

Problem Statements Requirements

A. Datum entered into litigation. The legal department must place a hold on all the documents of a user named User1 that are in Microsoft 365. Business Goals

A. Datum wants to be fully compliant with all the relevant data privacy laws in the regions where it operates.

A. Datum wants to minimize the cost of hardware and software whenever possible.

Technical Requirements

A. Datum identifies the following technical requirements:

- Centrally perform log analysis for all offices.
- Aggregate all data from the SIEM appliances to a central cloud repository for later analysis.
- Ensure that a SharePoint administrator can identify who accessed a specific file stored in a document library.
- Provide the users in the finance department with access to Service assurance information in Microsoft Office 365.
- Ensure that documents and email messages containing the PII data of European Union (EU) citizens are preserved for 10 years.
- If a user attempts to download 1,000 or more files from Microsoft SharePoint Online within 30 minutes, notify a security administrator and suspend the user's user account.
- A security administrator requires a report that shows which Microsoft 365 users signed in. Based on the report, the security administrator will create a policy to require multi-factor authentication when a sign in is high risk.
- Ensure that the users in the New York office can only send email messages that contain sensitive U.S. PII data to other New York office users. Email messages must be monitored to ensure compliance. Auditors in the New York office must have access to reports that show the sent and received email messages containing sensitive U.S. PII data.

#### NEW QUESTION 110

You need to meet the technical requirement for large-volume document retrieval. What should you create?

- A. a data loss prevention (DLP) policy from the Security & Compliance admin center
- B. an alert policy from the Security & Compliance admin center
- C. a file policy from Microsoft Cloud App Security
- D. an activity policy from Microsoft Cloud App Security

**Answer:** D

#### Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/activity-policies-and-alerts>

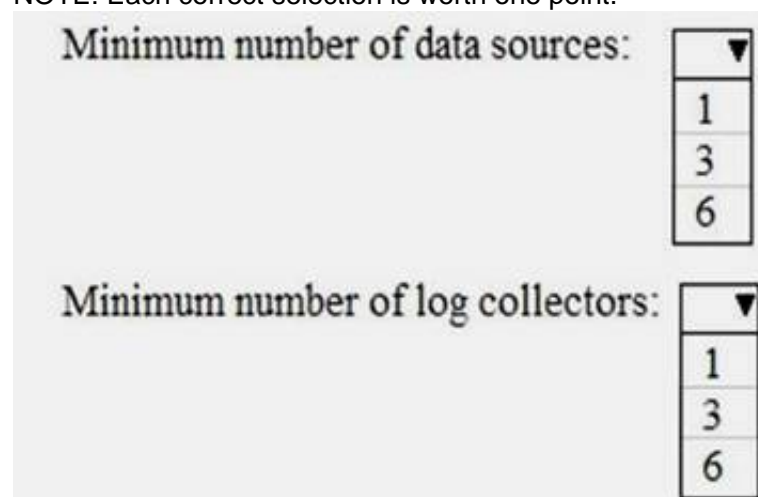

#### NEW QUESTION 111

HOTSPOT

You need to meet the technical requirement for log analysis.

What is the minimum number of data sources and log collectors you should create from Microsoft Cloud App Security? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Minimum number of data sources:

Minimum number of log collectors:

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

References:

<https://docs.microsoft.com/en-us/cloud-app-security/discovery-docker>

#### NEW QUESTION 115

HOTSPOT

You need to meet the technical requirement for the SharePoint administrator. What should you do?

To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-and-compliance#step-3-filter-the-search-results>

**NEW QUESTION 120**

.....

## About ExamBible

### *Your Partner of IT Exam*

## Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

## Our Advances

### \* 99.9% Uptime

All examinations will be up to date.

### \* 24/7 Quality Support

We will provide service round the clock.

### \* 100% Pass Rate

Our guarantee that you will pass the exam.

### \* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

### NEW QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals- Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You discover that some external users accessed content on a Microsoft SharePoint site. You modify the SharePoint sharing policy to prevent sharing outside your organization.

You need to be notified if the SharePoint sharing policy is modified in the future. Solution: From the SharePoint site, you create an alert.

Does this meet the goal?

A. Yes

B. No

**Answer: B**

### NEW QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals- Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).

You configure pilot co-management

You add a new device named Device 1 to the domain. You install the Configuration Manager client on Device1.

You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.

Solution: You create a device configuration profile from the Intune admin center. Does this meet the goal?

A. Yes

B. No

**Answer: B**

### NEW QUESTION 3

Your network contains an on premises Active Directory domain.

Your company has a security policy that prevents additional software from txnrwj installed on domain controllers.

You need to monitor a domain controller by using Microsoft Azure Advanced Threat Protection (ATP). What should you do? More than one answer choice may achieve the goal. Select the BEST answer.

A. Deploy an Azure ATP sensor, and then configure port mirroring.

B. Deploy an Azure ATP sensor, and then configure detections.

C. Deploy an Azure ATP standalone sensor, and then configure detections.

D. Deploy an Azure ATP standalone sensor, and then configure port mirroring.

**Answer: D**

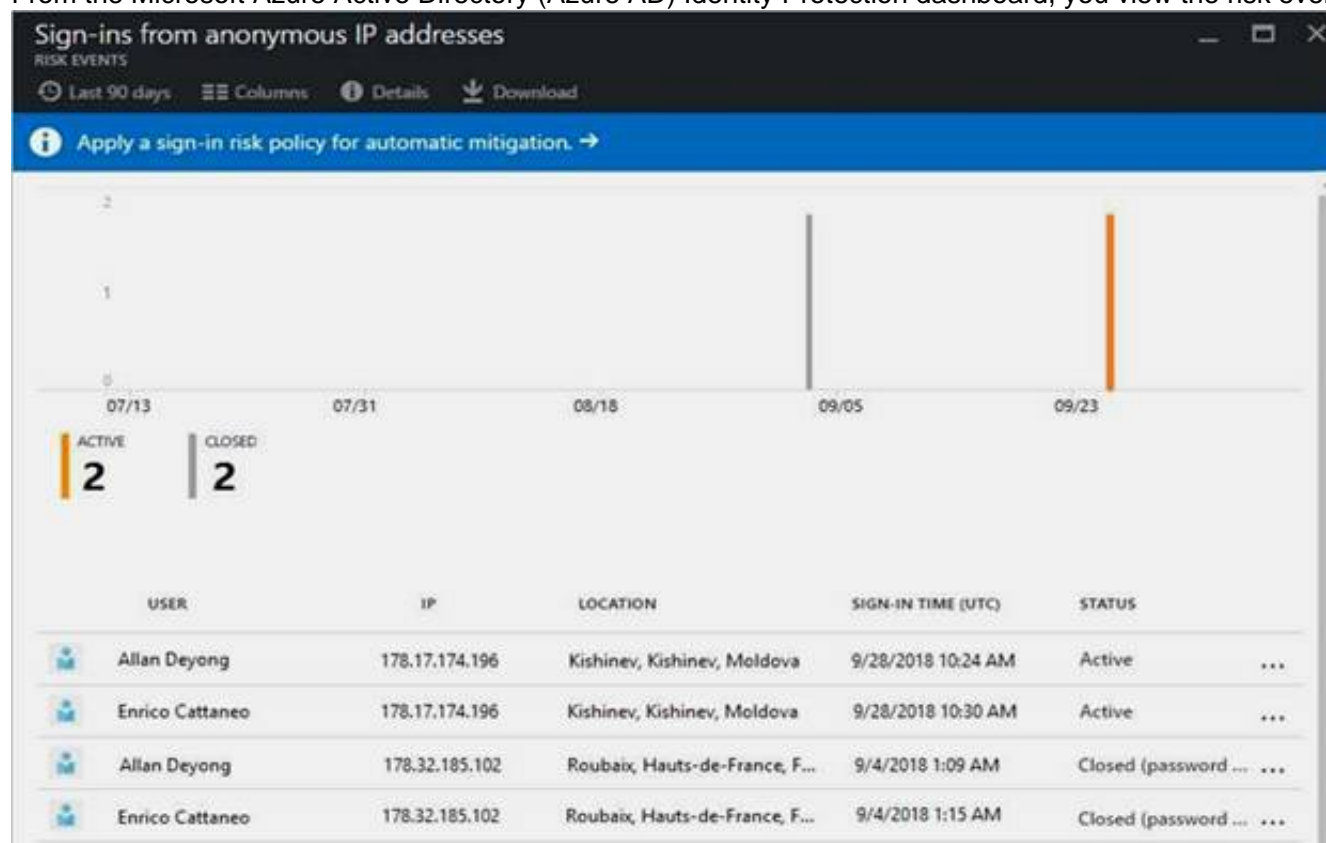

#### Explanation:

References:

<https://docs.microsoft.com/en-us/azure-advanced-threat-protection/install-atp-step5>all-atp-step5

### NEW QUESTION 4

From the Microsoft Azure Active Directory (Azure AD) Identity Protection dashboard, you view the risk events shown in the exhibit. (Click the Exhibit tab.)

You need to reduce the likelihood that the sign-ins are identified at risky. What should you do?

- A. From the Security & Compliance admin center, create a classification label.
- B. From the Security & Compliance admin center, add the users to the Security Readers role group.
- C. From the Azure Active Directory admin center, configure the trusted IPs for multi-factor authentication.
- D. From the Conditional access blade in the Azure Active Directory admin center, create named locations.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>

**NEW QUESTION 5**

Your company has a Microsoft 365 E5 subscription.

Users in the research department work with sensitive data.

You need to prevent the research department users from accessing potentially unsafe websites by using hyperlinks embedded in email messages and documents.

Users in other departments must not be restricted.

What should you do from the Security & Compliance admin center?

- A. Create a data loss prevention (DLP) policy that has a Content is shared condition.
- B. Modify the default safe links policy.
- C. Create a data loss prevention (DLP) policy that has a Content contains condition.
- D. Create a new safe links policy.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-atp-safe-links-policies#policies-that-apply-to-specific-email-recipients>

**NEW QUESTION 6**

**HOTSPOT**

Your company uses Windows Defender Advanced Threat Protection (ATP). Windows Defender ATP contains the device groups shown in the following table.

| Rank | Machine group                | Member                                     |
|------|------------------------------|--|
| 1    | Group1                       | Name starts with COMP                      |
| 2    | Group2                       | Name starts with Comp And OS In Windows 10 |
| 3    | Group3                       | OS In Windows Server 2016                  |
| Last | Ungrouped machines (default) | Not applicable                             |

You onboard computers to Windows Defender ATP as shown in the following table.

| Name      | Operating system    |
|-----------|---------------------|
| Computer1 | Windows 10          |
| Computer2 | Windows Server 2016 |

Of which groups are Computer1 and Computer2 members? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1: 

Group1 only

Group2 only

Group1 and Group2

Ungrouped machines

Computer2: 

Group1 only

Group3 only

Group1 and Group3

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Computer1: 

▼  
Group1 only  
Group2 only  
Group1 and Group2  
Ungrouped machines

Computer2:

Group1 only  
Group3 only  
Group1 and Group3

#### NEW QUESTION 7

##### HOTSPOT

You have several devices enrolled in Microsoft Intune.

You have a Microsoft Azure Active Directory (Azure AD) tenant that includes the users shown in the following table.

| Name  | Role                       | Member of |
|-------|----------------------------|-----------|
| User1 | Cloud device administrator | Group1    |
| User2 | Intune administrator       | Group2    |
| User3 | None                       | None      |

The device limit restrictions in Intune are configured as shown in the following table.

| Priority | Name      | Device limit | Assigned to |
|----------|-----------|--------------|-------------|
| 1        | Policy1   | 15           | Group2      |
| 2        | Policy2   | 10           | Group1      |
| Default  | All users | 5            | All users   |

You add User3 as a device enrollment manager in Intune.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

| Statements   | Yes                   | No                    |
|--|-----------------------|-----------------------|
| User1 can enroll a maximum of 10 devices in Intune.        | <input type="radio"/> | <input type="radio"/> |
| User2 can enroll a maximum of 10 devices in Intune.        | <input type="radio"/> | <input type="radio"/> |
| User3 can enroll an unlimited number of devices in Intune. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer: A**

##### Explanation:

References:

<https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/enroll-devices-with-device-enrollment-manager>

#### NEW QUESTION 8

##### HOTSPOT

You plan to allow users from the engineering department to enroll their mobile device in mobile device management (MDM).

The device type restrictions are configured as shown in the following table.

| Priority | Name      | Allowed platform | Assigned to |
|----------|-----------|------------------|-------------|
| 1        | iOS       | iOS              | Marketing   |
| 2        | Android   | Android          | Engineering |
| Default  | All users | All platforms    | All users   |

The device limit restrictions are configured as shown in the following table.

| Priority | Name        | Device limit | Assigned to |
|----------|-------------|--------------|-------------|
| 1        | Engineering | 15           | Engineering |
| 2        | Wet Region  | 5            | Engineering |
| Default  | All users   | 10           | All users   |

What is the effective configuration for the members of the Engineering group? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device limit:

|    |
|----|
| ▼  |
| 5  |
| 10 |
| 15 |

Allowed platform:

|               |
|---------------|
| ▼             |
| Android only  |
| iOS only      |
| All platforms |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Device limit:

|    |
|----|
| ▼  |
| 5  |
| 10 |
| 15 |

Allowed platform:

|               |
|---------------|
| ▼             |
| Android only  |
| iOS only      |
| All platforms |

#### NEW QUESTION 9

Your network contains an Active Directory domain named contoso.com. The domain contains 100 Windows 8.1 devices. You plan to deploy a custom Windows 10 Enterprise image to the Windows 8.1 devices. You need to recommend a Windows 10 deployment method. What should you recommend?

- A. a provisioning package
- B. an in place upgrade
- C. wipe and load refresh
- D. Windows Autopilot

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/microsoft-365/enterprise/windHYPERLINK> "https://docs.microsoft.com/en-us/microsoft-365/enterprise/windows10-infrastructure"ows10- infrastructure

#### NEW QUESTION 10

You have Windows 10 Pro devices that are joined to an Active Directory domain. You plan to create a Microsoft 365 tenant and to upgrade the devices to Windows 10 Enterprise. You are evaluating whether to deploy Windows Hello for Business for SSO to Microsoft 365 services. What are two prerequisites of the deployment? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Microsoft Azure Active Directory (Azure AD)
- B. smartcards
- C. Microsoft Intune enrollment
- D. TPM-enabled devices
- E. computers that have biometric hardware features

**Answer:** AC

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-hybrid-aadj-ss0-base>

#### NEW QUESTION 10

Your company has a Microsoft 365 E3 subscription.

All devices run Windows 10 Pro and are joined to Microsoft Azure Active Directory (Azure AD).

You need to change the edition of Windows 10 to Enterprise the next time users sign in to their computer. The solution must minimize downtime for the users. What should you use?

- A. Windows Autopilot
- B. Windows Update
- C. Subscription Activation

D. an in-place upgrade

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

#### NEW QUESTION 14

HOTSPOT

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. Your company implements Windows Information Protection (WIP).

You need to modify which users and applications are affected by WIP.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To modify which users are affected by WIP, configure:

|   |
|---|
| <input type="checkbox"/> The Azure AD app registration                |
| <input type="checkbox"/> The Azure AD device settings                 |
| <input type="checkbox"/> The MAM User scope                           |
| <input type="checkbox"/> The mobile device management (MDM) authority |

To modify which applications are affected by WIP, configure:

|  |
|--|
| <input type="checkbox"/> App configuration policies    |
| <input type="checkbox"/> App protection policies       |
| <input type="checkbox"/> Compliance policies           |
| <input type="checkbox"/> Device configuration profiles |

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protect>[HYPERLINK "https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune-azure"](https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune-azure)

#### NEW QUESTION 18

Your company has a Microsoft 365 subscription.

You need to identify which users performed the following privileged administration tasks:

- Deleted a folder from the second-stage Recycle Bin of Microsoft SharePoint
  - Opened a mailbox of which the user was not the owner
  - Reset a user password
- What should you use?

A. Microsoft Azure Active Directory (Azure AD) audit logs

B. Security & Compliance content search

C. Microsoft Azure Active Directory (Azure AD) sign-ins

D. Security & Compliance audit tag search

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/activity-logs-overview>

#### NEW QUESTION 23

HOTSPOT

Your network contains an Active Directory domain named contoso.com. The domain contains the file servers shown in the following table.

| Name    | IP address   |
|---------|--------------|
| Server1 | 192.168.1.10 |
| Server2 | 192.168.2.10 |

A file named File1.abc is stored on Server1. A file named File2.abc is stored on Server2. Three apps named App1, App2, and App3 all open files that have the .abc file extension.

You implement Windows Information Protection (WIP) by using the following configurations:

Exempt apps: App2

Protected apps: App1

Windows Information Protection mode: Block

Network boundary: IPv4 range of: 192.168.1.1-192.168.1.255

You need to identify the apps from which you can open File1.abc.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements                      | Yes                   | No                    |
|---------------------------------|-----------------------|-----------------------|
| You can open File1.abc in App1. | <input type="radio"/> | <input type="radio"/> |
| You can open File1.abc in App2. | <input type="radio"/> | <input type="radio"/> |
| You can open File1.abc in App3. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune-azure>

**NEW QUESTION 24**

In Microsoft 365, you configure a data loss prevention (DLP) policy named Policy1. Policy1 detects the sharing of United States (US) bank account numbers in email messages and attachments.

Policy1 is configured as shown in the exhibit. (Click the Exhibit tab.)

Use actions to protect content when the conditions are met.

Restrict access or encrypt the content

☒ Block people from sharing and restrict access to shared content  
By default, users are blocked from sending email messages to people. You can choose who has access to shared SharePoint and OneDrive content.  
Block these people from accessing SharePoint and OneDrive content

☐ Everyone. Only the content owner, the last modifier, and the site admin will continue to have access

☒ Only people outside your organization. People inside your organization will continue to have access.

☐ Encrypt email messages (applies only to content in Exchange)

You need to ensure that internal users can email documents that contain US bank account numbers to external users who have an email suffix of contoso.com. What should you configure?

- A. an action  
B. a group  
C. an exception  
D. a condition

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies#how-dlp-policies-work>

**NEW QUESTION 27**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).

You configure pilot co-management.

You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.

You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.

Solution: You add Device1 to an Active Directory group. Does this meet the goal?

- A. Yes  
B. No

**Answer:** A

**Explanation:**

References:

<https://www.sccconfigmgr.com/2017/11/30/how-to-setup-co-management-part-6/>

**NEW QUESTION 31**

Your company has a Microsoft 365 subscription.

You implement Microsoft Azure Information Protection.

You need to automatically protect email messages that contain the word Confidential in the subject line.

What should you create?

- A. a mail flow rule from the Exchange admin center  
B. a message trace from the Security & Compliance admin center  
C. a supervision policy from the Security & Compliance admin center  
D. a sharing policy from the Exchange admin center

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/information-protection/configure-exo-rules>

**NEW QUESTION 36**

You create a new Microsoft 365 subscription and assign Microsoft 365 E3 licenses to 100 users. From the Security & Compliance admin center, you enable auditing.

You are planning the auditing strategy.

Which three activities will be audited by default? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. An administrator creates a new Microsoft SharePoint site collection.
- B. An administrator creates a new mail flow rule.
- C. A user shares a Microsoft SharePoint folder with an external user.
- D. A user delegates permissions to their mailbox.
- E. A user purges messages from their mailbox.

**Answer:** ABC

**Explanation:**

References:

[https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-andcompliance?redirectSourcePath=%25HYPERLINK "https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-andcompliance?redirectSourcePath=%2farticle%2f0d4d0f35-390b-4518-800e-0c7ec95e946c"2farticle%252f0d4d0f35-390b-4518-800e-0c7ec95e946c](https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-andcompliance?redirectSourcePath=%25HYPERLINK%20https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-andcompliance?redirectSourcePath=%2farticle%2f0d4d0f35-390b-4518-800e-0c7ec95e946c%2farticle%252f0d4d0f35-390b-4518-800e-0c7ec95e946c)

**NEW QUESTION 37**

**HOTSPOT**

You purchase a new Microsoft 365 subscription.

You create 100 users who are assigned Microsoft 365 E3 licenses. From the Security & Compliance admin center, you enable auditing.

Six months later, a manager sends you an email message asking the following questions: Question1: Who created a team named Team1 14 days ago?

Question2: Who signed in to the mailbox of User1 30 days ago?

Question3: Who changed the site collection administrators of a site 60 days ago?

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

| Answer Area  |                       |                       |
|--|-----------------------|-----------------------|
| Statements   | Yes                   | No                    |
| An audit log search from the Security & Compliance admin center will provide the answer to question 1. | <input type="radio"/> | <input type="radio"/> |
| An audit log search from the Security & Compliance admin center will provide the answer to question 2. | <input type="radio"/> | <input type="radio"/> |
| An audit log search from the Security & Compliance admin center will provide the answer to question 3. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-and-compliance?redirectSourcePath=%2farticle%2f0d4d0f35-390b-4518-800e-0c7ec95e946c>  
<https://docs.microsoft.com/en-us/office365/securitycompliance/enable-mailbox-auditing>

**NEW QUESTION 41**

From the Security & Compliance admin center, you create a content export as shown in the exhibit. (Click the Exhibit tab.)

SharePoint Content\_Export

Restart report

Download report

Delete

**Status:**  
The export has completed. You can start downloading the results.

**Items included from the search:**  
All items, excluding ones that have unrecognized format, are encrypted, or weren't indexed for other reasons.

**Exchange content format:**  
One PST file for each mailbox.

**De-duplication for Exchange content:**  
Not enabled.

**SharePoint document versions:**  
Included

**Export files in a compressed (zipped) folder:**  
Yes

**The export data was prepared within region:**  
Default region

Close

Feedback

What will be excluded from the export?

- A. a 60-MB DOCX file
- B. a 5-MB MP3 file
- C. a 10-MB XLSX file
- D. a 5-KB RTF file

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/export-a-content-search-report>

**NEW QUESTION 42**

Your company has a Microsoft 365 tenant.

The company sells products online and processes credit card information.

You need to be notified if a file stored in Microsoft SharePoint Online contains credit card information. The file must be removed automatically from its current location until an administrator can review its contents.

What should you use?

- A. a Security & Compliance data loss prevention (DLP) policy
- B. a Microsoft Cloud App Security access policy
- C. a Security & Compliance retention policy
- D. a Microsoft Cloud App Security file policy

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

**NEW QUESTION 47**

Your company has five security information and event management (SIEM) appliances. The traffic logs from each appliance are saved to a file share named Logs.

You need to analyze the traffic logs.

What should you do from Microsoft Cloud App Security?

- A. Click Investigate, and then click Activity log.
- B. Click Control, and then click Policie
- C. Create a file policy.
- D. Click Discover, and then click Create snapshot report.
- E. Click Investigate, and then click Files.

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/investigate-an-activity-in-office-365-cas>

**NEW QUESTION 52**

You have a Microsoft 365 subscription.

You need to be notified if users receive email containing a file that has a virus. What should you do?

- A. From the Exchange admin center, create an in-place eDiscovery & hold.
- B. From the Security & Compliance admin center, create a data governance event.
- C. From the Exchange admin center, create an anti-malware policy.
- D. From the Security & Compliance admin center, create a safe attachments policy.

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/servicedescriptions/exchange-online-service-description/anti-spamand-anti-malware-protection>

**NEW QUESTION 56**

HOTSPOT

You configure an anti-phishing policy as shown in the following exhibit.

| Policy setting    | Policy name<br>Description<br>Applied to  | Managers   |
|-------------------|---|--|
|                   |   | If the email is sent to:<br>IrvinS@M365x289755.OnMicrosoft.com<br>MiriamG@M365x289755.OnMicrosoft.com<br>Except if the email is sent to member of:<br>test1ww@M365x289755.OnMicrosoft.com  |
| Impersonation     | Users to protect<br>Protect all domains I own<br>Protect specific domains<br>Action > User impersonation<br>Action > Domain impersonation<br>Safety tips > User impersonation<br>Safety tips > Domain impersonation<br>Safety tips > Unusual characters<br>Mailbox intelligence | On - 3 User(s) specified<br>On<br>On - 2 Domain(s) specified<br>Move message to the recipients' Junk Email folders<br>Delete the message before it's delivered<br>Off<br>Off<br>Off<br>Off |
| Spoof             | Enable antispoofting protection<br>Action   | On<br>Quarantine the message   |
| Advanced settings | Advanced phishing thresholds  | 3 - More Aggressive  |

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

If a message is identified as a domain impersonation, [answer choice].

the message is delivered to the Inbox folder  
the message is moved to the Deleted Items folder  
the messages are moved to the Junk Email folder

To reduce the likelihood of the impersonation policy generating false positives, configure [answer choice].

Advanced phishing thresholds  
Domain impersonation  
Enable antispoofting protection  
Mailbox intelligence

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-anti-phishing-policies#learn-about-HYPERLINK> "https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-anti-phishing-policies#learn-about-atp-anti-phishing-policy-options"atp-anti-phishing-policy-options

**NEW QUESTION 60**

HOTSPOT

Your network contains an Active Directory domain named contoso.com that uses Microsoft System Center Configuration Manager (Current Branch).

You have Windows 10 and Windows 8.1 devices.

You need to ensure that you can analyze the upgrade readiness of all the Windows 8.1 devices and analyze the update compliance of all the Windows 10 devices. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

First action to perform:

|   |
|---|
|   |
| Enroll the devices in Microsoft Intune.                     |
| Configure device compliance in Microsoft Intune.            |
| Create a Microsoft Azure Log Analytics workspace.           |
| Add an alias (CNAME) record to the DNS zone of contoso.com. |

Second action to perform:

|  |
|--|
|  |
| Configure all the devices to have a commercial ID.                   |
| Configure software inventory in Configuration Manager.               |
| Configure all the devices to join the Windows Insider Program.       |
| Configure and restart the Windows Update service on all the devices. |

- A. Mastered
- B. Not Mastered

**Answer:** A

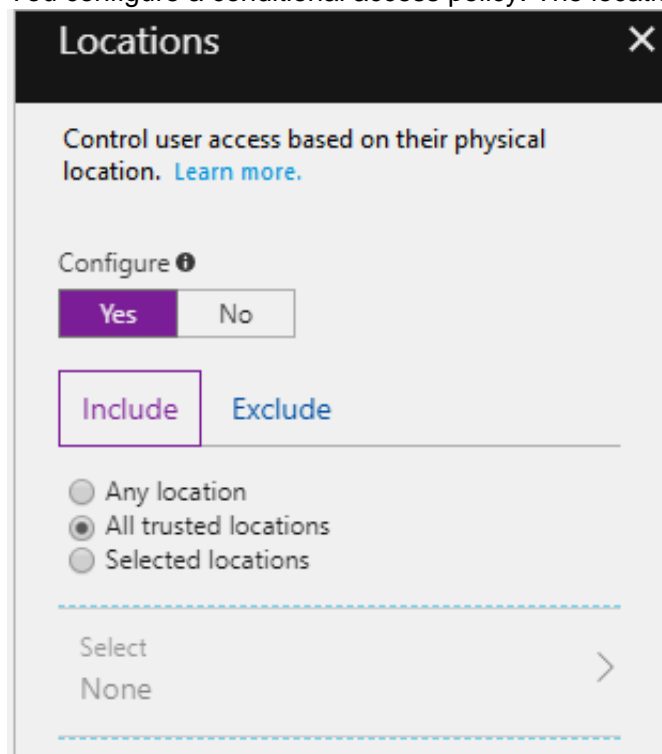

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/upgrade-readiness-get-started> <https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-get-started>

**NEW QUESTION 62**

You configure a conditional access policy. The locations settings are configured as shown in the Locations exhibit. (Click the Locations tab.)

The users and groups settings are configured as shown in the Users and Groups exhibit. (Click Users and Groups tab.)

Members of the Security reader group report that they cannot sign in to Microsoft Active Directory (Azure AD) on their device while they are in the office. You need to ensure that the members of the Security reader group can sign in in to Azure AD on their device while they are in the office. The solution must use the principle of least privilege. What should you do?

- A. From the conditional access policy, configure the device state.
- B. From the Azure Active Directory admin center, create a custom control.
- C. From the Intune admin center, create a device compliance policy.
- D. From the Azure Active Directory admin center, create a named location.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>

**NEW QUESTION 64**

Your company uses on-premises Windows Server File Classification Infrastructure (FCI). Some documents on the on-premises file servers are classified as Confidential.

You migrate the files from the on-premises file servers to Microsoft SharePoint Online.

You need to ensure that you can implement data loss prevention (DLP) policies for the uploaded file based on the Confidential classification.

What should you do first?

- A. From the SharePoint admin center, configure hybrid search.
- B. From the SharePoint admin center, create a managed property.
- C. From the Security & Compliance Center PowerShell, run the New-DataClassification cmdlet.
- D. From the Security & Compliance Center PowerShell, run the New-DlpComplianceRule cmdlet.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powershell/module/exchange/policy-and-compliance-dlp/newdataclassification?view=exchange-ps>

**NEW QUESTION 65**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

From the Security & Compliance admin center, you create a role group named US eDiscovery Managers by copying the eDiscovery Manager role group.

You need to ensure that the users in the new role group can only perform content searches of mailbox content for users in the United States.

Solution: From Windows PowerShell, you run the New-ComplianceSecurityFilter cmdlet with the appropriate parameters.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/permissions-filtering-for-content-search>

<https://docs.microsoft.com/en-us/powershell/module/exchange/policy-and-compliance-content-search/newcompliancesecurityfilter?view=exchange-ps>

**NEW QUESTION 67**

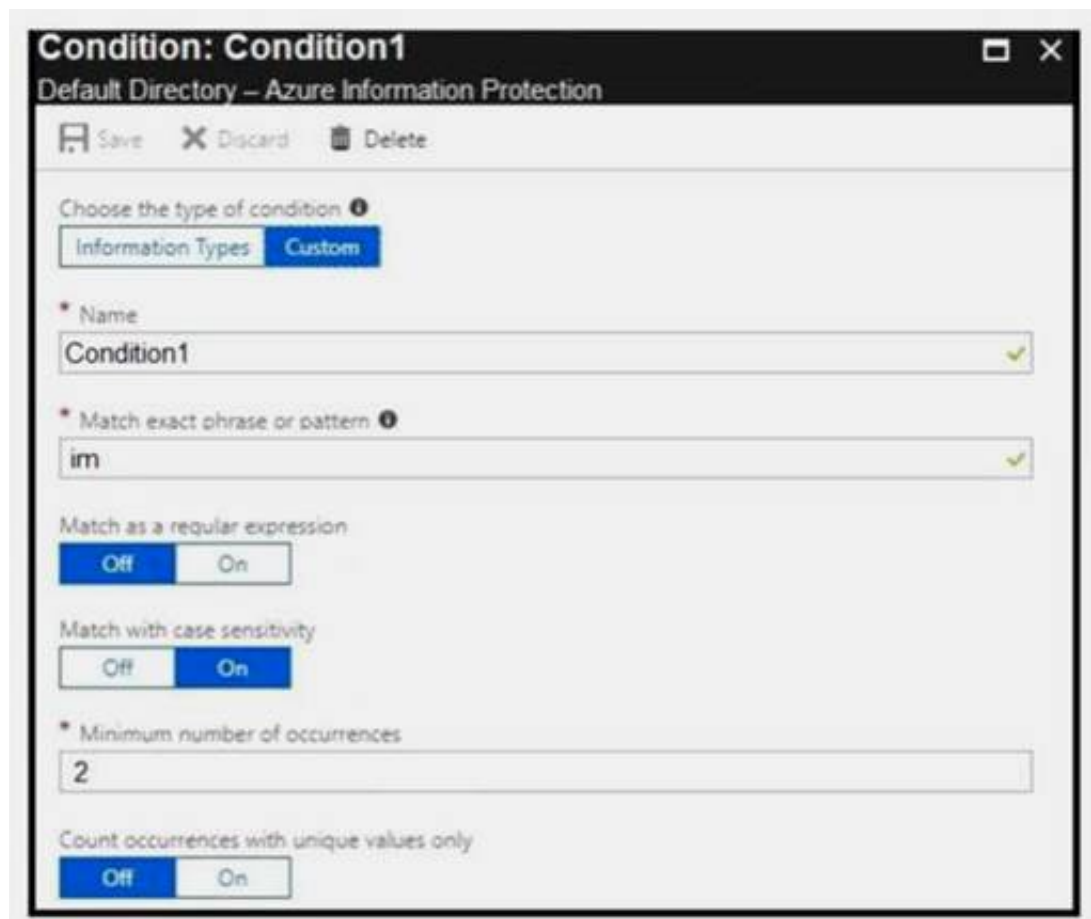

HOTSPOT

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.

A user named User1 has files on a Windows 10 device as shown in the following table.

| Name       | Text in file   |
|------------|--|
| File1.docx | Importing and exporting is easy. For import, you need a source, and for export, you need a destination.                              |
| File2.docx | You must declare what you want to import. Dangerous items cannot be imported. If you want to import valuables, you must pay customs. |
| File3.docx | IM are initials for instant messaging. You can use Microsoft Skype for IM, but there are also other IM programs.                     |

In Azure Information Protection, you create a label named Label1 that is configured to apply automatically. Label1 is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

| Statements                    | Yes                   | No                    |
|-------------------------------|-----------------------|-----------------------|
| Label1 applies to File1.docx. | <input type="radio"/> | <input type="radio"/> |
| Label1 applies to File2.docx. | <input type="radio"/> | <input type="radio"/> |
| Label1 applies to File3.docx. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:  
<https://docs.microsoft.com/en-us/azure/information-protection/configure-policy-classification>

NEW QUESTION 71

HOTSPOT

You have a Microsoft 365 subscription that uses a default domain named contoso.com. Three files were created on February 1, 2019, as shown in the following table.

| Name  | Stored in                       |
|-------|---------------------------------|
| File1 | Microsoft OneDrive              |
| File2 | A Microsoft SharePoint library  |
| File3 | Microsoft Exchange Online email |

On March 1, 2019, you create two retention labels named Label1 and Label2.  
The settings for Lable1 are configured as shown in the Label1 exhibit. (Click the Label1 tab.)

Label settings

Retention ⓘ

On

When this label is applied to content...

●

Retain the content ⓘ

For this long...

2

years

What do you want to do after this time?

Delete the content automatically. ⓘ

●

Trigger a disposition review. ⓘ

Nothing. Leave the content as is. ⓘ

Don't retain the content. Just delete it if it's older than ⓘ

Notify these people when there are items ready to review

User1@sk180818.onmicrosoft.com

1

years

Retain or delete the content based on

when it was created ⓘ

Label classification

Use label to classify content as a "Record" ⓘ

The settings for Lable2 are configured as shown in the Label2 exhibit. (Click the Label2 tab.)

Label settings

NEW QUESTION 73

You have a Microsoft 365 subscription.

You plan to enable Microsoft Azure Information Protection.

Your Partner of IT Exam

visit - <https://www.exambible.com>

You need to ensure that only the members of a group named PilotUsers can protect content. What should you do?

- A. Run the Add-AadrmRoleBasedAdministrator cmdlet.
- B. Create an Azure Information Protection policy.
- C. Configure the protection activation status for Azure Information Protection.
- D. Run the Set-AadrmOnboardingControlPolicy cmdlet.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/information-protection/activate-service>

**NEW QUESTION 76**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

From the Security & Compliance admin center, you create a role group named US eDiscovery Managers by copying the eDiscovery Manager role group.

You need to ensure that the users in the new role group can only perform content searches of mailbox content for users in the United States.

Solution: From Windows PowerShell, you run the New-AzureRmRoleAssignment cmdlet with the appropriate parameters.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powershell/module/azurerms/resources/new-azurermroleassignment?view=azurermps-6.13.0>

**NEW QUESTION 80**

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You sign for Microsoft Store for Business.

The tenant contains the users shown in the following table.

| Name  | Microsoft Store for Business role | Azure AD role                   |
|-------|-----------------------------------|---------------------------------|
| User1 | Purchaser                         | None                            |
| User2 | Basic Purchaser                   | None                            |
| User3 | None                              | Application administrator       |
| User4 | None                              | Cloud application administrator |
| User5 | None                              | None                            |

Microsoft Store for Business has the following Shopping behavior settings: Allow users to shop is set to On

Make everyone a Basic Purchaser is set to Off

You need to identify which users can install apps from the Microsoft for Business private store.

Which users should you identify?

- A. User1, User2, User3, User4, and User5
- B. User1 only
- C. User1 and User2 only
- D. User3 and User4 only
- E. User1, User2, User3, and User4 only

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/microsoft-store/acquire-apps-microsoft-store-for-business>

**NEW QUESTION 85**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result these questions will not appear In the review screen.

You have a Microsoft Azure Active directory (Azure AD) tenant named contoso.com.

You create an Azure Advanced Threat Protection (ATP) workspace named Workspace1. The tenet contains the users shown in the following table .

| Name  | Member of group                     | Azure AD role          |
|-------|-------------------------------------|------------------------|
| User1 | Azure ATP Workspace1 Administrators | None                   |
| User2 | Azure ATP Workspace1 Users          | None                   |
| User3 | None                                | Security administrator |
| User4 | Azure ATP Workspace1 Users          | Global administrator   |

You need to modify the configuration of the Azure ATP sensors.

Solution: You instruct User 3 to modify the Azure ATP sensor configuration- Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 87

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result these questions will not appear In the review screen.

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You create an Azure Advanced Threat Protection (ATP) workspace named Workspace1. The tenant contains users shown in the following table.

| Name  | Member of group                     | Azure AD role          |
|-------|-------------------------------------|------------------------|
| User1 | Azure ATP Workspace1 Administrators | None                   |
| User2 | Azure ATP Workspace1 Users          | None                   |
| User3 | None                                | Security administrator |
| User4 | Azure ATP Workspace1 Users          | Global administrator   |

You need to modify the configuration of the Azure ATP sensors.

Solution: You instruct User1 to modify the Azure ATP sensor configuration. Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 92

HOTSPOT

Your company has a Microsoft 365 subscription.

You need to configure Microsoft 365 to meet the following requirements:

- Malware found in email attachments must be quarantined for 20 days.
- The email address of senders to your company must be verified.

Which two options should you configure in the Security & Compliance admin center? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

ATP anti-phishing

Protect users from phishing attacks (like impersonation and spoofing), and use safety tips to warn users about potentially harmful messages.

ATP safe attachments

Protect your organization from malicious content in email attachments and files in SharePoint, OneDrive, and Teams.

ATP Safe Links

Protect your users from opening and sharing malicious links in email messages and Office 2016 desktop apps.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

ATP anti-phishing

Protect users from phishing attacks (like impersonation and spoofing), and use safety tips to warn users about potentially harmful messages.

ATP safe attachments

Protect your organization from malicious content in email attachments and files in SharePoint, OneDrive, and Teams.

ATP Safe Links

Protect your users from opening and sharing malicious links in email messages and Office 2016 desktop apps.

NEW QUESTION 97

HOTSPOT

You need to meet the Intune requirements for the Windows 10 devices.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Settings to configure in Azure AD:

Device settings

Mobility (MDM and MAM)

Organizational relationships

User settings

Settings to configure in Intune:

Device compliance

Device configuration

Device enrollment

Mobile Device Management Authority

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/intune/windows-enroll>

**NEW QUESTION 100**

HOTSPOT

As of March, how long will the computers in each office remain supported by Microsoft? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows a hotspot question interface. It contains two dropdown menus. The first dropdown is labeled 'Seattle:' and the second is labeled 'New York:'. Both dropdowns have a downward arrow icon in the top right corner. The options for both dropdowns are: 6 months, 18 months, 24 months, 30 months, and 5 years.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 106**

You need to create the Microsoft Store for Business. Which user can create the store?

- A. User2
- B. User3
- C. User4
- D. User5

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business>

Case Study: 2

A. Datum Case Study: Overview

Existing Environment

This is a case study Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next

section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question. Current Infrastructure

A. Datum recently purchased a Microsoft 365 subscription. All user files are migrated to Microsoft 365.

All mailboxes are hosted in Microsoft 365. The users in each office have email suffixes that include the country of the user, for example, user1@us.adatum.com or user2#uk.ad3tum.com.

Each office has a security information and event management (SIEM) appliance. The appliances come from three different vendors.

A. Datum uses and processes Personally Identifiable Information (PII).

Problem Statements Requirements

A. Datum entered into litigation. The legal department must place a hold on all the documents of a user named User1 that are in Microsoft 365. Business Goals

A. Datum wants to be fully compliant with all the relevant data privacy laws in the regions where it operates.

A. Datum wants to minimize the cost of hardware and software whenever possible.

Technical Requirements

A. Datum identifies the following technical requirements:

- Centrally perform log analysis for all offices.
- Aggregate all data from the SIEM appliances to a central cloud repository for later analysis.
- Ensure that a SharePoint administrator can identify who accessed a specific file stored in a document library.
- Provide the users in the finance department with access to Service assurance information in Microsoft Office 365.
- Ensure that documents and email messages containing the PII data of European Union (EU) citizens are preserved for 10 years.
- If a user attempts to download 1,000 or more files from Microsoft SharePoint Online within 30 minutes, notify a security administrator and suspend the user's user account.
- A security administrator requires a report that shows which Microsoft 365 users signed in. Based on the report, the security administrator will create a policy to require multi-factor authentication when a sign in is high risk.
- Ensure that the users in the New York office can only send email messages that contain sensitive U.S. PII data to other New York office users. Email messages must be monitored to ensure compliance. Auditors in the New York office must have access to reports that show the sent and received email messages containing sensitive U.S. PII data.

#### NEW QUESTION 110

You need to meet the technical requirement for large-volume document retrieval. What should you create?

- A. a data loss prevention (DLP) policy from the Security & Compliance admin center
- B. an alert policy from the Security & Compliance admin center
- C. a file policy from Microsoft Cloud App Security
- D. an activity policy from Microsoft Cloud App Security

**Answer:** D

#### Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/activity-policies-and-alerts>

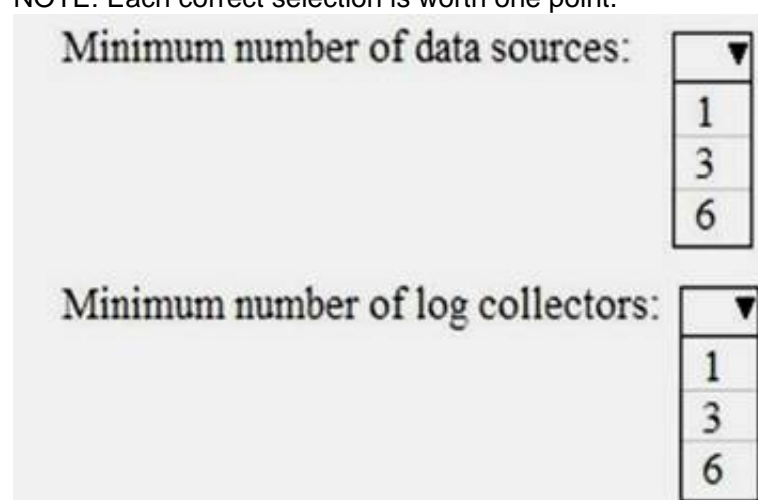

#### NEW QUESTION 111

HOTSPOT

You need to meet the technical requirement for log analysis.

What is the minimum number of data sources and log collectors you should create from Microsoft Cloud App Security? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Minimum number of data sources:

Minimum number of log collectors:

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

References:

<https://docs.microsoft.com/en-us/cloud-app-security/discovery-docker>

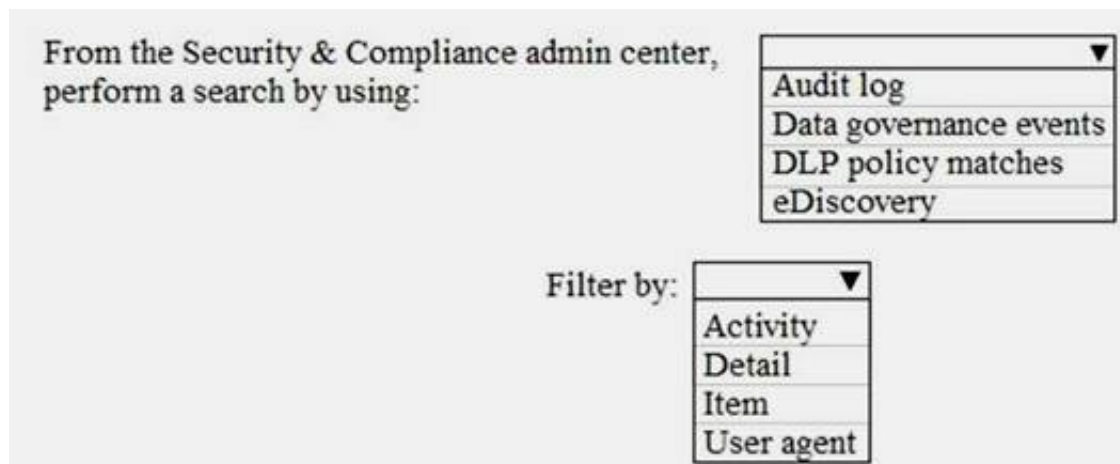

#### NEW QUESTION 115

HOTSPOT

You need to meet the technical requirement for the SharePoint administrator. What should you do?

To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-and-compliance#step-3-filter-the-search-results>
