Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

NEW QUESTION 231

- (Exam Topic 5)

You have 1,000 user accounts that are each licensed for Microsoft 365. Each user account has a Microsoft Exchange Online mailbox.

Ten of the user accounts are configured as service accounts for applications. The applications send event notifications to the mailboxes of the service accounts by using SMTP. The developers of each application have delegated access to the mailbox of their respective application.

You need to ensure that all the event notifications sent by the applications are retained in the service account mailboxes so that new developers can review older notifications. The developers must be able to view only the notifications for their respective application.

What should you do?

- A. Replace the service account mailboxes with a single user mailbox that contains a folder for each application.
- B. Replace the service account mailboxes with a single user mailbox that contains Power Automate rules.
- C. Convert the service account mailboxes into shared mailboxes.
- D. Convert the service account mailboxes into mail-enabled users.

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use

as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You need to reduce the likelihood that malicious links contained in emails received by mailboxes in @lab.CloudCredential(1).TenantName are opened.

To complete this task, sign in to the Exchange admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

> Navigate to the Exchange Admin Center, and then choose the Advanced Threats section of the EAC.

> Click the Safe Links tab to examine all existing Safe Links policies:

> After navigating to the Safe Links policy page, choose the Add button (+) to create a new policy. The New Safe Links Policy window opens.

- In the resulting window we'll be presented with the options available for creating our new Safe Links policy.

> In Name enter an appropriate, unique, name that describes this policy. In the description enter some text that provides a little more detail for anyone trying to make sense of the options selected here.

> Next we'll choose the action to take for URLs. We can leave this Off, if for example we are creating a policy to exclude a group of users that would otherwise be affected by another Safe Links policy.

> The checkbox Do not track user click can be selected if you do not wish to use the reporting functionality available at a later date. This is a key feature when understanding which users clicked a link that was later found to be a threat, so be careful about choosing to disable user click tracking.

> Our final check box provides options for click-through is a link is found to be dangerous. In some circumstances you may trust users to click-through links, or they may request the ability to do so. In most circumstances you will not want a user to click-through the malicious link.

> Some URLs, such as those for internal addresses or even trusted partners, may not require re-writing. Enter these URLs here.

> Finally, we will select the scope for the rule under the Applied to

section.

➤ Using similar conditions to transport rules we can select who this rule applies to including:

- Individual recipients
- Recipient domains
- Members of distribution groups

➤ The same conditions can be used for exceptions. When you have configured your rule, choose Save.

After saving the new Safe Links rule it will be shown in the EAC list. Just like Transport Rules, you can use the Enabled column to enable or disable the Safe Links policy.
