NEW QUESTION 9

- (Exam Topic 2)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
 After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
 You are a Dynamics 365 for Finance and Operations system administrator. You have a test environment that is used by several people at any given time. You create a new data entity in your development and migrate the code to the test environment. In the test environment, you are unable to find the data entity in the list.
 You need to locate the data entity.
 Solution: Restart the Application Object Server (AOS) of the test environment. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 10

- (Exam Topic 2)

You are a Dynamics 365 for Finance and Operations system administrator.

A company named Contoso Ltd. is creating a new legal entity that will be similar to an existing legal entity. Team members copy key entities to the new legal entity using the Data management workspace. They indicate that there were already-configured pieces of data unique to the new legal entity before they ran the Copy into legal entity process.

The data import/export framework settings are listed in the table below:

| Setting | Current value |
|-------------------|---------------|
| Ignore error | Yes |
| Create error file | Yes |
| Remove duplicates | Yes |

You need to determine what happened to the already-configured pieces of data. What happened to the data?

- A. Any source legal entity data that already exists in the destination legal entity will be updated.
- B. Any destination legal entity data will be deleted, and the source data will be inserted.
- C. Any source legal entity data that already exists in the destination legal entity will be ignored.
- D. Any source legal entity data that already exists in the destination legal entity will be displayed as an error for user action in the Data management workspace.
