

Exam Questions MD-100

Windows 10

<https://www.2passeasy.com/dumps/MD-100/>

NEW QUESTION 1

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a user account named User5 on Client2. The solution must meet the following requirements:

- Prevent User5 from changing the password of the account.
- Ensure that User5 can perform backups.
- Use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, press the Win + X keys on your keyboard. Then, click or tap the Computer Management option from the menu.
- Expand the Local Users and Groups from the left side of the window, and select Users.
- Right-click somewhere on the blank space found in the middle section of the window, and click or tap on New User. This opens the New User window, where you can enter all the details about the new user account.
- Type the user name and, optionally, its full name and description.
- Type the password to be used for that user and confirm it.
- Select the User cannot change password check box.
- Click Create and Windows immediately creates the user account. When you are done creating user accounts, click Close in the New User window.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Back up files and directories policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

NEW QUESTION 2

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution. You use System image manager (Windows SIM) to create an answer file. You use Windows Deployment Service (WDS) to add an install image. You start each computer by using PXE, and then install the image.

Does this meet the goal?

- A. Yes
- B. No

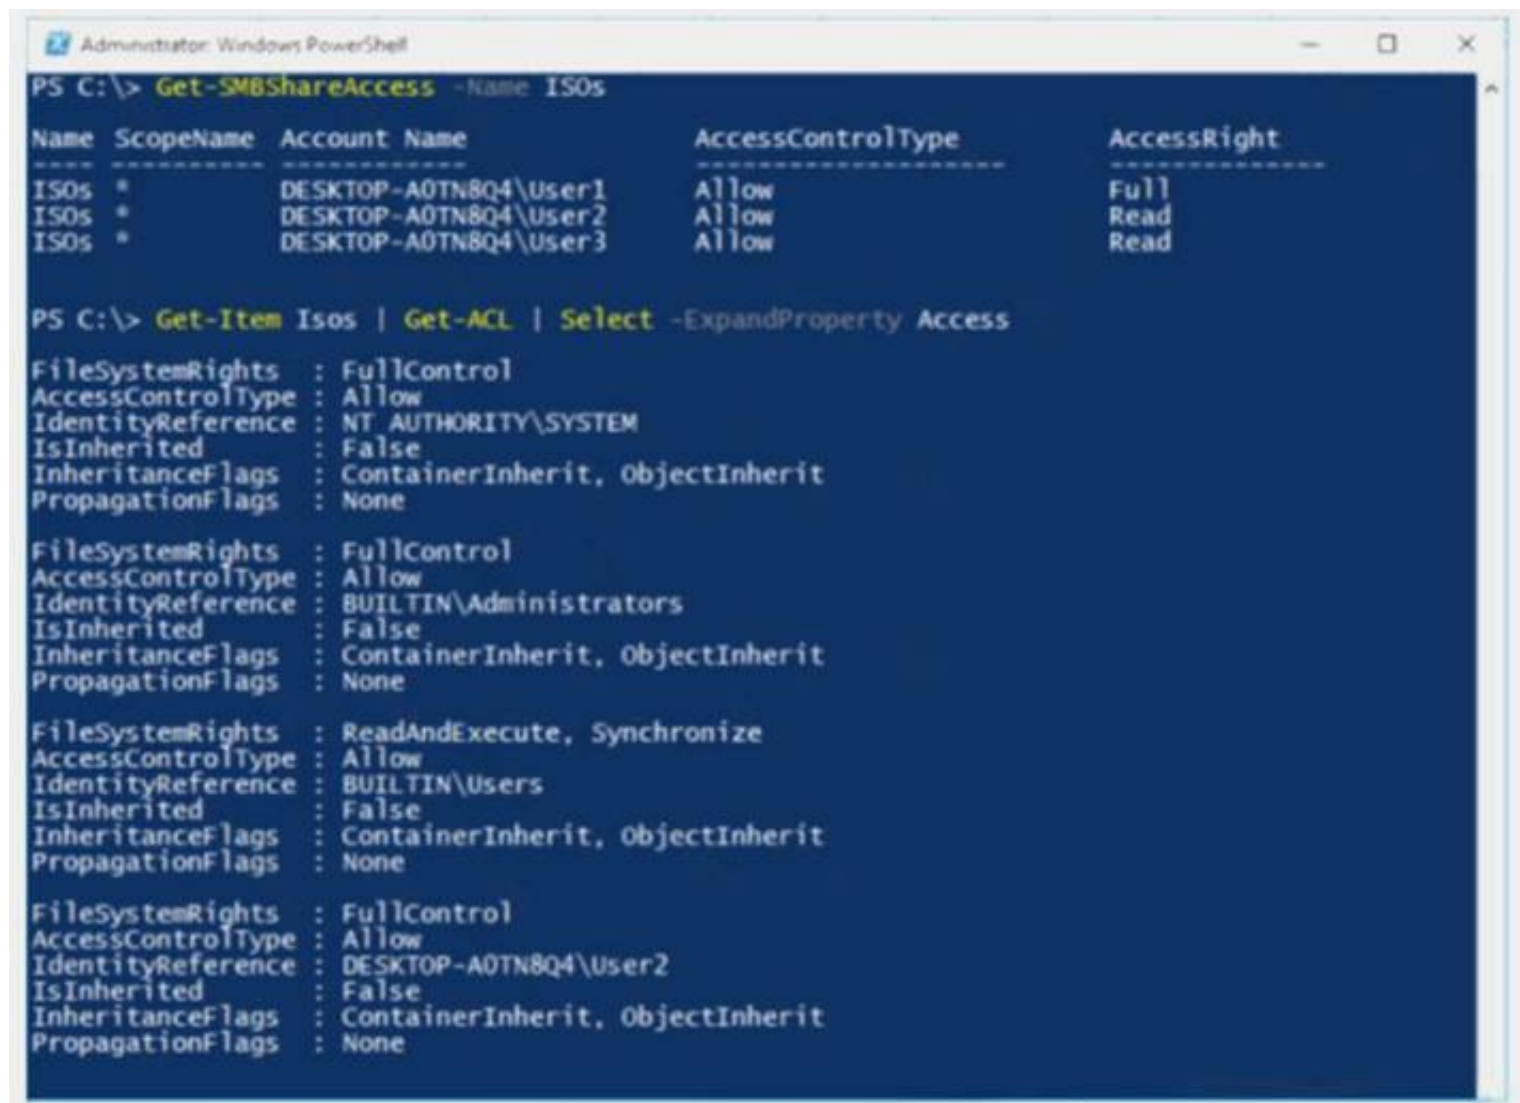

Answer: A

NEW QUESTION 3

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains a folder named C:\ISOs that is shared in ISOs.

You run several commands on the computer as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

[answer choice] can delete files in the ISOs share.

None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

[answer choice] can read the files in the ISOs share.

None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

[answer choice] can delete files in the ISOs share.

▼

None of the users

Only User1

Only User2

Only User3

Only User1 and User2

Only User1 and User3

Only User2 and User3

User1, User2, and User3

[answer choice] can read the files in the ISOs share.

▼

None of the users

Only User1

Only User2

Only User3

Only User1 and User2

Only User1 and User3

Only User2 and User3

User1, User2, and User3

NEW QUESTION 4

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User2 is a domain user, not an administrator. Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 5

- (Exam Topic 4)

You have the source files shown in the following table.

Source	Location
Custom Windows 10 image	D:\Folder1\Image1.wim
Windows 10 language pack DVD	E:\

You mount an image from Image1.wim to a folder named C:\Mount. You need to add the French language pack to the mounted image.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

▼

Add-WindowsCapability

Add-WindowsFeature

Dism.exe

Setup.exe

/Image:

▼

"C:\Mount"

"C:\Mount\Windows"

"C:\Windows"

"D:\Folder1\Image1.wim"

/Add-Package /PackagePath: "E:\x64\langpacks\Microsoft-Windows-Client-Language-Pack_x64_fr-fr.cab"

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Note: The referenced document has the mount directory as C:\Mount\Windows. In this question, the mount directory is C:\Mount.

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-language-packs-to-windows>

NEW QUESTION 6

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is joined to an Active Directory domain named adatum.com. The domain contains two groups named Group1 and Group2.

Computer1 contains a folder named C:\Folder1 that has the file permissions shown in the following table.

Group	Permission
Administrators	Full control
Group1	Read

You need to share C:\Folder1. The solution must ensure that the members of Group2 can access all the files in the share.

What should you do?

- A. From File Explorer, use Network File and Folder Sharin
 B. Assign the Read permission to Group2.
 C. From File Explorer, use Advanced Sharin
 D. Assign the Read share permission to Group2.
 E. From Control Panel, use Advanced sharing setting
 F. Configure file and printer sharing for the network profile of the domain.
 G. At a command prompt, run the nee share Share=C:\Folderl /granc:adacum\group2, read command.

Answer: D

Explanation:

Reference:

<https://techgenix.com/net-share-command-30/>

NEW QUESTION 7

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to configure User Account Control (UAC) to meet the following requirements:

- Ensure that the local Administrator account is always be prompted to approve elevation of privilege.
- Enforce public key infrastructure (PKI) signature checks for any interactive apps that request elevation of privilege.

Which two policy settings should you modify? To answer, select the settings in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Policy	Security Setting
<input type="checkbox"/> User Account Control: Virtualize file and registry write failures to per-user locations	Enabled
<input type="checkbox"/> User Account Control: Switch to the secure desktop when prompting for elevation	Enabled
<input type="checkbox"/> User Account Control: Run all administrators in Admin Approval Mode	Enabled
<input type="checkbox"/> User Account Control: Only elevate UIAccess applications that are installed in secure locations	Enabled
<input checked="" type="checkbox"/> User Account Control: Only elevate executables that are signed and validated	Disabled
<input type="checkbox"/> User Account Control: Detect application installations and prompt for elevation	Enabled
<input type="checkbox"/> User Account Control: Behavior of the elevation prompt for standard users	Prompt for credentials
<input type="checkbox"/> User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode	Prompt for consent for non-V
<input type="checkbox"/> User Account Control: Allow UIAccess applications to prompt for elevation without using the secure desktop	Disabled
<input checked="" type="checkbox"/> User Account Control: Admin Approval Mode for the Built-in Administrator account	Not Defined

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Policy	Security Setting
User Account Control: Virtualize file and registry write failures to per-user locations	Enabled
User Account Control: Switch to the secure desktop when prompting for elevation	Enabled
User Account Control: Run all administrators in Admin Approval Mode	Enabled
User Account Control: Only elevate UIAccess applications that are installed in secure locations	Enabled
User Account Control: Only elevate executables that are signed and validated	Disabled
User Account Control: Detect application installations and prompt for elevation	Enabled
User Account Control: Behavior of the elevation prompt for standard users	Prompt for credentials
User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode	Prompt for consent for non-V
User Account Control: Allow UIAccess applications to prompt for elevation without using the secure desktop	Disabled
User Account Control: Admin Approval Mode for the Built-in Administrator account	Not Defined

NEW QUESTION 8

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.

You need to create a Start menu layout file. The solution must meet the following requirements:

- Contain an app group named Contoso Apps that has several pinned items. Contoso Apps must be locked from user modification.
- Ensure that users can customize other parts of the Start screen.
- Minimize administrative effort.

Which four actions should you perform in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Actions	Answer Area
Deploy the start layout.	
Modify the StartLayoutCollection XML element.	
Modify the DefaultLayoutOverride XML element.	
Export the start layout to a file.	
On a reference computer, customize the Start menu.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. On a reference computer, customize the Start menu
- * 2. Export the start layout to a file
- * 3. Modify the Defaultlayoutoverride XML element
- * 4. Deploy the start layout

References:
<https://docs.microsoft.com/en-us/windows/configuration/customize-and-export-start-layout>

NEW QUESTION 9

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to identify the total number of events that have Event ID 63 in the Application event log. You must type the number of identified events into C:\Folder1\FileA.txt.

To complete this task, sign in to the required computer or computers and perform the required action.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > Open Event Viewer.
- > Click the log that you want to filter, then click Filter Current Log from the Action pane or right-click menu. This will open the Filter Current Log dialog box.
- > You can specify a time period if you know approximately when the relevant events occurred. You can specify the event level, choosing between Critical, Warning, Verbose, Error and Information. If you select none of these, all event levels will be returned. You can't modify which event log is being checked as filters apply only to a single log.
- > You can choose the event sources which have generated the log entries, and search for key words, users, or computers. You can also search using specific event IDs.

Reference:

<https://www.manageengine.com/products/active-directory-audit/kb/how-to/how-to-search-the-event-viewer.htm>

NEW QUESTION 10

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 11. You perform the following actions on Client1:

- Enable Hyper-V.
- Create a virtual machine that runs Windows 11 Pro.

You need to connect to VM1 by using enhanced session mode. What should you do first?

- A. Enable Remote Assistance on Client1.
- B. Enable Remote Assistance on VM1.
- C. Enable Remote Desktop on VM1.
- D. Enable Remote Desktop on Client1.

Answer: B

NEW QUESTION 10

- (Exam Topic 4)

You have a computer named Computer 1 that runs Windows 10.

You turn on System Protection and create a restore point named Point1. You perform the following changes:

➤ Add four files named File1.txt, File2.dll, File3.sys, and File4.exe to the desktop. Run a configuration script that adds the following four registry keys:

- Key1 to HKEY_CURRENT_USER
- Key2 to HKEY_CLASSES_ROOT
- Key3 to HKEY_LOCAL_MACHINE\SYSTEM
- Key4 to HKEY_CURRENT_CONFIG

You restore Point1.

Which files and registry keys are removed? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Removed files:

<input type="checkbox"/> File2.dll only <input type="checkbox"/> File2.dll and File3.sys only <input type="checkbox"/> File2.dll, File3.sys, and File4.exe <input type="checkbox"/> File1.txt, File2.dll, File3.sys, and File4.exe

Removed keys:

<input type="checkbox"/> Key1 only <input type="checkbox"/> Key1 and Key2 only <input type="checkbox"/> Key2, Key3, and Key4 only <input type="checkbox"/> Key1, Key2, Key3, and Key4
--

- A. Mastered
- B. Not Mastered

Answer: A

You need to enable the Prohibit User from manually redirecting Profile Folders Group Policy setting only for the administrative users of Client3. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

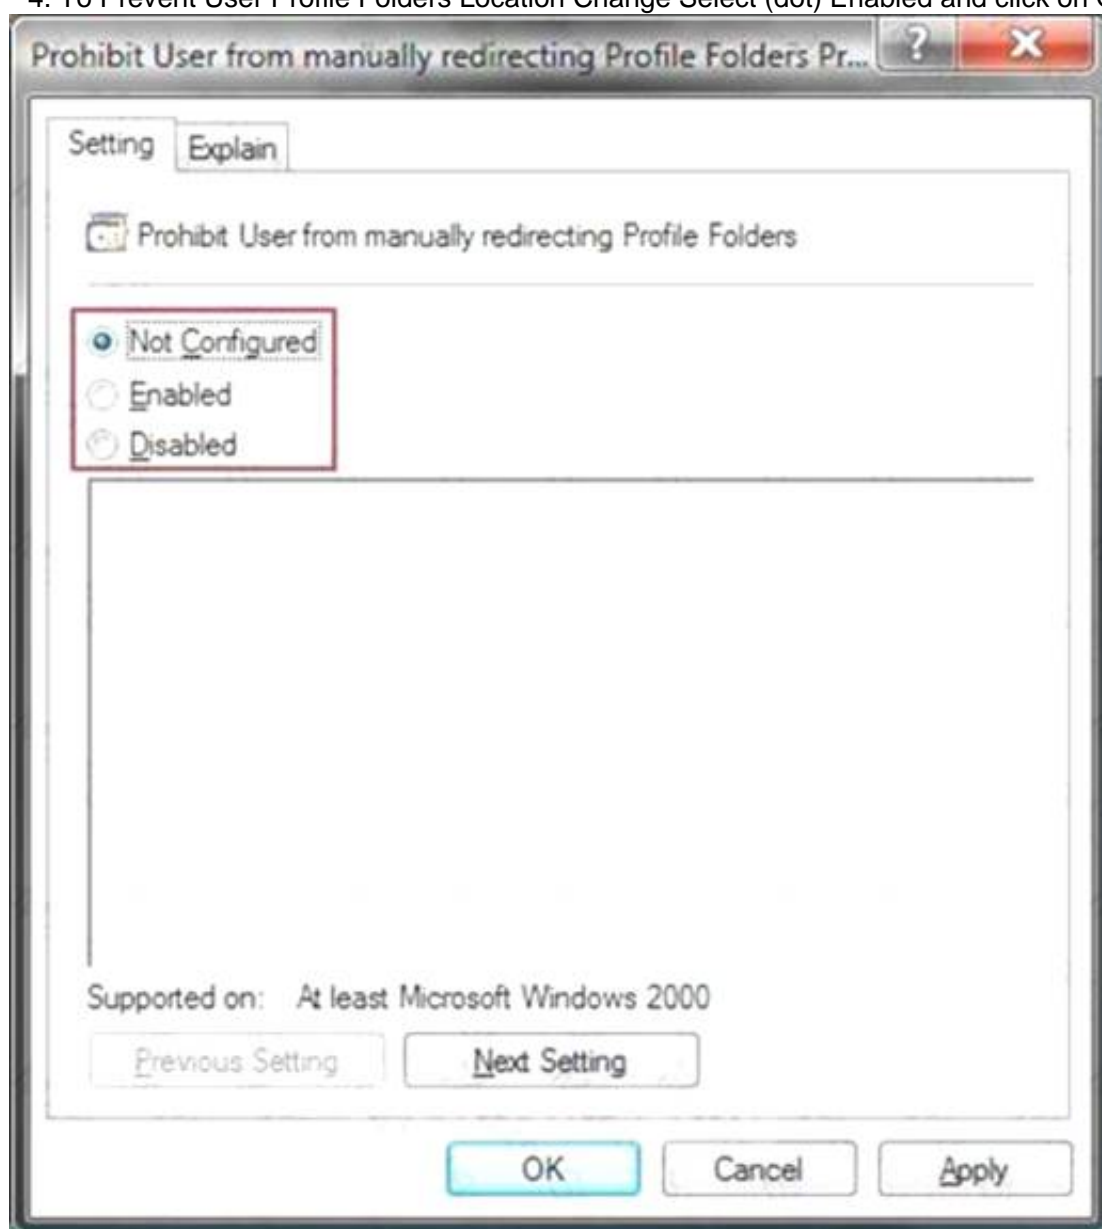

Answer: A

Explanation:

- * 1. Open the Administrator Group Local Group Policy Editor.
- * 2. In the left pane, click on User Configuration, Administrative Templates, and Desktop.

- * 3. In the right pane, right click on Prohibit User from Manually redirecting Profile Folders and click on Properties.
- * 4. To Prevent User Profile Folders Location Change Select (dot) Enabled and click on OK.

- * 5. Close the Local Group Policy Editor window. References:
<https://www.vistax64.com/threads/user-profile-folders-prevent-or-allow-location-change.180719/>

NEW QUESTION 16

- (Exam Topic 4)

Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers. You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add a task sequence step that adds a provisioning package.
- B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
- C. Add a custom command to the Unattend.xml file.
- D. Add a configuration setting to Windows Deployment Services (WDS).
- E. Add a task sequence step that runs dism.exe.

Answer: AE

Explanation:

References:

Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based

while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows image that will be installed, and which product key to apply.

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

NEW QUESTION 17

- (Exam Topic 4)

Your company has a wireless access point that uses WPA2-Enterprise. You need to configure a computer to connect to the wireless access point. What should you do first?

- A. Create a provisioning package in Windows Configuration Designer.
- B. Request a passphrase.
- C. Request and install a certificate.
- D. Create a Connection Manager Administration Kit (CMAK) package.

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-za/help/17137/windows-setting-up-wireless-network>

NEW QUESTION 21

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You need to provide a user with the ability to remotely create and modify shares on the computers. The solution must use the principle of least privilege.

To which group should you add the user?

- A. Power Users
- B. Remote Management Users
- C. Administrators
- D. Network Configuration Operators

Answer: C

NEW QUESTION 25

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other computers. You install a quality update that conflicts with a customer device driver.

You need to remove the update from Computer1.

Solution: From an elevated command prompt, you run the vmic qfe delete command. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 27

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You attempt to start Computer1 but you receive the following error message: Bootmgr is missing.

You need to be able to start Computer1. What should you do?

- A. Start the computer in recovery mode and run the boocrec /rebuildbcd command.
- B. Start the computer in recovery mode and run the dislcparc /repair command.
- C. Start the computer in recovery mode and run the bcdboot /s command.
- D. Start the computer in recovery mode and run the booccfg /debug command.

Answer: A

Explanation:

Tasks Computers

You need to ensure that Windows feature updates on Client1 are deferred for 15 days when the updates become generally available. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Select the Start button, then select Settings > Update & Security > Windows Update.
- Under Update settings, select Advanced options.
- From the boxes under Choose when updates are installed, select the number of days you would like to defer a feature update or a quality update. Reference:
<https://support.microsoft.com/en-us/help/4026834/windows-10-defer-feature-updates>

NEW QUESTION 32

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. Computer1 has a cellular connection and a Wi-Fi connection. You want to prevent Computer1 from using the cellular connection unless a you manually connects to the cellular network. What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Select the Network icon.
 icon on the lower right corner of the taskbar, and then select the cellular network
 - Clear the Let Windows manage this connection check box.
- Reference:
<https://support.microsoft.com/en-za/help/10739/windows-10-cellular-settings>

NEW QUESTION 35

- (Exam Topic 4)

You have a computer that runs Windows 10 and has BitLocker Drive Encryption (BitLocker) enabled on all volumes. You start the computer from Windows Recovery Environment (WinRE). You need to read the data on the system drive. What should you do?

- A. Run cipher.exe and specify the /rekey parameter
- B. Run cipher.exe and specify the /adduser parameter
- C. Run manage-bde.exe and specify the -off parameter
- D. Run manage-bde.exe and specify the -unlock parameter

Answer: D

Explanation:

<https://www.repairwin.com/how-to-disable-bitlocker-in-windows-recovery-environment-winre/>

NEW QUESTION 40

- (Exam Topic 4)
You have 100 computers that run Windows 10. The computers are joined to an Azure AD tenant and enrolled in Microsoft Intune. The computers are in remote locations and connected to public networks.
You need to recommend a solution for help desk administrators that meets the following requirements:

- > Connect remotely to a user's computer to perform troubleshooting.
- > Connect to a user's computer without disrupting the desktop of the computer.
- > Remotely view services, performance counters, registry settings, and event logs. Which tool should you include in the recommendation?

- A. Quick Assist
- B. Intune
- C. Remote Assistance
- D. Windows Admin Center

Answer: C

NEW QUESTION 45

- (Exam Topic 4)
You have a Microsoft Deployment Toolkit (MDT) deployment share named Share1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?

Answer Area

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

NEW QUESTION 50

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the folders shown in the following table.

Name	Volume	File system	Permission
Folder1	C	NTFS	Full control to Everyone
Folder2	C	NTFS	Full control to Everyone
Folder3	D	NTFS	Full control to Everyone

On Computer1, you create the users shown in the following table.

Name	Member of
User1	Users
User2	Backup Operators, Users
User3	Cryptographic Operators, Users
User4	Administrators, Users

User1 encrypts a file named File1.txt that is in a folder named C:\Folder1.

What is the effect of the configuration? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Users who can move File1.txt to C:\Folder2:

User1 only

User1 and User2 only

User1, User2, and User3 only

User1, User2, User3, and User4

Users who can move File1.txt to D:\Folder3:

User1 only

User1 and User2 only

User1, User2, and User3 only

User1, User2, User3, and User4

- A. Mastered
B. Not Mastered

Answer: A

NEW QUESTION 53

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

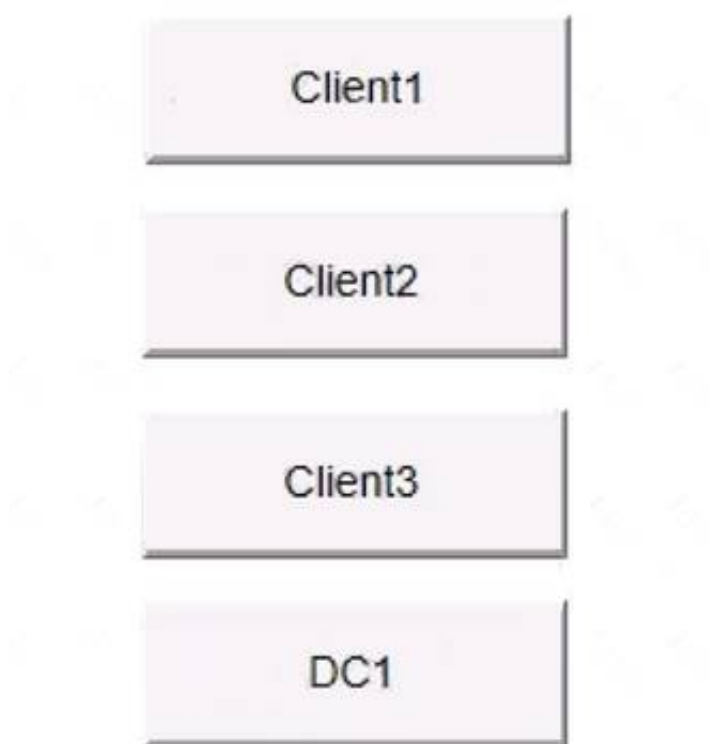

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named File1.txt in a folder named Folder1 on the C drive of Client2. You need to ensure that a user named User1 can read the contents of File1.txt. The solution must prevent User1 from modifying the file.

To complete this task, sign in to Client2 and perform the required action.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > After creating File1.txt in Folder1, right-click the file and select Properties.
- > Access the Security tab, click Disable inheritance
- > Click on Remove all inherited permissions from this object, click Apply, and select Yes in the dialog box that appears.
- > Click OK
- > Back on the Security tab select Edit to change permissions.
- > Click Add, then enter User1 in the Enter the object names to select section.
- > Click Check Names, and then click OK.
- > Check only the Read box in the Allow column.
- > Click apply, Ok, and OK

NEW QUESTION 57

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

Name	Description	Located in
OU1	Organizational unit (OU)	Contoso.com
OU2	Organizational unit (OU)	Contoso.com
User1	User account	OU1
Computer1	Computer that runs Windows 11	OU2

BitLocker Drive Encryption (BitLocker) recovery passwords are stored in Active Directory. User1 enables the following on Computer 1:

- BitLocker on drive C
- BitLocker on a removable drive named E

Which object stores the BitLocker recovery passwords for each drive? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Active Directory Object

Computer1

OU1

OU2

TPM devices

User1

Answer Area

Drive C:

Active Directory Object

Drive E:

Active Directory Object

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Active Directory Object

OU1

OU2

TPM devices

User1

Answer Area

Drive C:

OU1

Drive E:

TPM devices

NEW QUESTION 62

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: From the local computer policy, you configure the Filter Options settings for the user policy. At a command prompt, you run the gpupdate.exe/Target:user command.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 64

- (Exam Topic 4)

You have 20 computers that run Windows 10.

You configure all the computers to forward all the events from all the logs to a computer named Computer1 that runs Windows 10.

When you sign in to Computer1, you cannot see any security events from other computers. You can see all the other forwarded events from the other computers.

You need to ensure that the security events are forwarded to Computer1. What should you do?

- A. On each computer, run `wecutil ac /q`.
- B. On each computer, add the NETWORK SERVICE account to the Event Log Readers group.
- C. On each computer, run `winrm qc -q`.
- D. On Computer1, add the account of Computer1 to the Event Log Readers group.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/use-windows-event-forwarding-to-assistin>

NEW QUESTION 69

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Update & Security in the Settings app, you turn on Pause Updates. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

NEW QUESTION 73

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

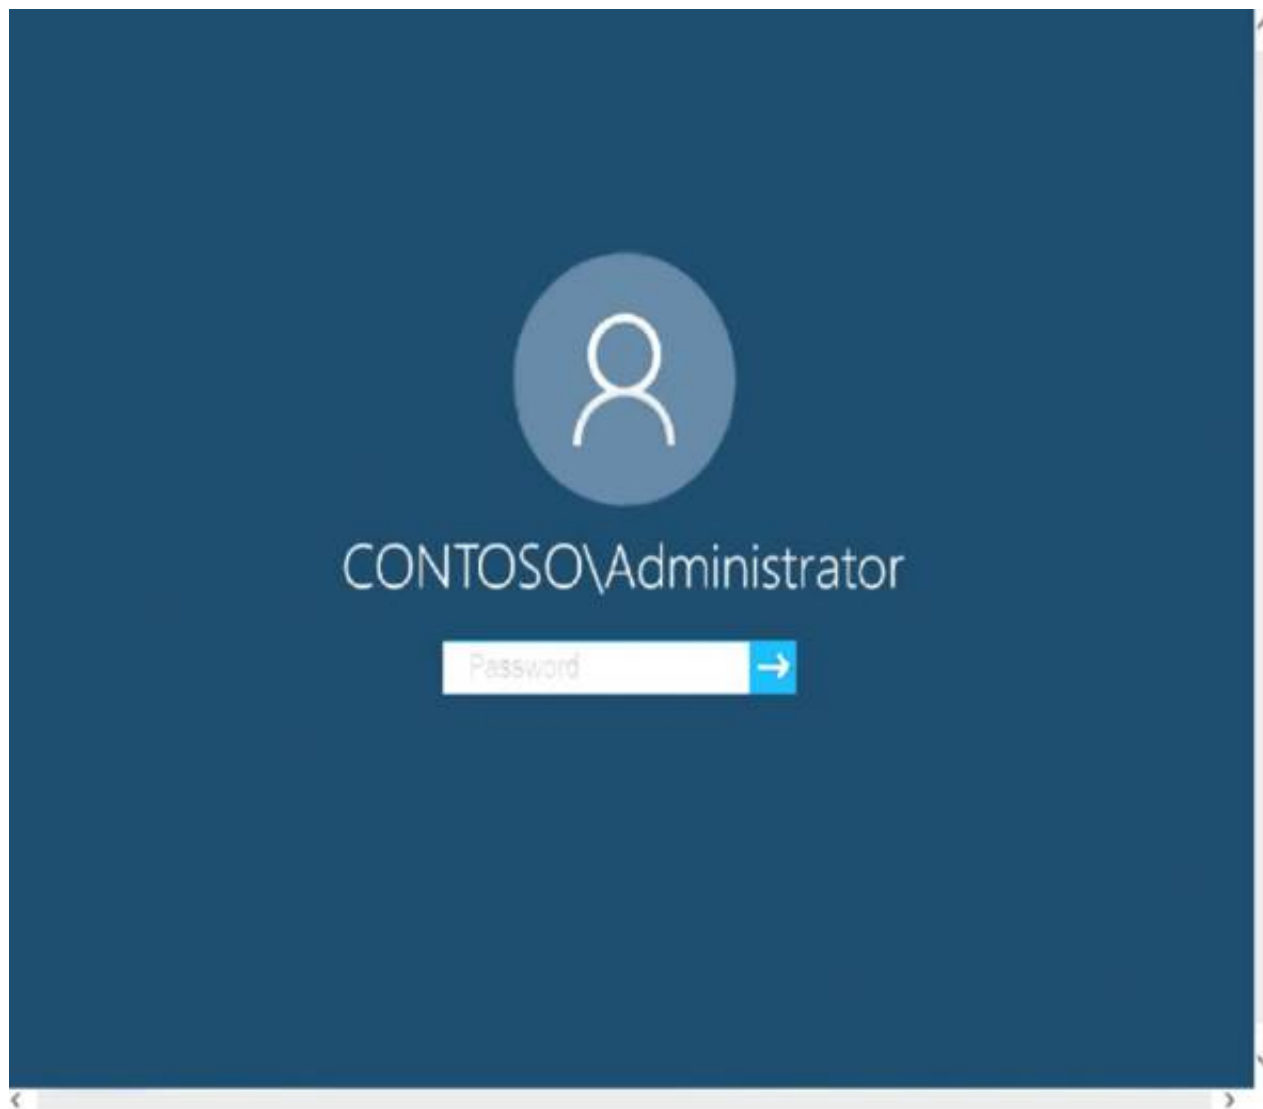

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

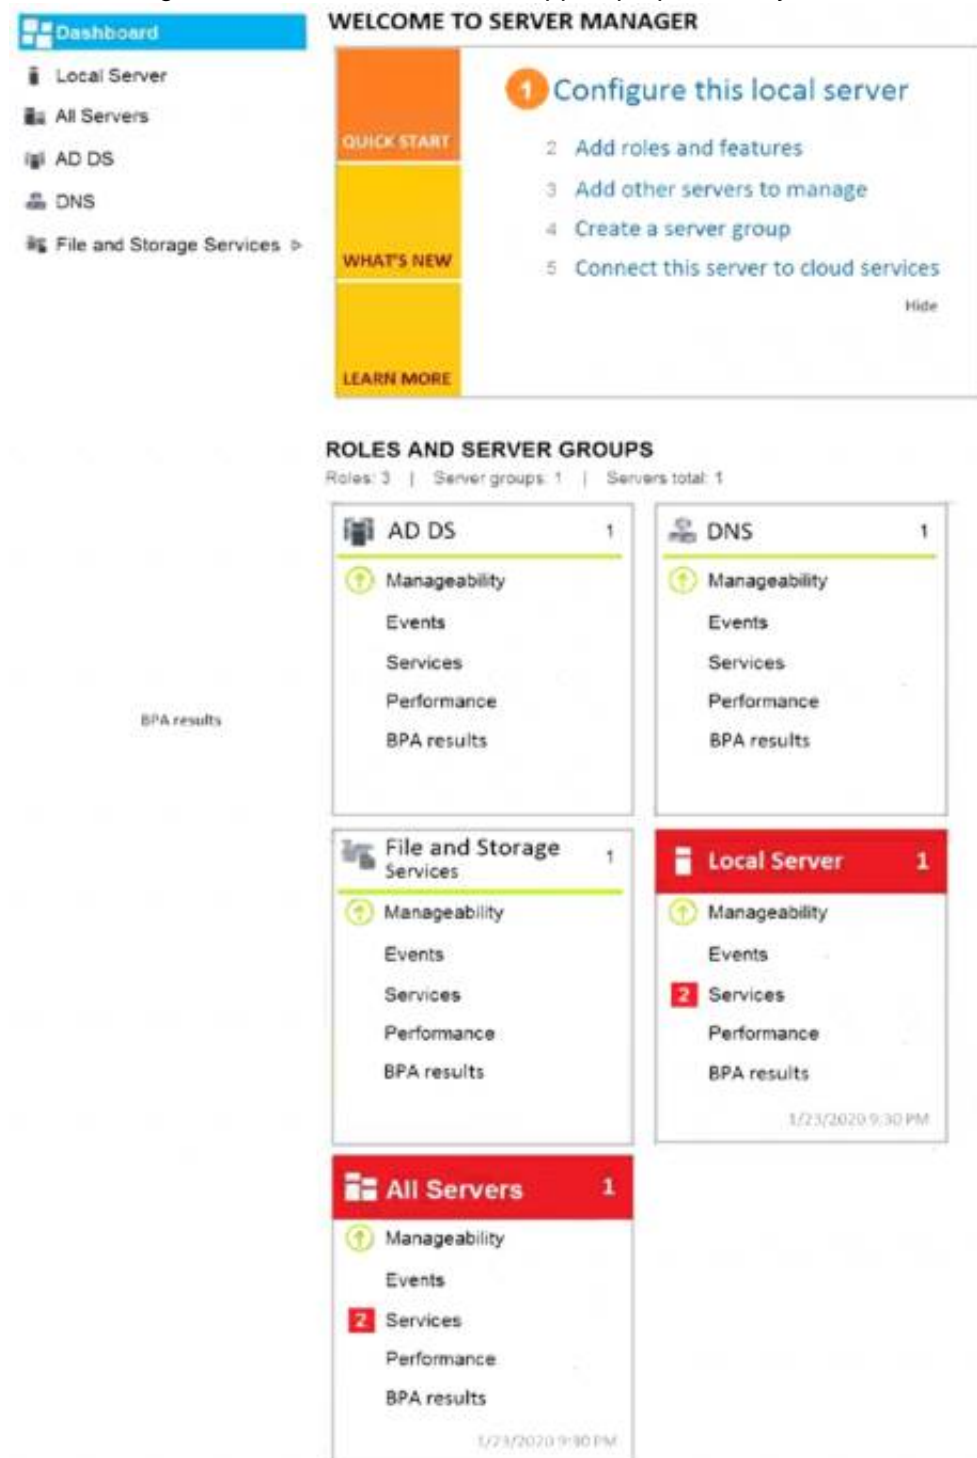

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

Tasks Computers

You need to prevent user names and passwords from being filled in on forms automatically when a user browses to websites from Client2. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > Open the Local Group Policy Editor.
- > In the left pane of Local Group Policy Editor, navigate to Computer Configuration\Administrative Templates\Windows Components\Microsoft Edge
- > In the right pane of Microsoft Edge in Local Group Policy Editor, double click/tap on the Configure Autofill policy to edit it.
- > Select Disabled, click/tap on OK.
- > In the right pane of Microsoft Edge in Local Group Policy Editor, double click/tap on the
- > Configure Password Manager policy to edit it.
- > Select Disabled, click/tap on OK.
- > You can now close the Local Group Policy Editor.

Reference:

<https://docs.microsoft.com/en-us/microsoft-edge/deploy/available-policies> <https://www.tenforums.com/tutorials/115069-enable-disable-autofill-microsoft-edge-windows-10-a.html>

NEW QUESTION 77

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of domain group
User1	Authenticated Users
User2	Device Managers Authenticated Users
User3	Help Desk Authenticated Users

The Authenticated Users group has the Add workstations to domain user right in the Default Domain Controllers Policy.

The Device Managers and Help Desk groups are granted the Create Computer objects permission for the Computers container of the domain.

You have 15 workgroup computers that run Windows 10. Each computer contains a local user account named LocalAdmin1 that is a member of the following groups:

- > Administrators
- > Device Owners
- > Authenticated Users

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can join all the computers to the domain.	<input type="radio"/>	<input type="radio"/>
User2 can join a maximum of 10 computers to the domain.	<input type="radio"/>	<input type="radio"/>
User3 can join all the computers to the domain.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: No

User1 is a member of the Authenticated Users group which has the Add workstations to domain user right. However, with the Add workstations to domain user right, you are restricted to joining a maximum of 10 computers to the domain.

Box 2: No

User2 is a member of the Authenticated Users group which has the Add workstations to domain user right.

User2 is also a member of the Device Managers group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User2 can join more than 10 computers to the domain.

Box 3: Yes

User3 is a member of the Authenticated Users group which has the Add workstations to domain user right. User3 is also a member of the Help Desk group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User3 can join all the computers to the domain.

NEW QUESTION 80

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and is joined to an Active Directory domain named adatum.com.

A user named Admin1 signs in to Computer1 and runs the whoami command as shown in the following exhibit.

```

Command Prompt
c:\Users\admin1>whoami /user /groups /priv

USER INFORMATION
-----
User Name      SID
=====
adatum\admin1  S-1-5-21-4534338-1127018997-2609994386-4602

GROUP INFORMATION
-----
Group Name      Type      SI
=====
Everyone        well-known group  S-
BUILTIN\Users   Alias       S-
BUILTIN\Administrators Alias       S-

ADATUM\Domain Admins Group       S-
Authentication authority asserted identity well-known group  S-
ADATUM\Denied RODC Password Replication Group Alias       S-
Mandatory Label\Medium Mandatory Level Label       S-

PRIVELEGES INFORMATION
-----
Privilege Name      Description
=====
SeShutdownPrivilege Shut down the system
SeChangeNotifyPrivilege Bypass traverse checking
SeUndockPrivilege Remove computer from docking station
SeIncreaseWorkingSetPrivilege Increase a process working set
SeTimeZonePrivilege Change the time zone

C:\Users\admin1>
  
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

On Computer1, if Admin1 attempts to open Device Manager, [answer choice].

	▼
Admin1 will be prompted for credentials	
Admin1 will be prompted for consent	
Admin1 will be denied access	
Device Manager will open without a prompt	

On Computer1, if Admin1 attempts to run the command prompt as an administrator, [answer choice].

	▼
Admin1 will be prompted for credentials	
Admin1 will be prompted for consent	
Admin1 will be denied access	
the command prompt will open without a prompt	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

On Computer1, if Admin1 attempts to open Device Manager, [answer choice].

	▼
Admin1 will be prompted for credentials	
Admin1 will be prompted for consent	
Admin1 will be denied access	
Device Manager will open without a prompt	

On Computer1, if Admin1 attempts to run the command prompt as an administrator, [answer choice].

	▼
Admin1 will be prompted for credentials	
Admin1 will be prompted for consent	
Admin1 will be denied access	
the command prompt will open without a prompt	

NEW QUESTION 85

- (Exam Topic 4)

You have a computer that runs Windows 10 Pro. The computer contains the users shown in the following table.

Name	Description
User1	Member of the local Administrators group
User2	Standard user
User3	Standard user

You need to use a local Group Policy Object (GPO) to configure one group of settings for all the members of the local Administrators group and another group of settings for all non-administrators.

What should you do?

- A. Use the runas command to open Gpedit.msc as each user.
B. Run mmc as User2 and add the Group Policy Object Editor snap-in twice.
C. Open Gpedit.msc as User1 and add two Administrative Templates.
D. Run mmc as User1 and add the Security Templates snap-in twice.

Answer: B

Explanation:

Add the Group Policy Object Editor snap-in twice. Select Browse > Users > Administrators when you add the first snap-in and select Browse > Users > Non-Administrators when you add the second snap-in.

NEW QUESTION 90

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

From Event Viewer on Computer1, you have a task named Action1 that is attached to the following event: ➤ Log: System

➤ Source: Kernel-General

➤ Event ID: 16

You need to modify the settings of Action1. What should you use?

- A. the Settings app

- B. Task Scheduler
- C. Event Viewer
- D. System Configuration

Answer: C

Explanation:

An Event Viewer task is created and modified in Event Viewer. References:
<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

NEW QUESTION 93

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Accounts in the Settings app, you turn off Sync settings. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 95

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant. All users have been issued with laptop computers as well as desktop computers that run Windows 10 Enterprise. All users have Microsoft 365 E3 licenses.

A user named Mia Hamm informs you that she must perform a BitLocker recovery on her laptop but she does not have her BitLocker recovery key.

You need to ensure that Mia Hamm can perform a BitLocker recovery on her laptop. What should you do?

- A. Instruct Mia Hamm to log on to her desktop computer and run the repair-bde.exe command.
- B. Instruct Mia Hamm to use the BitLocker Recovery Password Viewer to view the computer object of the laptop.
- C. Instruct Mia Hamm to log on to her desktop computer and go to <https://account.activedirectory.windowsazure.com> and view the user account profile.
- D. Instruct Mia Hamm to run the Enable-BitLocker cmdlet on her laptop.

Answer: C

Explanation:

The BitLocker recovery key is stored in Azure Active Directory. Reference:
<https://celedonpartners.com/blog/storing-recovering-bitlocker-keys-azure-active-directory/>

NEW QUESTION 97

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 11 Home. You need to ensure that you can create virtual machines on Client1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Restart the operating system

Enter a Windows 11 Pro product key

Enter a Windows 11 Enterprise product key

From Programs and Features, enable the Hyper-V Windows feature

From the Activation settings in the Settings app, select **Change product key**

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

NEW QUESTION 102

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. You need to view the settings to Computer1 by Group Policy objects (GPOs) in the domain and local Group Policies. Which command should you run?

- A. gpresult
- B. secedit
- C. gpupdate
- D. gpfixup

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/administration/windows-commands/gpresult>

NEW QUESTION 105

- (Exam Topic 4)

Your network contains the segments shown in the following table.

Name	Domain controller connectivity	Internet connectivity
Segment1	Yes	Yes
Segment2	No	Yes

You have computers that run Windows 10 and are configured as shown in the following table.

Name	Shared folder	Share permission	Active Directory joined	Connected to
Computer1	Share1	Everyone: Full control	Yes	Segment1
Computer2	Share2	Everyone: Full control	Yes	Segment2
Computer3	Share3	Everyone: Full control	No	Segment1

Windows Defender Firewall has the File and Printer Sharing allowed apps rule shown in the following table.

Computer	Domain	Private	Public
Computer1	Allowed	Not allowed	Not allowed
Computer2	Allowed	Allowed	Not allowed
Computer3	<i>Not applicable</i>	Allowed	Allowed

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can access Share1 from Computer3.	<input type="radio"/>	<input type="radio"/>
You can access Share2 from Computer3.	<input type="radio"/>	<input type="radio"/>
You can access Share3 from Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
You can access Share1 from Computer3.	<input type="radio"/>	<input checked="" type="radio"/>
You can access Share2 from Computer3.	<input type="radio"/>	<input checked="" type="radio"/>
You can access Share3 from Computer1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 107

- (Exam Topic 4)

You have a computer that runs Windows 10. You need to configure a picture password. What should you do? D18912E1457D5D1DDCBD40AB3BF70D5D

- A. From Control Panel, configure the User Accounts settings.
- B. From the Settings app, configure the Sign-in options.
- C. From the Local Group Policy Editor, configure the Account Policies settings.
- D. From Windows PowerShell, run the Set-LocalUser cmdlet and specify the InputObject parameter.

Answer: B

NEW QUESTION 109

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users
User2	Users, Administrators

Computer1 contains an image file named C:\Folder\Image.jpg.

Computer1 has the Local Computer\Administrators Policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Not configured
Desktop Wallpaper	Disabled

Computer1 has the Local Computer\Non-Administrators Policy shown in the following table.

Setting	State	Path
Remove Recycle Bin icon from desktop	Enabled	Not applicable
Desktop Wallpaper	Enabled	C:\Folder\Image.jpg

Computer1 has the local computer policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Disabled
Desktop Wallpaper	Not configured

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can change the desktop wallpaper.	<input type="radio"/>	<input type="radio"/>
User2 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>
User1 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text Description automatically generated

NEW QUESTION 112

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant.

Some users signs in to that computer by using Windows hello for Business. A user User1 purchases a new computer and joins the computer to Azure AD.

User1 attempts to configure the sign-in options and receives the error message shown in the exhibit. (Click the Exhibit tab.)

Sign-in options

*Some settings are hidden or managed by your organization.

Sign in to Windows, apps and services by teaching Windows to recognize you.

Windows Hello isn't available on this device.

[See how it works and find compatible devices.](#)

You open device Manager and confirmed that all the hardware works correctly.

You need to ensure that user1 can use Windows Hello for Business facial recognition to sign in to the computer.

What should you do first.

- A. Purchase an infrared (IR) camera.
- B. Install a virtual TPM driver.
- C. Enable UEFI Secure Boot.
- D. Upgrade the computer to windows 10 Enterprise.

Answer: D

NEW QUESTION 115

- (Exam Topic 4)

You plan to deploy Windows 10 Enterprise to company-owned devices. You capture a Windows 10 image file from a reference device.

You need to generate catalog files and answer files for the deployment.

What should you use for each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Catalog file:	<div><div></div><div>Deployment Image Servicing and Management (DISM)</div><div>Windows Configuration Designer</div><div>Windows Deployment Services (WDS)</div><div>Windows System Image Manager (Windows SIM)</div></div>
Answer file:	<div><div></div><div>Deployment Image Servicing and Management (DISM)</div><div>Windows Configuration Designer</div><div>Windows Deployment Services (WDS)</div><div>Windows System Image Manager (Windows SIM)</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/wsim/open-a-windows-image-or-catalo>

NEW QUESTION 118

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains the folders shown in the following table.

Name	Path
FolderA	C:\FolderA
FolderB	C:\FolderA\FolderB
FolderC	C:\FolderA\FolderB\FolderC

You create the groups shown in the following table.

Name	Members
Group1	User1, User2
Group2	User2, User3
Group3	User1, User3

On FolderA, you remove permission inheritance. To each folder, you assign the NTFS permissions shown in the following table.

Folder	Permission
FolderA	Modify to Group1 Read to Group2
FolderB	Write to Group2
FolderC	Read to Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can read and write all files in FolderC.	<input type="radio"/>	<input type="radio"/>
User2 can delete all files in FolderB.	<input type="radio"/>	<input type="radio"/>
User3 can delete all files in FolderC.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

YES YES NO

NEW QUESTION 123

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From a command prompt, you run set.exe PATHEXT=d:\scripts. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 127

- (Exam Topic 4)

You need to enable BitLocker Drive Encryption (BitLocker) on a computer named Computer1 that runs Windows 10. Computer1 has the following configurations:

- Contains only one 200-GB NTFS volume named C:\
- Contains 50 GB of unallocated disk space
- Is the member of a workgroup
- Has TPM enabled

What should you do first?

- A. Create a VHD.
- B. Disable TPM.
- C. Create an additional volume.
- D. Join Computer1 to an Azure Active Directory (Azure AD) tenant.

Answer: C

Explanation:

Two partitions are required to run BitLocker because pre-startup authentication and system integrity verification must occur on a separate partition from the encrypted operating system drive. This configuration helps protect the operating system and the information in the encrypted drive.

Reference:

https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-overview-and-req

NEW QUESTION 129

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to set the minimum password length to 12 characters. What should you use?

- A. Local Group Policy Editor
- B. User Accounts in Control Panel
- C. System Protection in System Properties
- D. Sign-in options in the Settings app

Answer: A

NEW QUESTION 134

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1. You need to log any users who take ownership of the files in Folder1.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Modify the folder attributes of Folder1.
- B. Modify the Advanced Security Settings for Folder1.
- C. From a Group Policy object (GPO), configure the Audit Sensitive Privilege Use setting.
- D. From a Group Policy object (GPO), configure the Audit File System setting.
- E. Install the Remote Server Administration Tools (RSAT).

Answer: BC

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/auditing/audit-sensitive-privilege-use>

NEW QUESTION 138

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has a folder named C:\Folder1.

You need to meet the following requirements:

- Log users that access C:\Folder1.
- Log users that modify and delete files in C:\Folder1. Which two actions should you perform?

- A. From the properties of C:\Folder1, configure the Auditing settings.
- B. From the properties of C:\Folder1, select the Encryption contents to secure data option.
- C. From the Audit Policy in the local Group Policy, configure Audit directory service access.
- D. From the Audit Policy in the local Group Policy, you configure Audit object access.
- E. From the Audit Policy in the local Group Policy, you configure Audit system events.

Answer: AD

Explanation:

Files and folders are objects and are audited through object access. Reference:

https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html

NEW QUESTION 141

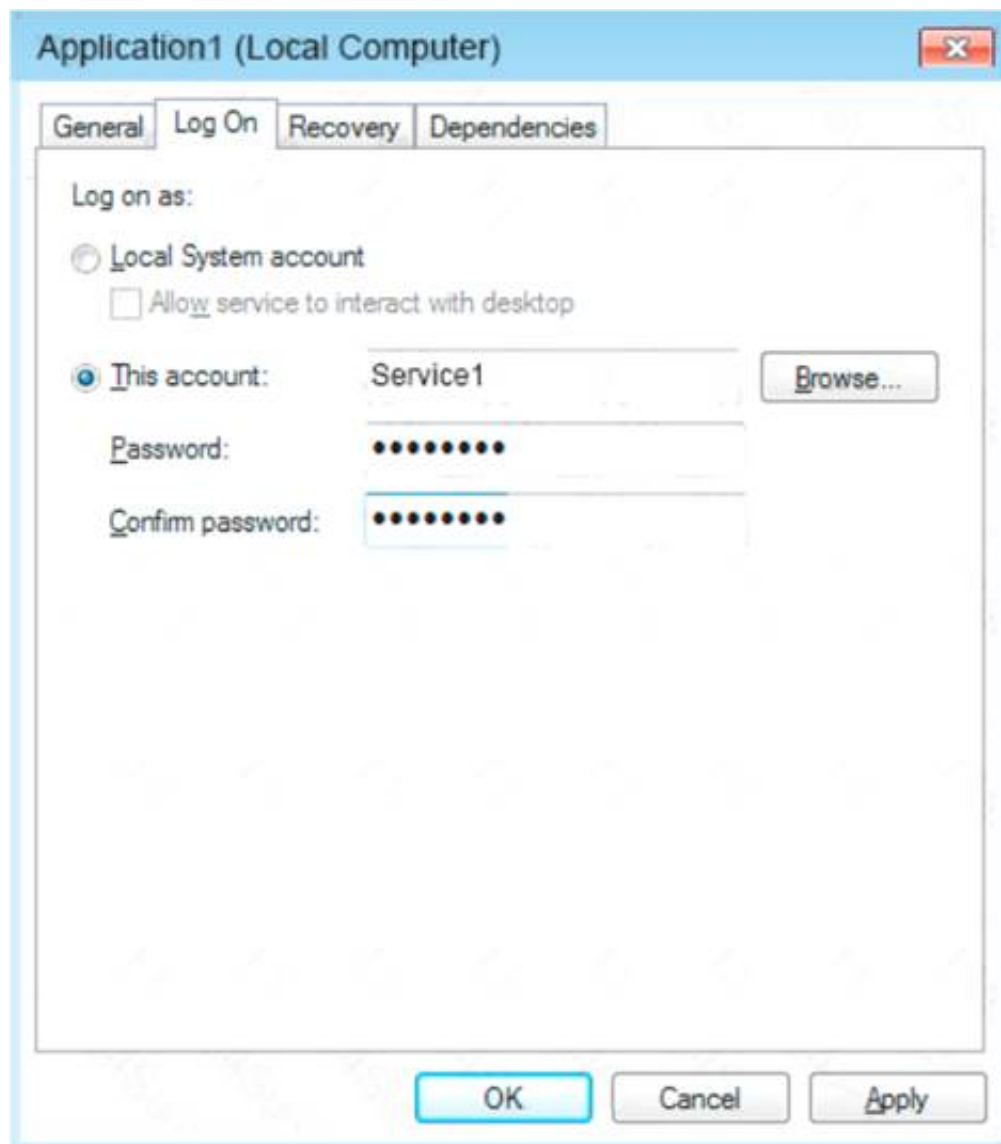

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files. You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.
 Solution: On Computer1, you assign Service1 the deny log on as a service user right. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

NEW QUESTION 143

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have a server named Server1 that runs Windows Server 2019 and has the Windows Deployment Services role installed. Server1 contains an x86 boot image and three Windows 10 install images. The install images are shown in the following table.

Name	Architecture	User permission
Image1	x64	Full control: Administrators, WDSServer
Image2	x64	Full control: Administrators Read: Group1
Image3	x86	Full control: Administrators, WDSServer Read: Group2

You purchase a computer named Computer1 that is compatible with the 64-bit version of Windows 10. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can install Image1 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>
User1 can install Image2 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>
User2 can install Image3 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://techdirectarchive.com/2020/09/14/error-0xc1510111-you-do-not-have-permissions-to-mount-and-modify>

NEW QUESTION 144

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You must ensure that Windows BitLocker Drive Encryption is enabled on all client computers, even though a Trusted Platform Module (TPM) chip is installed in only some of them. You need to accomplish this goal by using one Group Policy object (GPO). What should you do?

- A. Enable the Allow enhanced PINs for startup policy setting, and select the Allow BitLocker without a compatible TPM check box
- B. Enable the Enable use of BitLocker authentication requiring preboot keyboard input on slates policy setting, and select the Allow BitLocker without a compatible TPM check box
- C. Enable the Require additional authentication at startup policy setting, and select the Allow BitLocker without a compatible TPM check box
- D. Enable the Control use of BitLocker on removable drives policy setting, and select the Allow BitLocker without a compatible TPM check box

Answer: C

Explanation:

We need to allow Windows BitLocker Drive Encryption on all client computers (including client computers that do not have Trusted Platform Module (TPM) chip). We can do this by enabling the option to allow BitLocker without a compatible TPM in the group policy. The "Allow BitLocker without a compatible TPM" option is a checkbox in the "Require additional authentication at startup" group policy setting. To access the "Allow BitLocker without a compatible TPM" checkbox, you need to first select Enabled on the "Require additional authentication at startup" policy setting.

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 148

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

You need to ensure that you can use the ping command to validate network connectivity to Computer 1. How should you configure Windows Defender Firewall on Computer1?

- A. Enable the Core Networking - Teredo (UDP-In) inbound rule.
- B. Create a new connection security rule.
- C. Enable the File and Printer Sharing (Echo Request - ICMPv4-In) inbound rule.
- D. Add a new port rule to allow ports 80 and 443.

Answer: C

NEW QUESTION 153

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Computer1 was off for one year. During that time, two feature updates and 12 quality updates were released. From the Microsoft Update Catalog website, you download the missing updates and save the updates to Computer1.

You need to ensure that Computer1 runs the latest version of Windows 10 and is fully updated. The solution must minimize the amount of time required to update the computer.

What should you do?

- A. Install the last feature update, and then install the last quality update.
- B. Install the last quality update, and then install both feature updates.
- C. Install the last quality update, and then install the last feature update.
- D. Install the last feature update, and then install all the quality updates released after the feature update.
- E. Install all the quality and feature updates in the order in which they were released.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

NEW QUESTION 154

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

You need to modify the registry of Computer1 by using Registry Editor from Computer2. Which two registry hives can you modify? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. HKEY_CURRENT_USER
- B. HKEY_LOCAL_MACHINE
- C. HKEY_USERS
- D. HKEY_CLASSES_ROOT
- E. HKEY_CURRENT_CONFIG

Answer: BC

NEW QUESTION 156

- (Exam Topic 4)

You have a computer that runs Windows 8.1. You upgrade the computer to Windows 10.

You need to analyze the actions that occurred during the upgrade and review the performance statistics for errors by using Windows Event Log viewer.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Event log file:

- Install.etl
- Setup.etl
- UpdateSessionOrchestration.etl
- WindowsUpdate.etl

File location:

- \\$Windows.~BT\Sources\Panther
- \Windows\Logs
- \Windows\Panther
- \Windows\Temp

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Event log file:

- Install.etl
- Setup.etl
- UpdateSessionOrchestration.etl
- WindowsUpdate.etl

File location:

- \\$Windows.~BT\Sources\Panther
- \Windows\Logs
- \Windows\Panther
- \Windows\Temp

NEW QUESTION 158

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 belongs to a workgroup. You run the following commands on Computer1.

New-LocalUser -Name User1 -NoPassword Add-LocalGroupMember User -Member User1 What is the effect of the configurations?

- A. User1 is prevented from signing in until the user is assigned additional user rights.
- B. User1 appears on the sign-in screen and can sign in without a password.
- C. User1 is prevented from signing in until an administrator manually sets a password for the user.
- D. User1 appears on the sign-in screen and must set a new password on the first sign-in attempts.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.localaccounts/new-localuser?view=powershell-5.1>

NEW QUESTION 159

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Network & Internet in the Settings app, you set a data limit. Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 163

- (Exam Topic 4)

You have several computers that run Windows 10.

All users have Microsoft OneDrive for Business installed. Users frequently save files to their desktop.

You need to ensure that all the users can recover the files on their desktop from OneDrive for Business. Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Copy ADMX and ADML files to C:\Users\Public\Desktop\

B. From Backup in the Settings app, add a drive

C. Configure the Silently move Windows known folders to OneDrive settings

D. Copy ADMX and ADML files to C:\Windows\PolicyDefinitions

E. Configure the Save documents to OneDrive by default setting

Answer: CD

Explanation:

References:

<https://docs.microsoft.com/en-us/onedrive/plan-onedrive-enterprise> <https://docs.microsoft.com/en-us/onedrive/use-group-policy#KFMOptInNoWizard>

NEW QUESTION 166

- (Exam Topic 3)

Which users can sign in to Computer2 by using Remote Desktop?

A. Admin1 only

B. User 1 only

C. Admin1 and User2 only

D. Admin1, User1, User2, and User3

E. User2 only

Answer: C

Explanation:

Reference:

<https://4sysops.com/archives/user-rights-assignment-in-windows-server-2016/>

NEW QUESTION 171

- (Exam Topic 3)

You need to configure Delivery Optimization to meet the technical requirements. Which download mode should you use?

A. Simple (99)

B. Group (2)

C. Internet (3)

D. HTTP Only (0)

E. Bypass (100)

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization-reference#download>

NEW QUESTION 176

- (Exam Topic 3)

Which users can create a new group on Computer3?

A. User31 only

B. User1 and User32 only

- C. Admin1 and User31 only
D. Admin1, User31, and User32 only

Answer: A

Explanation:

Reference:

https://ss64.com/nt/syntax-security_groups.html

NEW QUESTION 179

- (Exam Topic 3)

Which users can sign in to Computer3 when the computer starts in Safe Mode?

- A. User31 only
B. User31 and User32 only
C. User31 and Admin1 only
D. User31, User 32, User33, and Admin1
E. User31, User32, and User33 only

Answer: A

Explanation:

Only users with membership of the local Administrators group can log on to a computer in safe mode. Admin1 cannot log in because Computer3 is not joined to the domain.

References:

<https://support.microsoft.com/en-us/windows/advanced-startup-options-including-safe-mode-b90e7808-80b5-a2>

NEW QUESTION 184

- (Exam Topic 3)

On Computer1, you need to configure the custom Visual Effects performance settings. Which user accounts can you use?

- A. Admm1, User11, and User13 only
B. Admin1 only
C. Admin1, User11, and User12 only
D. Admin1, User11, User12, and User13
E. Admin1 and User11 only

Answer: D

NEW QUESTION 187

- (Exam Topic 2)

You need to meet the technical requirement for the IT department users. What should you do first?

- A. Issue computer certificates
B. Distribute USB keys to the IT department users.
C. Enable screen saver and configure a timeout.
D. Turn on Bluetooth.

Answer: D

Explanation:

References:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 190

- (Exam Topic 2)

You need to meet the technical requirements for the helpdesk users.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Add the help desk users to:

The local Administrators group on the Windows 10 computers
The Domain Computrers group in the domain group
The Event Log Readers group in the domain group
The local Event Log Readers group on the Windows 10 computers
The Group Policy Creators Owners group in the domain group
The local Power Users group on the Windows 10 computers

Troubleshooting tool that the helpdesk users should use:

Get-GPOReport
GPRresult
GPOUpdate
Group Policy Object Editor

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.itprotoday.com/compute-engines/what-group-policy-creator-owners-group>

NEW QUESTION 193

- (Exam Topic 1)

You need to ensure that User10 can activate Computer10. What should you do?

- A. Request that a Windows 10 Enterprise license be assigned to User10, and then activate Computer10.
- B. From the Microsoft Deployment Toolkit (MDT), add a Volume License Key to a task sequence, and then redeploy Computer10.
- C. From System Properties on Computer10, enter a Volume License Key, and then activate Computer10.
- D. Request that User10 perform a local AutoPilot Reset on Computer10, and then activate Computer10.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-requirements-lice>

NEW QUESTION 197

- (Exam Topic 1)

You need to reduce the amount of time it takes to restart Application1 when the application crashes. What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Tool to use:	<div><div></div><div>▼</div><div>Event Viewer</div><div>Performance Monitor</div><div>Windows Memory Diagnostic</div><div>Windows Performance Analyzer</div></div>
Task to perform:	<div><div></div><div>▼</div><div>Create a subscription</div><div>Attach a task to an event</div><div>Enable an event trace provider</div><div>Create an alert</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://www.howto-connect.com/how-to-attach-a-task-to-this-event-in-event-viewer-in-windows-10/>

NEW QUESTION 202

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 7. Computer1 has a local user named User1 who has a customized profile.

On Computer1, you perform a clean installation of Windows 10 without formatting the drives. You need to migrate the settings of User1 from Windows7 to Windows 10.

Which two actions should you perform? To answer, drag the appropriate actions to the correct targets. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Actions	Answer Area
Run scanstate.exe and specify the C:\Users subfolder.	First action: <input type="text" value="Action"/>
Run loadstate.exe and specify the C:\Users subfolder.	Second action: <input type="text" value="Action"/>
Run scanstate.exe and specify the C:\Windows.old subfolder.	
Run loadstate.exe and specify the C:\Windows.old subfolder.	
Run usmutils.exe and specify the C:\Users subfolder.	
Run usmutils.exe and specify the C:\Windows.old subfolder.	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-how-it-works>

NEW QUESTION 206

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro.

You have a mobile device. You use Bluetooth to pair the mobile device to Computer1. You want to enable dynamic lock on Computer1.

What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

➤ On Computer1, select the Start button > Settings > Accounts > Sign-in options.

➤ Under Dynamic lock, select the Allow Windows to automatically lock your device when you're away check box.

Reference:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 211

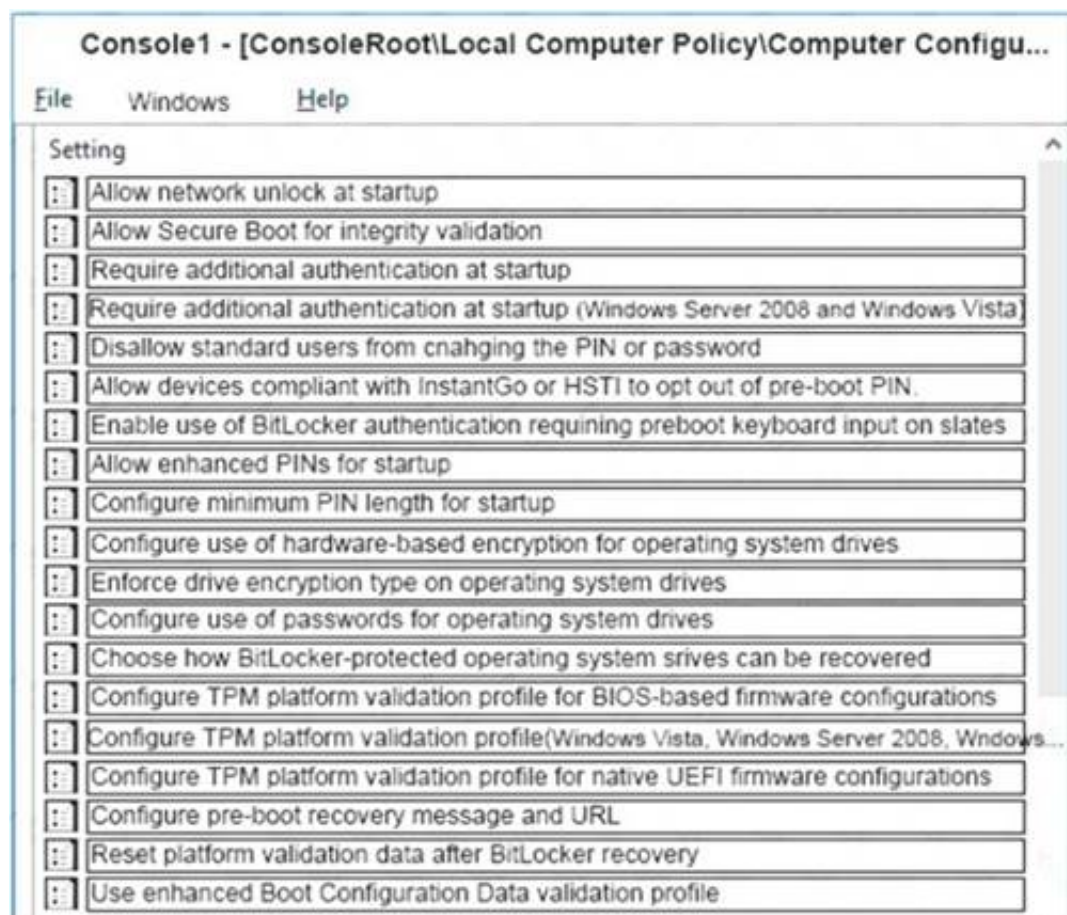

- (Exam Topic 4)

Your domain contains named Computer named Computer1 that runs Windows 10. Computer1 does not have a TPM.

You need to be able to encrypt the C drive by using Bitlocker Drive Encryption (BitLocker). The solution must ensure that the recovery key is stored in Active Directory.

Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 216

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.

The company plans to purchase computers preinstalled with Windows 10 Pro for all users. The company the following requirements:

- The new computers must be upgraded to Windows 10 Enterprise automatically.
- The new computers must be joined to Azure AD automatically when the user starts the new computers for the first time.
- The users must not be required to accept the End User License Agreement (EULA). You need to deploy the new computers.

What should you do?

- A. Make use of the wipe and load refresh deployment method.
- B. Perform in-place upgrade on the new computers.
- C. Provide provisioning packages for the new computers.
- D. Make use of Windows Autopilot.

Answer: D

Explanation:

Windows Autopilot is a collection of technologies used to set up and pre-configure new devices, getting them ready for productive use. You can also use Windows Autopilot to reset, repurpose and recover devices.

The OEM Windows 10 installation on the new computers can be transformed into a "business-ready" state, applying settings and policies, installing apps, and even changing the edition of Windows 10 being used (e.g. from Windows 10 Pro to Windows 10 Enterprise) to support advanced features.

The only interaction required from the end user is to connect to a network and to verify their credentials. Everything beyond that is automated.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

NEW QUESTION 221

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. a Group Policy administrative template
- B. Device Manager
- C. Task Manager
- D. Group Policy preferences

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/application-management/per-user-services-in-windows>

NEW QUESTION 222

- (Exam Topic 4)

You have a computer that runs Windows 10. You can start the computer but cannot sign in.

You need to start the computer into the Windows Recovery Environment (WinRE). What should you do?

- A. Turn off the compute
- B. Turn on the computer, and then press F8.
- C. Turn off the compute
- D. Turn on the computer, and then press F10.
- E. From the sign-in screen, hold the Shift key, and then click Restart.
- F. Hold Alt+Ctrl+Delete for 10 seconds.

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-recovery-environment--win>

NEW QUESTION 227

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10. You create a local user named User1.

User1 needs to be able to share and manage folders located in a folder named C:\Share by using the Shared Folders snap-in. The solution must use the principle of least privilege.

To which group should you add User1?

- A. Device Owners
- B. Users
- C. Power Users
- D. Administrators

Answer: D

NEW QUESTION 229

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

The domain contains the users shown in the following table.

Name	Member of
User1	Domain Users
User2	Domain Users, Guests
User3	Domain Users, Administrators

Computer has the local users shown in the following table.

Name	Member of
User4	Users
User5	Administrators

All users have Microsoft accounts.

Which two user can be configured to sign in by using their Microsoft account? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. User 1
- B. User 2
- C. User 3
- D. User 4
- E. User 5

Answer: CE

NEW QUESTION 233

- (Exam Topic 4)

You are troubleshooting Windows 10 updates that fail to install on a computer that runs Windows 10. You delete the contents of the SoftwareDistribution folder.

You need to delete the signatures of the Windows Update packages. Which folder should you delete?

- A. %systemroot%\system32\catroot2
- B. %systemdrive%\recovery
- C. %systemroot%\WinSxS
- D. %systemdrive%\System Volume Information

Answer: A

Explanation:

References:

<https://tipsmake.com/how-to-delete-pending-updates-on-windows-10>

NEW QUESTION 238

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer1, you turn off Windows Defender Firewall-Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 241

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Services console, you disable the Link-Layer Topology Discovery Mapper service. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 244

- (Exam Topic 4)

You have a computer that runs Windows 8.1.

When you attempt to perform an in-place upgrade to Windows 10, the computer fails to start after the first restart.

You need to view the setup logs on the computer. Which folder contains the logs?

- A. %Windows.~BT\Sources\Panther\
- B. %Windows%\Logs
- C. %Windows%\Temp
- D. %Windows.~BT\Inf

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-setup-log-files-and-eventlogs>

NEW QUESTION 248

- (Exam Topic 4)

You have the computers shown in the following table.

Name	Windows 10 edition	Servicing channel
Computer1	Windows 10 Education	Semi-annual
Computer2	Windows 10 Pro	Semi-annual
Computer3	Windows 10 Enterprise	Semi-annual

You apply the 20H2 feature update as soon as the update is available.

How many months of servicing does each computer support without installing another feature update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1: 

Computer2: 

Computer3: 

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated with medium confidence

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

NEW QUESTION 253

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Microsoft Deployment Toolkit (MDT) and create a task sequence. One each compute, you run the task sequence. Does the meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 257

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source.

You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the necsh int ip resec command
- B. the Resec-NetAdapcerAdvancedPropercy cmdlet
- C. the netcf g -d command
- D. the Debug-NecworkController cmdlet

Answer: A

Explanation:

Reference: <https://howtofix.guide/reset-tcp-ip/>

NEW QUESTION 259

- (Exam Topic 4)

You have a computer that runs Windows 10.

From the Settings app, you view the connection properties shown in the following exhibit.

Network profile

☒ Public
Your PC is hidden from other devices on the network and can't be used for printer and file sharing.

☐ Private
For a network you trust, such as at home or work. Your PC is discoverable and can be used for printer and file sharing if you set it up.

[Configure firewall and security settings](#)

Metered connection

If you have a limited data plan and want more control over data usage, make this connection a metered network. Some apps might work differently to reduce data usage when you're connected to this network.

Set as metered connection

☒ On

[Set a data limit to help control data usage on this network](#)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

To enable Windows Remote Management (WinRM), you must first [answer choice].

set the Network profile to Private
run winrm qc at the command prompt
turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

set the Network profile to Private
run winrm qc at the command prompt
turn off Metered connection

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To enable Windows Remote Management (WinRM), you must first [answer choice].

set the Network profile to Private
run winrm qc at the command prompt
turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

set the Network profile to Private
run winrm qc at the command prompt
turn off Metered connection

NEW QUESTION 260

- (Exam Topic 4)

You deploy 100 computers that run Windows 10. Each computer has a cellular connection and a Wi-Fi connection. You need to prevent the computers from using the cellular connection unless a user manually connects to the cellular network. What should you do?

- A. Set the Use cellular instead of Wi-Fi setting for the cellular connection to Never
- B. Run the netsh wlan set hostednetwork mode=disallow command
- C. Clear the Let Windows manage this connection check box for the cellular connection
- D. Select the Let Windows manage this connection check box for the Wi-Fi connection

Answer: C

Explanation:

References:

https://support.microsoft.com/en-za/help/10739/windows-10-cellular-settings

NEW QUESTION 264

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

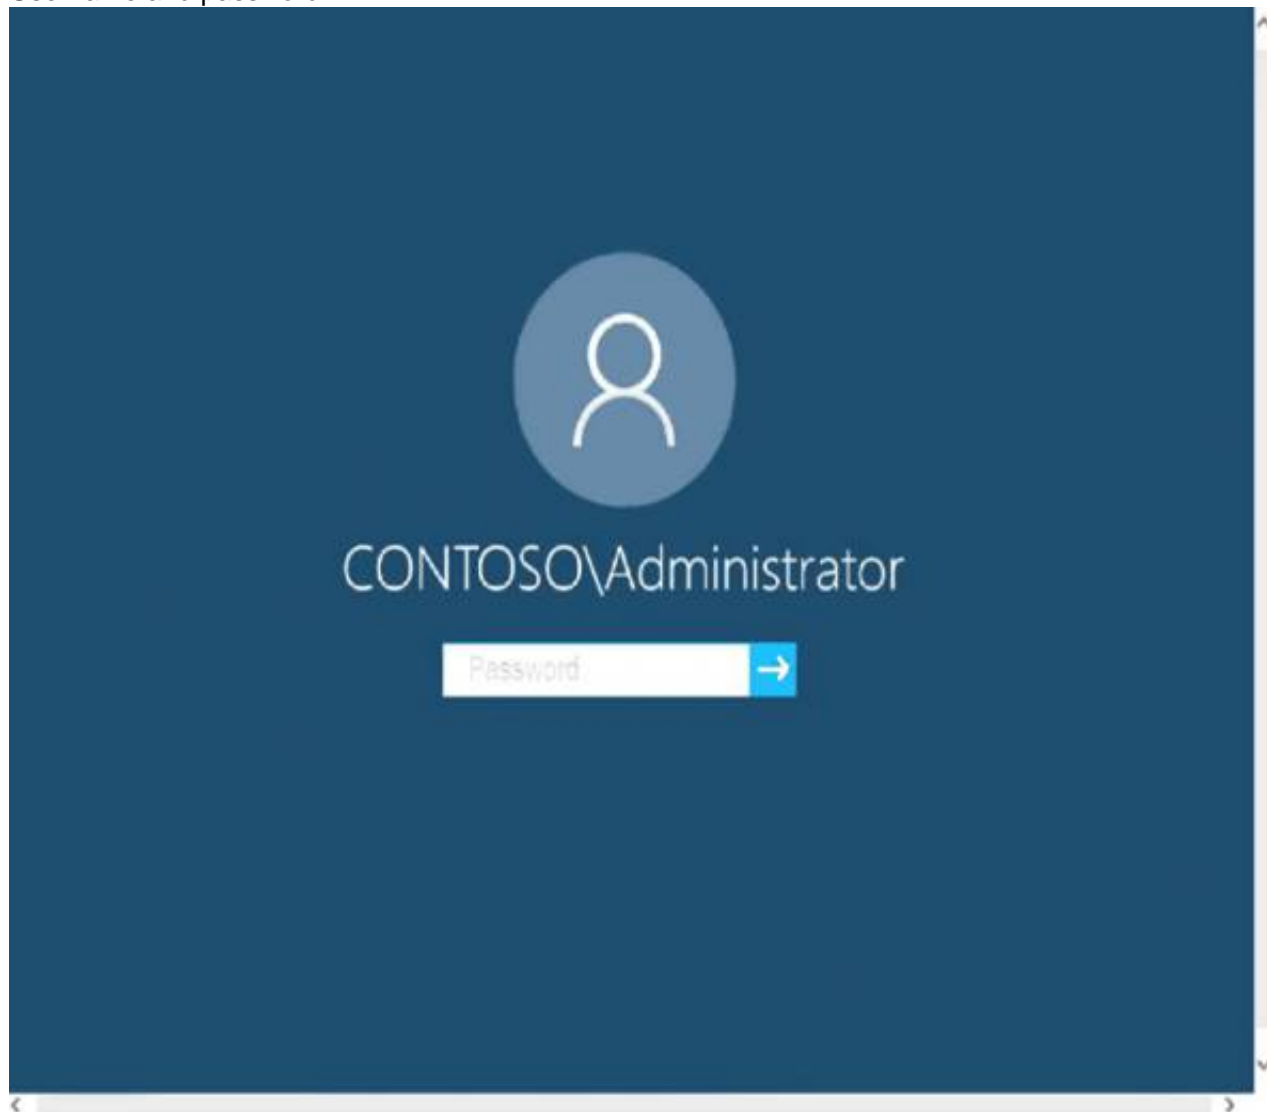

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Tasks

Computers

You need to ensure that C:\Scripts\Configure.ps1 runs every time a user sign in to Client2.
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Go to the Start menu, type "Task Scheduler" and select it from the search results.

Task Scheduler can also be accessed in the Control Panel under Administrative Tools. In the right side of the Task Scheduler menu, under Actions, select “Create Task.”

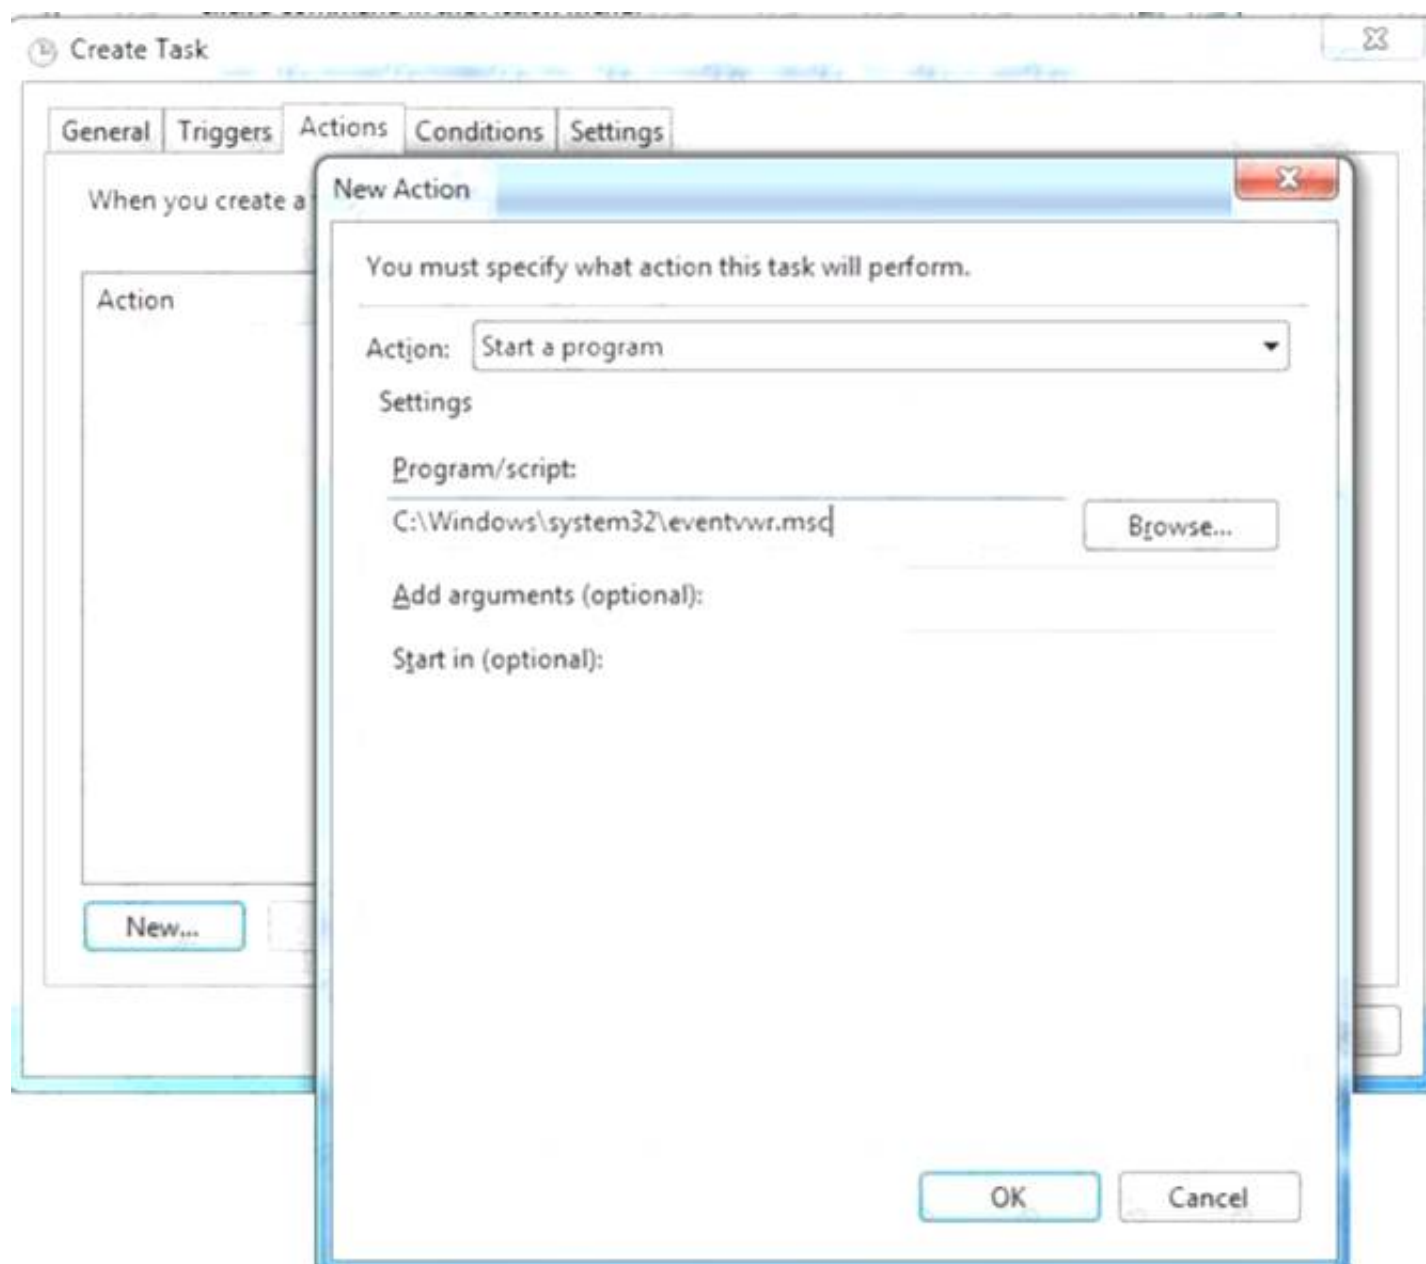

On the General tab, enter a name and description for the task you’re creating. Check the box “Run with highest privileges.”

Once you have filled out a name and description, click the “Triggers” tab, and then click “New.”

In this menu, under “Begin the task:” select “At log on.” Choose which user you would like the task to run for at log on. For our purposes, Any user.

Configure any of the applicable advanced settings you would like.

After you are finished configuring the new trigger, click OK and then select the “Actions” tab. Click “New” to make a new action.

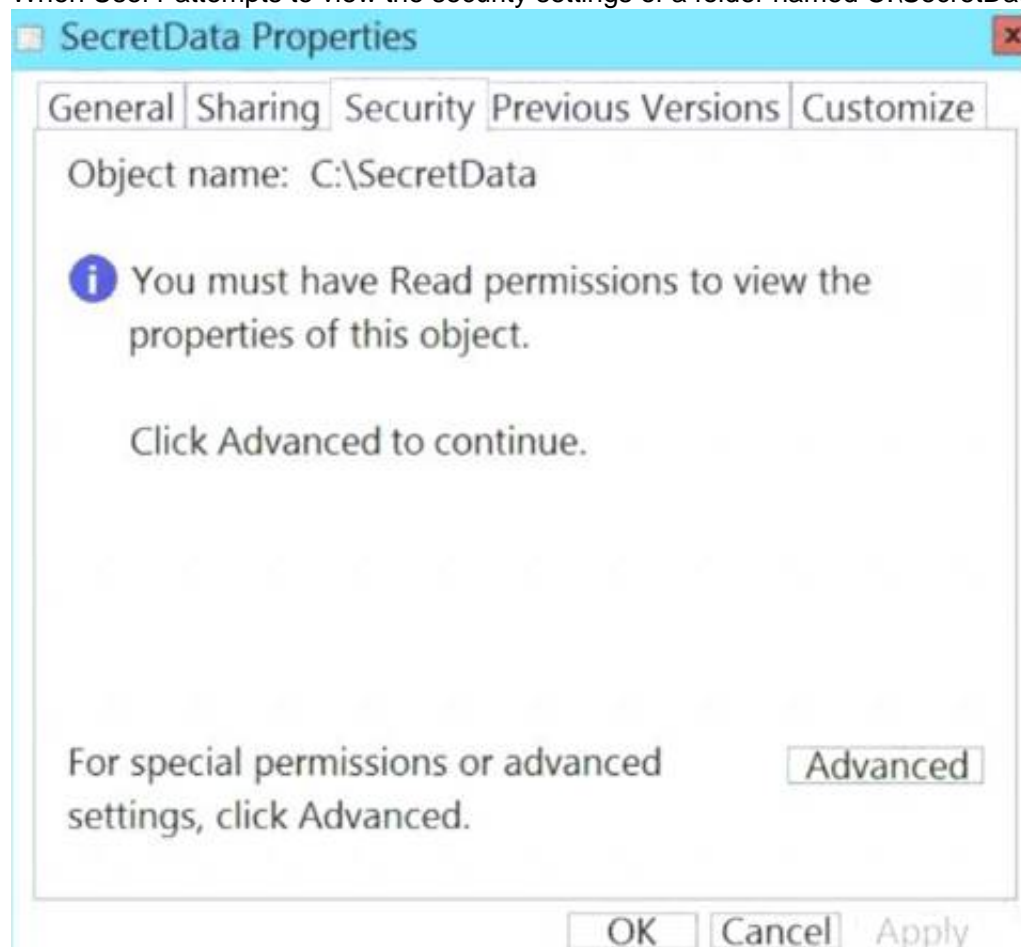

Choose "Start a program" under the Action menu and then click "Browse" to point to C:\Scripts\Configure.ps1.
 Click OK to exit out of the Actions menu. The "Conditions" and "Settings" tabs can be left alone.
 Click OK on the Create Task menu, and you are finished. Reference:

NEW QUESTION 268

- (Exam Topic 4)

User1 is a member of the Administrators group on a computer that runs Windows 10.

When User1 attempts to view the security settings of a folder named C:\SecretData, the user receives the message in the Security exhibit.

On the computer, you sign in as a member of the Administrators group and view the permissions to C:\SecretData as shown in the Permissions exhibit.

You need to restore Use1's access to C:\SecretData. What should you do first?

- A. From the Permissions tab of Advanced Security Settings for SecretData, select Change to take ownership of the folder.
- B. From the Permissions tab of Advanced Security Settings for SecretData, select Continue to attempt the operation by using administrative privileges.
- C. Assign User1 Full control permissions to the C folder and set the inheritance to This folder, subfolders and files.
- D. From an elevated command prompt, run cacs.exe c:\secretdata /g user1:F.

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/windows-security/dont-have-permission-access-f>

NEW QUESTION 273

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer you share a folder. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 276

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016 and a computer named Computer1 that runs Windows 10.

Server1 contains a share named Backup. All users can read and write data in Backup.

On Monday at 13:00, you configure Backup and Restore (Windows 7) on Computer1 to use the following settings:

- > Backup Destination: \\Server1\Backup
- > What do you want to back up?: Local Disk (D:), Include a system image of drives: System Reserved, (C:)
- > Schedule: Daily at 23:00

You need to identify how many backups will be available on Thursday at 17:00.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Local Disk (D:) backups:

▼

One backup that uses ZIP files

One backup that uses a VHDX file

Three backups that use ZIP files

Three backups that use VHDX files

System image backups of drive C:

▼

One backup that uses ZIP files

One backup that uses a VHDX file

Three backups that use ZIP files

Three backups that use VHDX files

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

References:

https://www.windowscentral.com/how-make-full-backup-windows-10#create_system_image_windows10[https://](https://www.windowscentral.com/how-make-full-backup-windows-10#create_system_image_windows10)

NEW QUESTION 278

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10.

You need to configure Windows Hello for sign-in to Computer1 by using a physical security key. What should you use?

- A. a USB 3.0 device that supports BitLocker Drive Encryption (BitLocker)
 B. a USB device that supports FIDO2
 C. a USB 3.0 device that has a certificate from a trusted certification authority (CA)
 D. a USB device that supports RSA SecurID

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/user-help/security-info-setup-security-key>

NEW QUESTION 280

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contain the users shown in the following table.

Name	Role
Admin1@contoso.com	Security administrator
Admin2@contoso.com	Cloud device administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10.

Name	Member of
Admin1	Network Configuration Operators
Admin2	Power Users
User1	Administrator

User1 joins Computer1 to Azure AD by using user1@contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Windows Defender on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input checked="" type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Windows Defender on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 283

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Power Users, Users
User3	Backup Operators, Users
User4	Users

You plan to add a key named Key1 to the following three registry branches:

- > HKEY_CURRENT_CONFIG\Software
- > HKEY_LOCAL_MACHINE\Software
- > HKEY_CURRENT_USER\Software

You need to identify which users can add Key1.

What user or users should you identify for each branch? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

HKEY_CURRENT_CONFIG\Software:

User1 only
User1 and User2 only
User1 and User3 only
User1, User2, User3, and User4

HKEY_LOCAL_MACHINE\Software:

User1 only
User1 and User2 only
User1 and User3 only
User1, User2, User3, and User4

HKEY_CURRENT_USER\Software:

User1 only
User1 and User2 only
User1 and User3 only
User1, User2, User3, and User4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1 and Box 2.

These are system-wide registry keys so only Administrators can modify them. Box 3.

This key affects only the logged in user. Therefore, any user can modify this key.

NEW QUESTION 284

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

Tasks Computers

A web service installed on Client1 is used for testing.
 You discover that users cannot connect to the web service by using HTTP. You need to allow inbound HTTP connections to Client1.
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To create an inbound port rule

- > In the navigation pane, click Inbound Rules.
- > Click Action, and then click New rule.
- > On the Rule Type page of the New Inbound Rule Wizard, click Custom, and then click Next.
- > On the Program page, click All programs, and then click Next.
- > On the Protocol and Ports page, select the protocol type that you want to allow. To restrict the rule to a specified port number, you must select either TCP or UDP. Because this is an incoming rule, you typically configure only the local port number. TCP port 80. When you have configured the protocols and ports, click Next.
- > On the Scope page, you can specify that the rule applies only to network traffic to or from the IP addresses entered on this page. Configure as appropriate for your design, and then click Next.
- > On the Action page, select Allow the connection, and then click Next.
- > On the Profile page, select the network location types to which this rule applies, and then click Next.
- > On the Name page, type a name and description for your rule, and then click Finish.

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-firewall/create-an-inbound-port-r>
https://en.wikipedia.org/wiki/List_of_TCP_and_UDP_port_numbers

NEW QUESTION 286

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com. User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Modify access to Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc75417>

NEW QUESTION 289

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to configure User Account Control (UAC) to prompt administrators for their credentials. Which settings should you modify?

- A. Administrators Properties in Local Users and Groups
- B. User Account Control Settings in Control Panel
- C. Security Options in Local Group Policy Editor
- D. User Rights Assignment in Local Group Policy Editor

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-contro>

NEW QUESTION 293

- (Exam Topic 4)

You need to Windows 10 to 20 new laptops.

The laptops will be recommend a solution to lock the laptop when the users leave their laptop for an extended period.

Which two actions should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the settings app, configure the Dynamic lock settings.
- B. From the Settings app, configure the lock screen settings.
- C. Enable Bluetooth discovery.
- D. From the Settings app, configure the Screen timeout settings
- E. Pair the Android device the laptop.
- F. From Sign-in option, configure the Windows hello settings.

Answer: BE

Explanation:

<https://support.microsoft.com/en-us/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 294

- (Exam Topic 4)

Your company is not connected to the internet. The company purchases several new computers with Windows 10 Pro for its users.

None of the new computers are activated.

You need to activate the computers without connecting the network to the Internet. What should you do?

- A. Make use of the Volume Activation Management Tool (VAMT).
- B. Make use of the Key Management Service (KMS).
- C. Make use of the Windows Process Activation Service.
- D. Run the Get-WmiObject -query cmdlet.

Answer: B

Explanation:

You can configure one of the computers as a Key Management Service (KMS) host and activate the KMS host by phone. The other computers in the isolated network can then activate using the KMS host.

Installing a KMS host key on a computer running Windows 10 allows you to activate other computers running Windows 10 against this KMS host and earlier versions of the client operating system, such as Windows 8.1 or Windows 7. Clients locate the KMS server by using resource records in DNS, so some configuration of DNS may be required. This scenario can be beneficial if your organization uses volume activation for clients and MAK-based activation for a smaller number of servers. To enable KMS functionality, a KMS key is installed on a KMS host; then, the host is activated over the Internet or by phone using Microsoft's activation services.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi>

NEW QUESTION 297

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

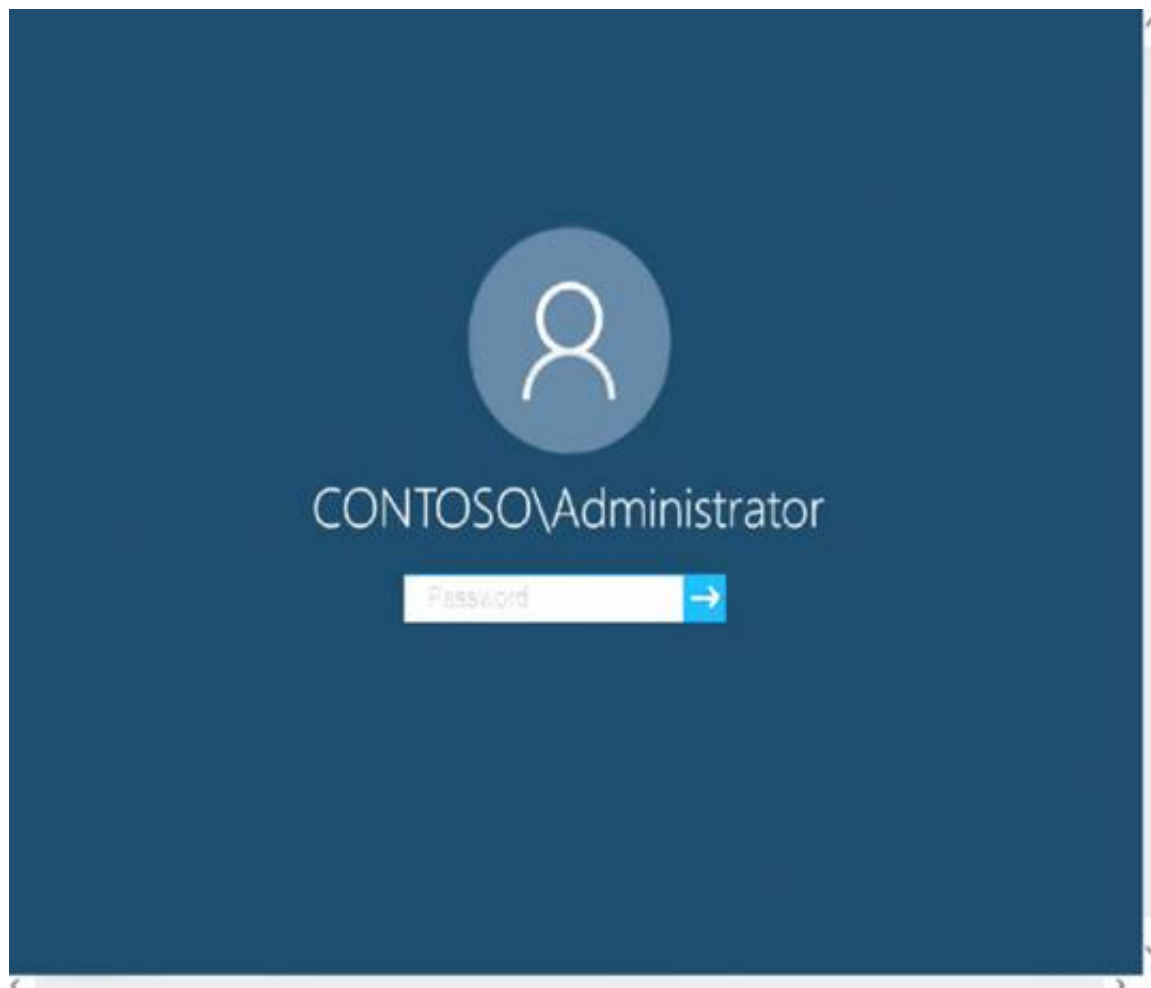

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

You need to ensure that you can successfully ping DC1 from Client3 by using the IP4 address of DC1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > On Client3, press Windows+R to access Run.
- > Type cmd and click OK to access the command prompt.
- > Type ipconfig and press Enter to check that you have a valid IP address.
- > On Client3, press Windows+R to access Run.
- > Type cmd and click OK to access the command prompt.
- > Type "ping" and the IP address of the Domain Controller (e.g. "ping 172.16.1.43").

Reference:

http://www.turn-n-burn.com/DestinyNetworks/Downloads/WebHelp3-1-1/Ping_the_Domain_Controller.h

NEW QUESTION 298

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains the users shown in the following table.

Name	Member of
User1	Group1, Group3
User2	Group1, Group2
User3	Group2, Group3

The domain contains a computer named Computer1 that runs Windows10. Computer1 has a file named File1.txt that has the permissions shown in the exhibit.
 (Click the Exhibit tab.)

Name: C:\Folder1\File1.txt
 Owner: administrator (ADATUM\administrator) [Change](#)

Permissions | Share | Auditing | Effective Access

For additional information, double-click a permission entry. To modify a permission entry, select the entry and click Edit (if available).

Permission entries:

Type	Principal	Access	Condition
Allow	Domain Admins (...)	Full control	
Allow	Group1 (ADATUM\...)	Read	Member of each ((Group1 (ADATUM\Group1), Group3 (ADATUM\Group3)))
Allow	Group2 (ADATUM\...)	Full control	Not member of any ((Group3 (ADATUM\Group3)))
Allow	Group3 (ADATUM\...)	Read	Not member of any ((Group1 (ADATUM\Group1), Group2 (ADATUM\Group2)))

Add Remove View

Enable inheritance

OK Cancel Apply

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User2 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User3 can read File1.txt.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

User1 only has Read access to the file.

Box 2: Yes

User2 is in Group2 which has full control. The condition states that if the user is also a member of Group3, the permission would not apply. However, User2 is not in Group3 so the full control permission does apply.

Box 3: No

User3 is in Group3 which does have Read access. However, the condition states that if the user is also in Group1 or Group2 then the permission does not apply. User3 is in Group2 so the Read permission granted to Group3 does not apply to User3.

NEW QUESTION 299

- (Exam Topic 4)

Your company has several mobile devices that run Windows 10.

You need configure the mobile devices to meet the following requirements:

- > Windows updates may only be download when mobile devices are connect to Wi-Fi.
- > Access to email and the Internet must be possible at all times.

What should you do?

- A. Open the Setting app and select Update & Securit
- B. Then select and configure Change active hours.
- C. Open the Setting app and select Network & Interne
- D. Then select Change connection properties, and set the Metered connection option for cellular network connections to On.
- E. Open the Setting app and select Network & Internet Then select Data Usage and set a data limit.
- F. Open the Setting app and select Update & Securit
- G. Then select and configure Delivery Optimization.

Answer: B

Explanation:

NEW QUESTION 304

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled. You need to create a custom Windows Sandbox configuration file. Which file extension should you use?

- A. .ps
- B. .json
- C. .wsb
- D. .xml

Answer: C

NEW QUESTION 308

- (Exam Topic 4)

You enable Windows PowerShell remoting on a computer that runs Windows 10. You need to limit which PowerShell cmdlets can be used in a remote session. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Run the New-PSSession cmdlet.

Create a PS1 file that contains a list of the cmdlets.

Run the New-PSSessionConfigurationFile cmdlet.

Create a PSSC file that contains a list of the cmdlets.

Run the Register-PSSessionConfiguration cmdlets.

Run the Enter-PSSession cmdlet.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. New
- * 2. Register
- * 3. Enter Read more:

You need to ensure that the File History of Contoso\Administrator on Client1 is backed up automatically to \\DC1\Backups.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

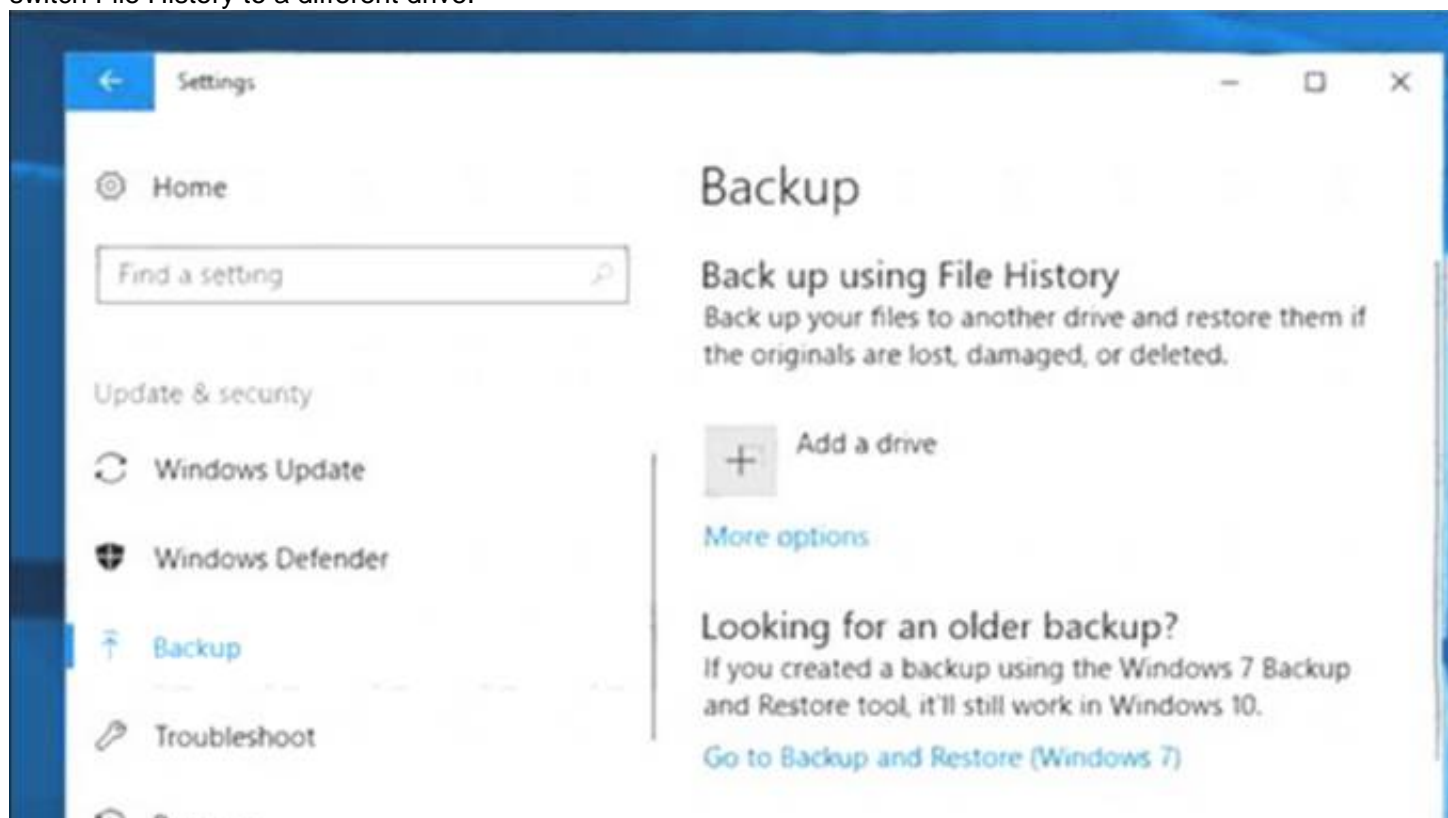

How to set up and enable File History

* 1. On Client1, go to Start > Settings > Update & Security.

* 2. Select Backup and click “Add a drive.”

* 3. Select the drive or network location (\\DC1\Backups) you want to use for File History’s backups.

Now click “More options.” Here you can start a backup, change when your files are backed up, select how long to keep backed up files, add or exclude a folder, or switch File History to a different drive.

Click the “Back up now” button to start your first File History backup. Reference:

<https://lifelacker.com/how-to-back-up-your-computer-automatically-with-windows-1762867473>

NEW QUESTION 320

- (Exam Topic 4)

You are troubleshooting a Windows 10 device that fails to install updates from Windows Update. You discover that some files in the component store are corrupt. You need to resolve the issue to ensure that you can install the updates. Which command should you run?

- A. chkdsk /c c:
- B. Dism /Online /Cleanup-Image /RestoreHealth
- C. Dism /Online /Cleanup-Image /StartComponentCleanup
- D. chknfts /c c:

Answer: B

NEW QUESTION 324

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
Admin1	Domain Admins, Group1
User1	Group1
User2	Group2

Computer1 has four printers as shown in the following table.

Name	Type	Added by	Permissions
Printer1	Local printer	Admin1	Print: Group1 Manage the printer: Group1
Printer2	Network printer	Admin1	Print: Domain Users Manage the printer: Domain Users
Printer3	Local printer	User1	Print: Group1 Manage the printer: Group1
Printer4	Local printer	User2	Print: Domain Users Manage the printer: Domain Users

Which printers will be available to User1 when the user signs in to Computer1?

- A. Printer3 only
- B. Printed and Printer3 only
- C. Printed, Printer2. and Printer3 only
- D. Printed, Printer3, and Printer4 only
- E. Printed, Printer2, Printer3, and Printer4

Answer: E

NEW QUESTION 327

- (Exam Topic 4)

A user purchases a new computer that has Windows 10 Home preinstalled. The computer has a biometric fingerprint reader.

You need to ensure that the user can use the fingerprint reader to sign in to the computer by using an Azure Active Directory (Azure AD) account.

What should you do first?

- A. Register the computer to Azure AD.
- B. Install the latest feature updates on the computer.
- C. Upgrade the computer to Windows 10 Enterprise.
- D. Upgrade the computer to Windows 10 Pro.

Answer: D

NEW QUESTION 330

- (Exam Topic 4)

A user has a computer that runs Windows 10.

When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.

You run the ipconfig command and receive the following output.

```
Connection-specific DNS Suffix  . : 
Description . . . . . : Ethernet 1
Physical Address. . . . . : 00-50-B6-7B-E4-81
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5d56:3419:e83b:3c46%17(Preferred)
IPv4 Address. . . . . : 192.168.0.121(Preferred)
Subnet Mask . . . . . : 255.255.255.0
Lease Obtained. . . . . : Wednesday, October 31, 2018 8:07:14 AM
Lease Expires . . . . . : Wednesday, October 31, 2018 8:07:14 PM
Default Gateway . . . . . : 192.168.0.1
DHCP Server . . . . . : 192.168.0.2
DHCPv6 IAID . . . . . : 536891574
DHCPv6 Client DUID. . . . . : 00-01-00-01-22-AC-5F-64-00-50-B6-7B-E4-81
DNS Servers . . . . . : 131.107.10.60
                        192.168.0.3
NetBIOS over Tcpi. . . . . : Enabled
```

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

- A. the DNS servers
- B. the IPv4 address
- C. the subnet mask
- D. the default gateway address

Answer: A

NEW QUESTION 335

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

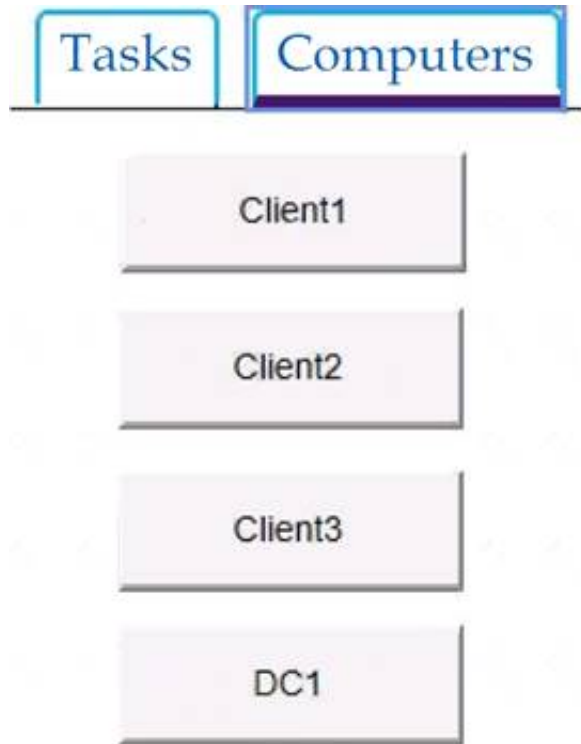

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named Private.txt in a folder named Folder1 on the C drive of Client2.

You need to encrypt Private.txt and ensure that a user named User1 can view the contents of Private.txt.

To complete this task, sign in to the required computer or computers.

A. Mastered

B. Not Mastered

Answer: A

Explanation:

- > After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.
- > On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click OK.
- > A window will pop up asking you whether or not you want to encrypt the file and its parent folder.

Select the "Encrypt the file only" and click OK.

- Private.txt will now show its file name in green color.
- Right-click Private.txt and then select Properties.
- Click Advanced on the General tab.
- Click Details on the Advanced Attributes tab to open the User Access dialog box.
- Click Add to open the Encrypting File System dialog box and then select User1.
- Click OK to add User1 to the list of users who have access to the file.
- Click OK until you've exited out of the dialog boxes. Reference:

NEW QUESTION 337

- (Exam Topic 4)

You have two computers named Computer1 and Computer2 that run Windows 10. The computers are in a workgroup.

You perform the following configurations on Computer1:

- Create a user named User1.
- Add User1 to the Remote Desktop Users group. You perform the following configurations on Computer2:
- Create a user named User1 and specify the same user password as the one set on Computer1.
- Create a share named Share2 and grant User1 Full control access to Share2.
- Enable Remote Desktop.

What are the effects of the configurations? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

If User1 attempts to access Share2 from Computer1, the user will:

▼
Access Share2 without a prompt
Be prompted for credentials
Be denied access to Share2

If User1 attempts to sign in to Remote Desktop on Computer2 from Computer1, the user will:

▼
Sign in to Remote Desktop without a prompt
Be prompted for credentials and be able to sign in as User1.
Be prompted for credentials and be prevented from signing in as User1.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

If User1 attempts to access Share2 from Computer1, the user will:

▼
Access Share2 without a prompt
Be prompted for credentials
Be denied access to Share2

If User1 attempts to sign in to Remote Desktop on Computer2 from Computer1, the user will:

▼
Sign in to Remote Desktop without a prompt
Be prompted for credentials and be able to sign in as User1.
Be prompted for credentials and be prevented from signing in as User1.
