

Microsoft

Exam Questions MD-101

Managing Modern Desktops (beta)

NEW QUESTION 1

- (Exam Topic 1)

What should you upgrade before you can configure the environment to support co-management?

- A. the domain functional level
- B. Configuration Manager
- C. the domain controllers
- D. Windows Server Update Services (WSUS)

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/sccm/comanage/tutorial-co-manage-clients>

NEW QUESTION 2

- (Exam Topic 1)

What should you use to meet the technical requirements for Azure DevOps?

- A. An app protection policy
- B. Windows Information Protection (WIP)
- C. Conditional access
- D. A device configuration profile

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/accounts/manage-conditional-access?view=azure-devops>

NEW QUESTION 3

- (Exam Topic 1)

You need to capture the required information for the sales department computers to meet the technical requirements.

Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune
- B. Install-Script Get-WindowsAutoPilotInfo
- C. Import-AutoPilotCSV
- D. Get-WindowsAutoPilotInfo

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

"This topic describes how to convert Windows 7 or Windows 8.1 domain-joined computers to Windows 10 devices joined to either Azure Active Directory or Active Directory (Hybrid Azure AD Join) by using Windows Autopilot"

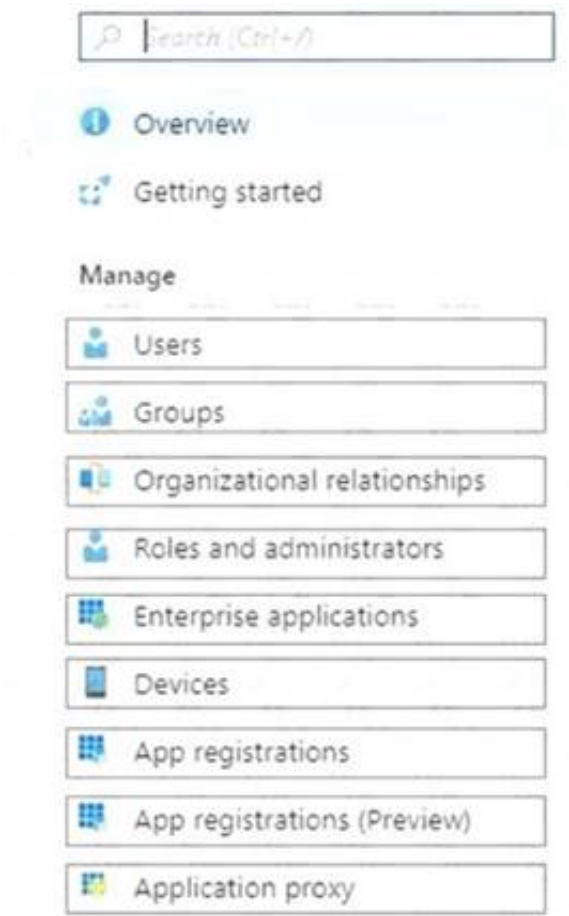

NEW QUESTION 4

- (Exam Topic 1)

You need to meet the technical requirements for Windows AutoPilot.

Which two settings should you configure from the Azure Active Directory blade? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

NEW QUESTION 5

- (Exam Topic 2)
You need to meet the technical requirements for the LEG department computers.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Configure the commercial ID on the LEG department computers.		
Create an Azure Machine Learning service workspace.		
Create an Azure Log Analytics workspace.		
Install the Microsoft Monitoring Agent on the LEG department computers.		
Add a solution to a workspace.		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-azure-portal>

NEW QUESTION 6

- (Exam Topic 2)
You need to prepare for the deployment of the Phoenix office computers. What should you do first?

- A. Generalize the computers and configure the Mobility (MDM and MAM) settings from the Azure Active Directory admin center.
- B. Extract the hardware ID information of each computer to a CSV file and upload the file from the Microsoft Intune blade in the Azure portal.
- C. Extract the hardware ID information of each computer to an XML file and upload the file from the Devices settings in Microsoft Store for Business.
- D. Extract the serial number information of each computer to a CSV file and upload the file from the Microsoft Intune blade in the Azure portal.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

NEW QUESTION 7

- (Exam Topic 2)

You need to meet the technical requirements for the iOS devices. Which object should you create in Intune?

- A. A compliance policy
- B. An app protection policy
- C. A Deployment profile
- D. A device profile

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/device-restrictions-configure> <https://docs.microsoft.com/en-us/intune/device-restrictions-ios>

NEW QUESTION 8

- (Exam Topic 2)

You need to meet the technical requirements for the new HR department computers.

How should you configure the provisioning package? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Specify ComputerName as:

<input type="checkbox"/>
<input checked="" type="checkbox"/> "HR" + RAND(4)
<input checked="" type="checkbox"/> "HumanResources-" + RAND(????)
<input type="checkbox"/> HR-%RAND:4%
<input type="checkbox"/> HR-????
<input type="checkbox"/> HumanResources-%RAND:4%

Specify AccountOU as:

<input type="checkbox"/>
<input checked="" type="checkbox"/> CN=Computers, CN=HR, DC=Contoso, DC=com
<input checked="" type="checkbox"/> Computers/HumanResources/Contoso.com
<input type="checkbox"/> Contoso.com/HR/Computers
<input type="checkbox"/> OU=Computers, OU=HR, DC=Contoso, DC=com

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/wcd/wcd-accounts>

NEW QUESTION 9

- (Exam Topic 3)

Which devices are registered by using the Windows Autopilot deployment service?

- A. Device1 only
- B. Device3 only
- C. Device1 and Device3 only
- D. Device1, Device2, and Device3

Answer: C

Explanation:

Scenario: Windows Autopilot Configuration Assignments

Included groups: Group1 Excluded groups: Group2 Device1 is member of Group1.

Device2 is member of Group1 and member of Group2. Device3 is member of Group1.

Group1 and Group2 have a Membership type of Assigned.

Exclusion takes precedence over inclusion in the following same group type scenarios. Reference: <https://learn.microsoft.com/en-us/mem/intune/apps/apps-inc-exl-assignments>

NEW QUESTION 10

- (Exam Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 adds a shortcut to the desktop of Device1, when User1 signs in to Device3, the same shortcut will appear on the desktop.	<input type="radio"/>	<input type="radio"/>
If User1 sets the desktop background to blue on Device2, when User1 signs in to Device4, the desktop background will be blue.	<input type="radio"/>	<input type="radio"/>
If User2 increases the size of the font in the command prompt of Device2, when User2 signs in to Device3, the command prompt will show the increased font size.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

NEW QUESTION 10

- (Exam Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device4 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device5 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

NEW QUESTION 11

- (Exam Topic 3)

You implement Boundary1 based on the planned changes.

Which devices have a network boundary of 192.168.1.0/24 applied?

- A. Device2 only
- B. Device3 only
- C. Device 1. Device2. and Device5 only
- D. Device 1, Device2, Device3, and Device4 only

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/network-boundary-windows>

NEW QUESTION 16

- (Exam Topic 3)

You implement the planned changes for Connection1 and Connection2

How many VPN connections will there be for User1 when the user signs in to Device 1 and Devke2? To answer select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

Device1:

1
2
3
4
5

Device2:

1
2
3
4
5

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, table Description automatically generated

NEW QUESTION 18

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

Contoso.com contains the devices shown in the following table.

Name	Platform	Member of	Microsoft Intune managed
Device1	Windows 10	GroupA	Yes
Device2	Windows 10	GroupB	No

In Intune, you create the app protection policies shown in the following table.

Name	Platform	Enrollment state	Assigned to
Policy1	Windows 10	With enrollment	Group1
Policy2	Windows 10	Without enrollment	Group2
Policy3	Windows 10	With enrollment	GroupA
Policy4	Windows 10	Without enrollment	GroupB

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
When User1 signs in to Device1, Policy1 applies.	<input type="radio"/>	<input type="radio"/>
When User2 signs in to Device1, Policy2 applies.	<input type="radio"/>	<input type="radio"/>
When User2 signs in to Device2, Policy2 applies.	<input type="radio"/>	<input type="radio"/>

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policy>

NEW QUESTION 22

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Update for Business.
The research department has several computers that have specialized hardware and software installed.
You need to prevent the video drivers from being updated automatically by using Windows Update. Solution: From the Settings app, you clear the Give me updates for other Microsoft products when I update Windows check box.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:
https://www.stigviewer.com/stig/microsoft_windows_server_2012_member_server/2013-07-25/finding/WN12

NEW QUESTION 25

- (Exam Topic 4)
Your company has a Microsoft Azure Active Directory (Azure AD) tenant.
The company uses Microsoft Intune to manage iOS, Android, and Windows 10 devices.
The company plans to purchase 1,000 iOS devices. Each device will be assigned to a specific user.
You need to ensure that the new iOS devices are enrolled automatically in Intune when the assigned user signs in for the first time.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Create a device compliance policy.		
Add a Device Enrollment Program (DEP) token.		
Assign an enrollment profile.		
Create a device enrollment manager (DEM) account.		
Create a Windows AutoPilot self-deploying deployment profile.		
Create an Apple enrollment profile.		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Reference:
<https://docs.microsoft.com/en-us/intune/device-enrollment-program-enroll-ios>

NEW QUESTION 27

- (Exam Topic 4)
You need to ensure that feature and quality updates install automatically on a Windows to compute during a maintenance window.
Solution: in Group Policy. from the Windows Update settings, you enable Configure Automatic Updates, select 4 - Auto download and schedule the Install, and then enter a time.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 31

- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains computers that run Windows 8.1 and the users shown in the following table.

Name	Domain group membership	Local group membership
User1	Domain Users, Domain Admins	Administrators
User2	Domain Users, Remote Management Users	Users
User3	Domain Users	Administrators
User4	Domain Users	Remote Management Users

You plan to use the Microsoft Assessment and Planning (MAP) Toolkit to collect inventory data. The MAP Toolkit has the following configurations:

- Inventory scenario: Windows computers
- Discovery method: Use Active Directory Domain Services (AD DS)

You need to identify which user to use for the MAP Toolkit inventory discovery. The solution must use principle of least privilege.

What should you identify?

- A. User3
- B. User1
- C. User4
- D. User2

Answer: A

Explanation:

Reference:

<https://social.technet.microsoft.com/wiki/contents/articles/17808.map-toolkit-choose-a-discovery-method.aspx>

NEW QUESTION 34

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Windows Update settings, you enable Configure Automatic Updates, select 3 – Auto download and notify for Install, and then enter a time.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

NEW QUESTION 37

- (Exam Topic 4)

Your company uses Microsoft Intune.

More than 500 Android and iOS devices are enrolled in the Intune tenant.

You plan to deploy new Intune policies. Different policies will apply depending on the version of Android or iOS installed on the device.

You need to ensure that the policies can target the devices based on their version of Android or iOS. What should you configure first?

- A. Corporate device identifiers in Intune
- B. Device settings in Microsoft Azure Active Directory (Azure AD)
- C. Device categories in Intune
- D. Groups that have dynamic membership rules in Microsoft Azure Active Directory (Azure AD)

Answer: D

Explanation:

<https://blogs.technet.microsoft.com/pauljones/2017/08/29/dynamic-group-membership-in-azure-active-directory>

NEW QUESTION 41

- (Exam Topic 4)

Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD).

There are 500 domain-joined computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune.

You plan to implement Windows Defender Exploit Guard.

You need to create a custom Windows Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to use to configure the settings:

	▼
Security & Compliance in Microsoft 365	
Windows Configuration Designer	
Windows Defender Security Center	

Distribution method:

	▼
An Azure policy	
A Group Policy object (GPO)	
An Intune device compliance policy	

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/endpoint-protection-windows-10>

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-exploit-guard/enable-ex>

NEW QUESTION 44

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Azure Active Directory admin center, you modify the User settings and the Device settings.

Does this meet the goal?

- A. Yes
 B. No

Answer: B

Explanation:

Instead, from the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.

Reference:

<https://docs.microsoft.com/en-us/intune/protect/windows-hello>

NEW QUESTION 48

- (Exam Topic 4)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant.

The company has a Volume Licensing Agreement and uses a product key to activate Windows 10.

You plan to deploy Windows 10 Pro to 200 new computers by using the Microsoft Deployment Toolkit (MDT) and Windows Deployment Services (WDS).

You need to ensure that the new computers will be configured to have the correct product key during the installation.

What should you configure?

- A. a WDS boot image
 B. an MDT task sequence
 C. the Device settings in Azure AD
 D. a Windows AutoPilot deployment profile

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/deploy-a-windows-10-imageusing>

NEW QUESTION 52

- (Exam Topic 4)

Your company purchases new computers that run Windows 10. The computers have cameras that support Windows Hello for Business.

You configure the Windows Hello for Business Group Policy settings as shown in the following exhibit.

Setting	State	Comment
Phone Sign-in		
Allow enumeration of emulated smart card for all users	Not configured	No
Turn off smart card emulation	Not configured	No
Use PIN Recovery	Not configured	No
Use a hardware security device	Not configured	No
Use biometrics	Enabled	No
Configure device unlock factors	Not configured	No
Configure dynamic lock factors	Enabled	No
Use Windows Hello for Business	Enabled	No
Use certificate on-premises authentication	Not configured	No

What are two valid methods a user can use to sign in? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Facial recognition
- B. A smartwatch that is Bluetooth-enabled
- C. A PIN
- D. A USB key

Answer: AC

Explanation:

Reference:
<https://community.windows.com/en-us/stories/windows-sign-in-options> <https://fossbytes.com/how-to-unlock-windows-10/>

NEW QUESTION 55

- (Exam Topic 4)

Your on-premises network contains an Active Directory domain named contoso.com. You perform the following actions:

- > Purchase a new Microsoft 365 subscription.
- > Create a new user named User1.
- > Assign User1 the Security Administrator role.

You need to ensure that User1 can enable Conditional Access policies. What should User1 do first?

- A. Register for Azure Multi-Factor Authentication (MFA).
- B. Request the Conditional Access Administrator role.
- C. Disable Security defaults.
- D. Implement Azure AD Connect.

Answer: C

Explanation:

Microsoft provides security defaults that ensure a basic level of security enabled in tenants that don't have Azure AD Premium. With Conditional Access, you can create policies that provide the same protection as security defaults, but with granularity. Conditional Access and security defaults aren't meant to be combined as creating Conditional Access policies will prevent you from enabling security defaults.

Incorrect: Not B:

Not required. Goba administrator, security administrator, or Conditional Access administrator is enough. Reference: <https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/plan-conditional-access>

NEW QUESTION 59

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains devices enrolled in Microsoft Intune. You need to create Endpoint security policies to enforce the following requirements:

- > Computers that run macOS must have FileVault enabled.
- > Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled.
- > Computers that run Windows 10 must have Microsoft Defender Application Control enabled.

Which Endpoint security feature should you use for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features

Account protection

Attack surface reduction (ASR)

Disk encryption

Endpoint detection and response (EDR)

Answer Area

Computers that run macOS must have FileVault enabled:

Computers that run Windows 10 must have Microsoft Defender Application Control enabled:

Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled:

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Disk encryption

Computers that run macOS must have FileVault enabled.

Intune supports macOS FileVault disk encryption. FileVault is a whole-disk encryption program that is included with macOS. You can use Intune to configure FileVault on devices that run macOS 10.13 or later.

Box 2: Attack surface reduction (ASR)

Computers that run Windows 10 must have Microsoft Defender Application Control enabled. Attack surface reduction profiles include:

* Application control - Application control settings can help mitigate security threats by restricting the applications that users can run and the code that runs in the System Core (kernel). Manage settings that can block unsigned scripts and MSIs, and restrict Windows PowerShell to run in Constrained Language Mode.

Note: Attack surface reduction rules target certain software behaviors, such as: Launching executable files and scripts that attempt to download or run files

Running obfuscated or otherwise suspicious scripts

Performing behaviors that apps don't usually initiate during normal day-to-day work

Box 3: Account protection
Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled.

The account protection policy is focused on settings for Windows Hello and Credential Guard, which is part of Windows identity and access management.

Note: Microsoft Defender Credential Guard protects against credential theft attacks. It isolates secrets so that only privileged system software can access them.

Reference: <https://learn.microsoft.com/en-us/mem/intune/protect/encrypt-devices-filevault> <https://learn.microsoft.com/en-us/mem/intune/protect/endpoint-security-account-protection-policy> <https://learn.microsoft.com/en-us/mem/intune/protect/endpoint-security-asr-policy>

NEW QUESTION 64

- (Exam Topic 4)

You have a Microsoft 365 E5 tenant that connects to Microsoft Defender for Endpoint. You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Windows 8.1
Device3	iOS
Device4	Android

You plan to use risk levels in Microsoft Defender for Endpoint to identify whether a device is compliant.

Noncompliant devices must be blocked from accessing corporate resources.

You need to identify which devices can be onboarded to Microsoft Defender for Endpoint, and which Endpoint security policies must be configured.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Devices that can onboard to Microsoft Defender for Endpoint:

Device 1 only

Device 1 and Device 2 only

Device 1 and Device 3 only

Device 1 and Device 4 only

Device 1, Device 2, and Device 4 only

Device 1, Device 2, Device 3, and Device 4

Endpoint security policies that must be configured:

A conditional access policy only

A device compliance policy only

A device configuration profile only

A device configuration profile and a conditional access policy only

Device configuration profile, device compliance policy, and conditional access policy

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Device 1, Device2, Device 3, and Device 4

Supported Windows versions include Windows 8.1 and Windows 10 Other supported operating systems

Android iOS Linux macOS

Box 2: Device configuration profile, device compliance policy, and conditional access policy We need all three policies.

Establish a service-to-service connection between Intune and Microsoft Defender for Endpoint. This connection lets Microsoft Defender for Endpoint collect data about machine risk from supported devices you manage with Intune.

Use a device configuration profile to onboard devices with Microsoft Defender for Endpoint. You onboard devices to configure them to communicate with Microsoft Defender for Endpoint and to provide data that helps assess their risk level.

Use a device compliance policy to set the level of risk you want to allow. Risk levels are reported by Microsoft Defender for Endpoint. Devices that exceed the allowed risk level are identified as noncompliant.

Use a conditional access policy to block users from accessing corporate resources from devices that are noncompliant.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/minimum-requirements> <https://docs.microsoft.com/en-us/mem/intune/protect/advanced-threat-protection#onboard-devices-by-using-a-c>

NEW QUESTION 69

- (Exam Topic 4)

You use Microsoft Intune to manage Windows updates.

You have computers that run Windows 10. The computers are in a workgroup and are enrolled in Intune. The computers are configured as shown in the following table.

Name	Tag	Member of
Computer1	None	Group1
Computer2	Tag2	Group2
Computer3	Tag3	Group3

On each computer, the Select when Quality Updates are received Group Policy setting is configured as shown in the following table.

Name	State	Configuration
Computer1	Not configured	<i>Not applicable</i>
Computer2	Enabled	Deferral period of 5 days
Computer3	Disabled	<i>Not applicable</i>

You have Windows 10 update rings in Intune as shown in the following table.

Name	Quality update deferral period (days)	Scope (Tags)	Assignment
Ring1	2	Tag1	Group1
Ring2	7	Tag2	Group2
Ring3	14	Tag2	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
On Computer1, quality updates will be deferred for two days.	<input type="radio"/>	<input type="radio"/>
On Computer2, quality updates will be deferred for seven days.	<input type="radio"/>	<input type="radio"/>
On Computer3, quality updates will be deferred for 14 days.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
On Computer1, quality updates will be deferred for two days.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer2, quality updates will be deferred for seven days.	<input checked="" type="radio"/>	<input type="radio"/>
On Computer3, quality updates will be deferred for 14 days.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 74

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You assign an Enterprise Mobility + Security license to User1. You instruct User1 to sign in to Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 79

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM) You need to deploy the Microsoft Office 365 ProPlus suite to all the computers. What should you do?

- A. From Microsoft Azure Active Directory (Azure AD), add an app registration.
- B. From the Device Management admin center, add an app.
- C. From the Device Management admin center, create a Windows 10 device profile.
- D. From Microsoft Azure Active Directory (Azure AD), add an enterprise application

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/client-management/mdm/enterprise-app-management#application-management>

NEW QUESTION 80

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (AD) and enrolled in Microsoft Intune.

You need to enable self-service password reset on the sign-in screen.

Which settings should you configure from the Microsoft Intune blade?

- A. Device configuration
- B. Device compliance
- C. Device enrollment
- D. Conditional access

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-sspr-windows>

NEW QUESTION 81

- (Exam Topic 4)

You have 100 Windows 10 devices that are managed by using Microsoft Endpoint Manager. You plan to sideload an app to the devices.

You need to configure Microsoft Endpoint Manager to enable sideloading.

Which device profile type and setting should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device profile type:

Administrative Templates
Device restrictions
Endpoint protection
PKCS certificate

Setting:

Apps from store only
Developer unlock
Enable Dynamic Virtualization
Trusted app installation

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-windows-10>

NEW QUESTION 85

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.

Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 86

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune to manage personal and corporate devices. The tenant contains three Windows 10 devices as shown in the following exhibit.

Name	Enabled	OS	Version	Join Type	Owner	MDM	Compliant
 LON-CL2	 Yes	Windows	10.0.17763.615	Azure AD registered	User2	Microsoft Intune	 Yes
 LON-CL4	 Yes	Windows	10.0.17763.107	Azure AD joined	User1	Microsoft Intune	 Yes

How will Intune classify each device after the devices are enrolled in Intune automatically? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Identified by Intune as a personal device:

LON-CL2 only

LON-CL4 only

Both LON-CL2 and LON-CL4

Neither LON-CL2 or LON-CL4

Identified by Intune as a corporate device:

LON-CL2 only

LON-CL4 only

Both LON-CL2 and LON-CL4

Neither LON-CL2 or LON-CL4

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated

NEW QUESTION 88

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Windows Update settings, you enable Configure Automatic Updates, select 4-Auto download and schedule the install, and then enter a time.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

NEW QUESTION 93

- (Exam Topic 4)

Your company standardizes on Windows 10 Enterprise for all users.

Some users purchase their own computer from a retail store. The computers run Windows 10 Pro.

You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Microsoft Azure Active Directory (Azure AD), and install several Microsoft Store apps. The solution must meet the following requirements:

- Ensure that any applications installed by the users are retained.
- Minimize user intervention.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Microsoft Deployment ToolKit (MDT)
- B. Windows Deployment Services (WDS)
- C. a Windows Configuration Designer provisioning package
- D. Windows AutoPilot

Answer: C

Explanation:

You use Windows Configuration Designer to create a provisioning package (.ppkg) that contains customization settings. You can apply the provisioning package to a device running Windows 10.

NEW QUESTION 96

- (Exam Topic 4)

Your company has a Microsoft 365 subscription.

All the users in the finance department own personal devices that run iOS or Android. All the devices are enrolled in Microsoft Intune.

The finance department adds new users each month.

The company develops a mobile application named App1 for the finance department users. You need to ensure that only the finance department users can download App1.

What should you do first?

- A. Add App1 to Intune.
- B. Add App1 to a Microsoft Deployment Toolkit (MDT) deployment share.
- C. Add App1 to Microsoft Store for Business.
- D. Add App1 to the vendor stores for iOS and Android applications.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/apps-add>

NEW QUESTION 99

- (Exam Topic 4)

You have a Windows 10 device named Computer1 enrolled in Microsoft Intune.

You need to configure Computer1 as a public workstation that will run a single customer-facing, full-screen application.

Which template should you use to create a configuration profile for Computer1 in the Microsoft Endpoint Manager admin center?

- A. Kiosk
- B. Device restrictions
- C. Shared multi-user device
- D. Endpoint protection

Answer: A

Explanation:

On Windows 10/11 devices, you can configure these devices to run in single-app kiosk mode. On Windows 10 devices, you can configure these devices to run in multi-app kiosk mode.

Single app, full-screen kiosk

Runs only one app on the device, such as a web browser or Store app.

* Select a kiosk mode: Choose Single app, full-screen kiosk.

* Etc.

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/kiosk-settings-windows>

NEW QUESTION 102

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the devices shown in the following table.

Name	Member of
Device1	Group1
Device2	Group1
Device3	Group1

The devices are managed by using Microsoft Intune.

You create a compliance policy named Policy1 and assign Policy1 to Group1. Policy1 is configured to mark a device as Compliant only if the device security settings match the settings specified in the policy.

You discover that devices that are not members of Group1 are shown as Compliant.

You need to ensure that only devices that are assigned a compliance policy can be shown as Compliant. All other devices must be shown as Not compliant.

What should you do?

- A. From Tenant administration, modify the Diagnostic settings.
- B. From Device compliance, configure the Compliance policy settings.
- C. From Endpoint security, configure the Conditional access
- D. From Policy1, modify the actions for noncompliance.

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 107

- (Exam Topic 4)

You need to assign the same deployment profile to all the computers that are configured by using Windows Autopilot.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: each correct selection is worth one point.

- A. Join the computers to Microsoft Azure Active Directory (Azure AD)
- B. Assign a Windows AutoPilot deployment profile to a group
- C. Join the computers to an on-premises Active Directory domain
- D. Create a Microsoft Azure Active Directory (Azure AD) group that has dynamic membership rules and uses the operatingSystem tag
- E. Create a Group Policy object (GPO) that is linked to a domain
- F. Create a Microsoft Azure Active Directory (Azure AD) group that has dynamic membership rules and uses the ZTDID tag

Answer: BF

Explanation:

References:

<https://www.petervanderwoude.nl/post/automatically-assign-windows-autopilot-deployment-profile-to-windows>

NEW QUESTION 111

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD).

You have a Microsoft 365 subscription.

You create a conditional access policy for Microsoft Exchange Online.

You need to configure the policy to prevent access to Exchange Online unless is connecting from a device that is hybrid Azure AD-joined.

Which settings should you configure?

- A. Locations
- B. Device platforms
- C. Sign-in risk
- D. Device state

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/conditions#device-state>

NEW QUESTION 115

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	iOS
Device3	Android Enterprise

You need to ensure that only devices running trusted firmware or operating system builds can access network resources.

Which compliance policy setting should you configure for each device? To answer, drag the appropriate settings to the correct devices. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings	Answer Area
Require BitLocker.	Device1: <input type="text" value="Setting"/>
Prevent jailbroken devices from having corporate access.	Device2: <input type="text" value="Setting"/>
Prevent rooted devices from having corporate access.	Device3: <input type="text" value="Setting"/>
Require Secure Boot to be enabled on the device.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1:

Device Compliance settings for Windows 10/11 in Intune

There are the different compliance settings you can configure on Windows devices in Intune. As part of your mobile device management (MDM) solution, use these settings to require BitLocker, set a minimum and maximum operating system, set a risk level using Microsoft Defender for Endpoint, and more.

Note: Windows Health Attestation Service evaluation rules Require BitLocker:

Windows BitLocker Drive Encryption encrypts all data stored on the Windows operating system volume. BitLocker uses the Trusted Platform Module (TPM) to help protect the Windows operating system and user data. It also helps confirm that a computer isn't tampered with, even if its left unattended, lost, or stolen. If the computer is equipped with a compatible TPM, BitLocker uses the TPM to lock the encryption keys that protect the data. As a result, the keys can't be accessed until the TPM verifies the state of the computer.

Not configured (default) - This setting isn't evaluated for compliance or non-compliance.

Require - The device can protect data that's stored on the drive from unauthorized access when the system is off, or hibernates.

Box 2: Prevent jailbroken devices from having corporate access Device Compliance settings for iOS/iPadOS in Intune

There are different compliance settings you can configure on iOS/iPadOS devices in Intune. As part of your mobile device management (MDM) solution, use these settings to require an email, mark rooted (jailbroken) devices as not compliant, set an allowed threat level, set passwords to expire, and more.

Device Health

Jailbroken devices

Supported for iOS 8.0 and later

Not configured (default) - This setting isn't evaluated for compliance or non-compliance. Block - Mark rooted (jailbroken) devices as not compliant.

Box 3: Prevent rooted devices from having corporate access. Device compliance settings for Android Enterprise in Intune

There are different compliance settings you can configure on Android Enterprise devices in Intune. As part of your mobile device management (MDM) solution, use these settings to mark rooted devices as not compliant, set an allowed threat level, enable Google Play Protect, and more.

Device Health - for Personally-Owned Work Profile Rooted devices

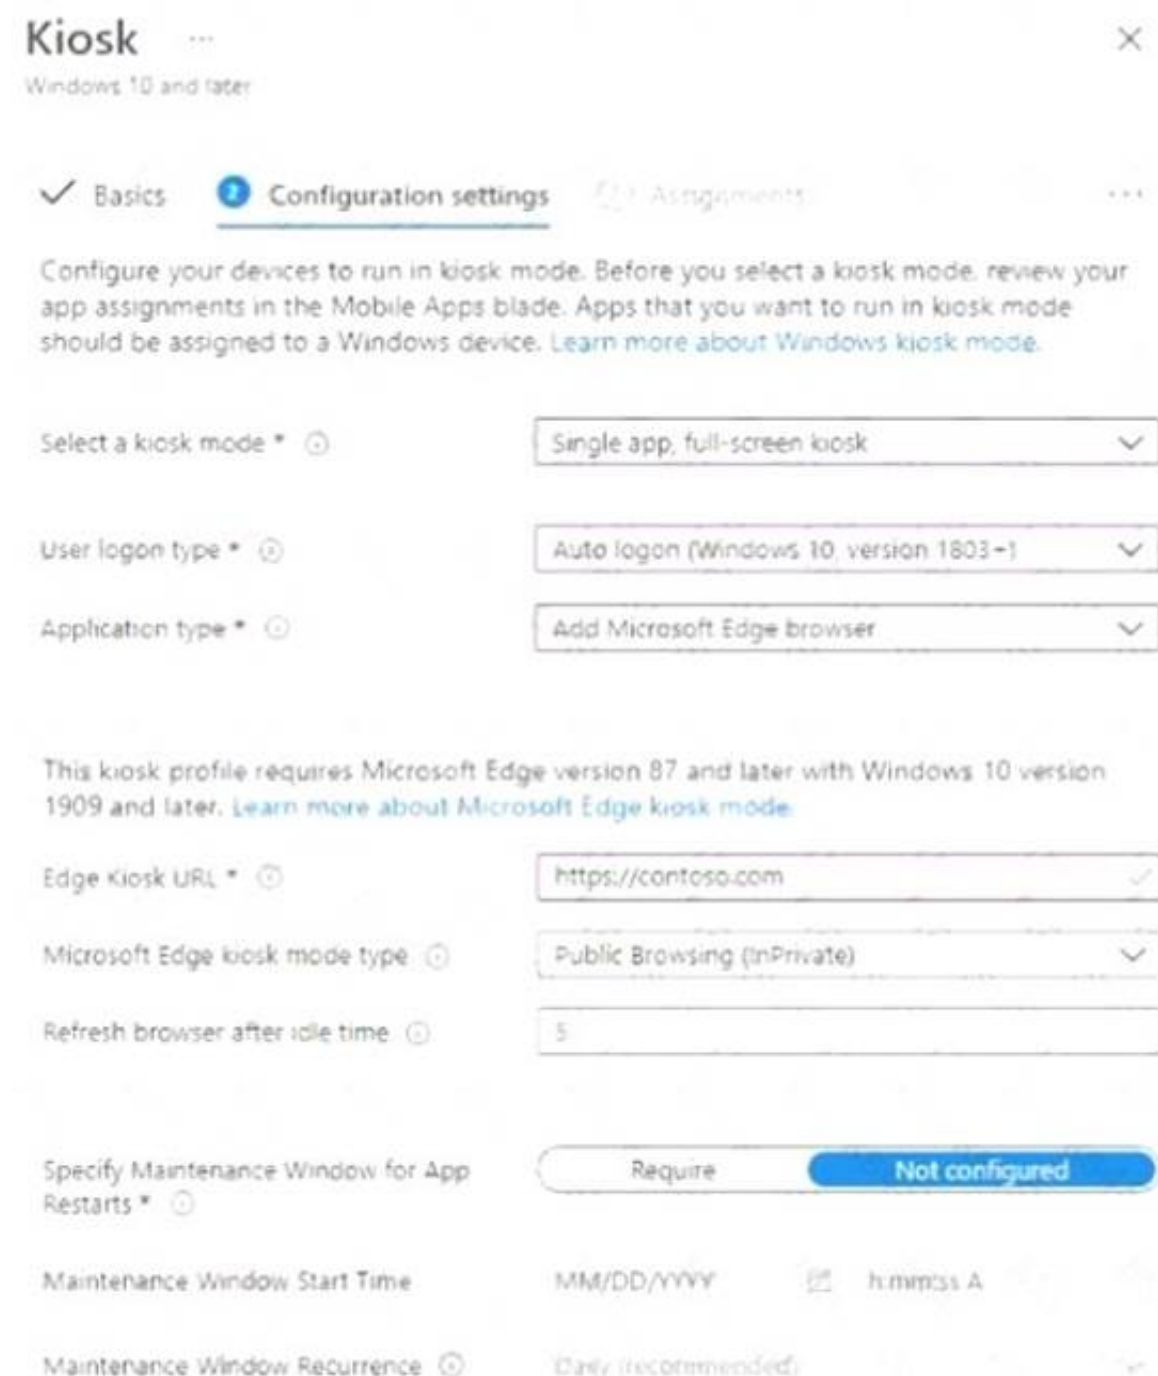

Not configured (default) - This setting isn't evaluated for compliance or non-compliance. Block - Mark rooted devices as not compliant.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-windows> <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-android-for-work> <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-ios>

NEW QUESTION 118

- (Exam Topic 4)

You have the device configuration profile shown in the following exhibit.

Kiosk ...

Windows 10 and later

✓ Basics **3 Configuration settings** ... Assignments ...

Configure your devices to run in kiosk mode. Before you select a kiosk mode, review your app assignments in the Mobile Apps blade. Apps that you want to run in kiosk mode should be assigned to a Windows device. [Learn more about Windows kiosk mode.](#)

Select a kiosk mode * ⓘ Single app, full-screen kiosk

User logon type * ⓘ Auto logon (Windows 10, version 1803+) ⓘ

Application type * ⓘ Add Microsoft Edge browser ⓘ

This kiosk profile requires Microsoft Edge version 87 and later with Windows 10 version 1909 and later. [Learn more about Microsoft Edge kiosk mode.](#)

Edge Kiosk URL * ⓘ https://contoso.com ✓

Microsoft Edge kiosk mode type ⓘ Public Browsing (InPrivate) ⓘ

Refresh browser after idle time ⓘ 5

Specify Maintenance Window for App Restarts * ⓘ Require **Not configured**

Maintenance Window Start Time MM/DD/YYYY ⓘ h:mm:ss A ⓘ

Maintenance Window Recurrence ⓘ Daily (recommended) ⓘ

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic NOTE: Each correct selection is worth one point.

Answer Area

Users

can access any URL.
 cannot view the address bar in Microsoft Edge.
 can only access URLs that include contoso.com.
 can only access URLs that start with https://contoso.com/ .

Windows 10 devices can have

a single Microsoft Edge instance that has a single tab.
 a single Microsoft Edge instance that has multiple tabs.
 multiple Microsoft Edge instances that have multiple tabs.
 multiple Microsoft Edge instances that each has a single tab.

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: can access any URL.

Public Browsing (InPrivate): Runs a limited multi-tab version of Microsoft Edge. Users can browse publicly, or end their browsing session.

Box 2: a single Microsoft Edge instance that has multiple tabs

Single app, full-screen kiosk runs only one app on the device, such as a web browser or Store app. Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/kiosk-settings-windows>

NEW QUESTION 121

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Directory group named Group1 that contains Windows 10 Enterprise devices and Windows 10 Pro devices.

From Microsoft Intune, you create a device configuration profile named Profile1.

You need to ensure that Profile1 applies to only the Windows 10 Enterprise devices in Group1.

Solution: You create a scope tag, and then you add the scope tag to the Windows 10 Enterprise devices. You edit the settings of Profile1.

Does this meet the goal?

- A. Yes
 B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-create>

NEW QUESTION 123

- (Exam Topic 4)

You have computers that run Windows 10 and are managed by using Microsoft Intune. Users store their files in a folder named D:\Folder1.

You need to ensure that only a trusted list of applications is granted write access to D:\Folder1. What should you configure in the device configuration profile?

- A. Microsoft Defender SmartScreen
 B. Microsoft Defender Exploit Guard
 C. Microsoft Defender Application Guard
 D. Microsoft Defender Application Control

Answer: B

Explanation:

Reference:

<https://www.microsoft.com/security/blog/2017/10/23/windows-defender-exploit-guard-reduce-the-attacksurface-against-next-generation-malware/>

NEW QUESTION 126

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD). The domain contains the users shown in the following table.

Name	Source	User profile path
User1	Windows Active Directory	\\Server1.contoso.com\users\User1
User2	Azure Active Directory	Not applicable

Enterprise State Roaming is enabled for User2.

You have the computers shown in the following table.

Name	Operating system	Joined to
Computer1	Windows 10	Azure AD tenant
Computer2	Windows 8.1	On-premises Active Directory domain
Computer3	Windows 10	Azure AD tenant

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer2.	<input type="radio"/>	<input type="radio"/>
If User1 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer3.	<input type="radio"/>	<input type="radio"/>
If User2 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
If User1 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>
If User1 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer3.	<input type="radio"/>	<input checked="" type="radio"/>
If User2 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer3.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 131

- (Exam Topic 4)

You have 100 devices that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD). You need to prevent users from joining their home computer to Azure AD.
What should you do?

- A. From the Device enrollment blade in the Intune admin center, modify the Enrollment restriction settings.
- B. From the Devices blade in the Azure Active Directory admin center, modify the Device settings.
- C. From the Device enrollment blade in the Intune admin center, modify the Device enrollment manages settings.
- D. From the Mobility (MDM and MAM) blade in the Azure Active Directory admin center, modify the Microsoft Intune enrollment settings.

Answer: B

Explanation:

References:
<https://docs.microsoft.com/en-us/intune/enrollment-restrictions-set>

NEW QUESTION 132

- (Exam Topic 4)

You have a Microsoft 365 subscription.
You need to deploy Microsoft Office 365 ProPlus applications to Windows 10 devices. What should you do first?

- A. From Microsoft Azure Active Directory (Azure AD), create an app registration.
- B. From the Device Management admin center, create an app.
- C. From the Device Management admin center, create an app configuration policy.
- D. From the Device Management admin center, enable Microsoft Store for Business synchronization

Answer: B

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365>

NEW QUESTION 133

- (Exam Topic 4)
You have a Microsoft 365 tenant that uses Microsoft Intune.
You use the Company Portal app to access and install published apps to enrolled devices. From the Microsoft Endpoint Manager admin center, you add a Microsoft Store app. Which two App information types are visible in the Company Portal?
Note: Each correct selection is worth one point.

- A. information URL
- B. Developer
- C. Privacy URL
- D. Owner

Answer: BC

NEW QUESTION 135

- (Exam Topic 4)
You have a Microsoft 365 tenant that contains the objects shown in the following table.

Name	Type
Admin1	User
Group1	Microsoft 365 group
Group2	Distribution group
Group3	Mail-enabled security group
Group4	Security group

In the Microsoft Endpoint Manager admin center, you are creating a Microsoft 365 Apps app named App1. To which objects can you assign App1?

- A. Admin1, Group3. and Group4 only
- B. Group1, Group2. Group3. and Group4 only
- C. Admin1, Group1, Group2. Group3, and Group4
- D. Group1, Group3, and Group4 only
- E. Group3 and Group4 only

Answer: D

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy>
<https://docs.microsoft.com/en-us/microsoft-365/admin/create-groups/compare-groups?view=o365-worldwide>

NEW QUESTION 137

- (Exam Topic 4)
Your company has a Microsoft 365 subscription.
The company uses Microsoft Intune to manage all devices.
The company uses conditional access to restrict access to Microsoft 365 services for devices that do not comply with the company’s security policies.
You need to identify which devices will be prevented from accessing Microsoft 365 services. What should you use?

- A. The Device Health solution in Windows Analytics.
- B. Windows Defender Security Center.
- C. The Device compliance blade in the Intune admin center.
- D. The Conditional access blade in the Azure Active Directory admin center.

Answer: C

NEW QUESTION 140

- (Exam Topic 4)
You have an Azure Active Directory (Azure AD) tenant that syncs to an on-premises Active Directory domain.
The tenant contains computers that run Windows 10. The computers are hybrid Azure AD joined and enrolled in Microsoft Intune. The Microsoft Office settings on the computers are configured by using a Group Policy Object (GPO).
You need to migrate the GPO to Intune.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Import an ADMX file.

Assign the policy.

Create a configuration profile.

Assign the profile.

Configure the Administrative Templates settings.

Set a scope tag to the policy.

Create a compliance policy.

NEW QUESTION 141

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You redirect Windows known folders to Microsoft OneDrive for Business. Which folder will be included in the redirection?

- A. Saved Games
- B. Desktop
- C. Music
- D. Downloads

Answer: B

Explanation:

References:
<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders>

NEW QUESTION 144

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You create a new Windows AutoPilot self-deploying deployment profile. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/self-deploying>

NEW QUESTION 148

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: From File Explorer, you go to C:\Folder1, and then you double-click the Package1.ppkg file.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:
<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 151

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Member of	Multi-factor authentication (MFA) status
User1	Group1	Disabled
User2	Group1	Enforced

MFA has a trusted IP address range of 123.30.20.0/24.

You have the Azure AD named locations shown in the following table.

Name	IP address range	Trusted
Location1	64.10.10.0/24	Yes
Location2	210.77.11.0/24	No

You create a Conditional Access policy that has the following settings:

- > Name: CAPolicy1
- > Assignments
 - Users or workload identities
 - Include: Group1
 - Cloud apps or actions: App1 Conditions
- = Locations
 - Include: All trusted locations
- > Access controls
 - Grant access
 - Require multi-factor authentication

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 connects to App1 from a device that has an IP address of 210.77.11.10, the user will be prompted for MFA.	<input type="radio"/>	<input type="radio"/>
If User1 connects to App1 from a device that has an IP address of 64.10.10.15, the user will be prompted for MFA.	<input type="radio"/>	<input type="radio"/>
If User2 connects to App1 from a device that has an IP address of 123.30.20.10, the user will be prompted for MFA.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes
Location2 is not trusted.
Box 2: No
Location1 is trusted.
Box 3: No
MFA IP range is also trusted.
Reference:
<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-policy-all>

NEW QUESTION 152

- (Exam Topic 4)
You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You need to set a custom image as the wallpaper and sign-in screen. Which two settings should you configure in Device restrictions? To answer, select the appropriate settings in the answer area.
NOTE: Each correct selection is worth one point.

NEW QUESTION 153

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and 150 Windows 10 devices. All the devices are enrolled in Microsoft Intune. You need to use Intune to apply Windows updates to the devices. What should you do first?

- A. From the Microsoft Endpoint Manager admin center, configure scope tags.
- B. Create a device restriction policy that has telemetry set to the minimum setting of Required
- C. From the Microsoft Endpoint Manager admin center, configure a security baseline.
- D. Create a device restriction policy that has telemetry set to Security (Enterprise Only).

Answer: A

NEW QUESTION 155

- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains 5,000 computers that run Windows 10. All users use Roaming User Profiles. Some users report that it takes a long time to sign in to the computers. You discover that the users have user profiles that are larger than 1 GB. You need to reduce the amount of time it takes for the users to sign in. What should you configure?

A. Delivery Optimization in the Settings app
B. Folder Redirection by using a Group Policy Object (GPO)
C. Microsoft User Experience Virtualization (UE-V) by using PowerShell
D. Sync your settings in the Settings app

Answer: C

Explanation:

Answer: A

Explanation:
Reference:
<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-smartscreen/windows-d>

NEW QUESTION 162

- (Exam Topic 4)
You are creating a device configuration profile in Microsoft Intune. You need to configure specific OMA-URI settings in the profile. Which profile type should you use?

A. Identity protection
B. Custom
C. Device restrictions (Windows 10 Team)
D. Device restrictions

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/custom-settings-windows-10>

NEW QUESTION 166

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 100 devices enrolled in Microsoft Intune. You need to review the startup processes and how often each device restarts.

What should you use?

- A. Endpoint analytics
- B. Intune Data Warehouse
- C. Azure Monitor
- D. Device Management

Answer: B

NEW QUESTION 169

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Hello for Business is an alternative sign-in method that uses Active Directory or an Azure Active Directory account to replace a password, smart card, or a virtual smart card. It lets you use a user gesture to sign in, instead of a password. A user gesture might be a PIN, biometric authentication such as Windows Hello, or an external device such as a fingerprint reader.

Intune integrates with Hello for Business in two ways:

An Intune policy can be created under Device enrollment. This policy targets the entire organization

(tenant-wide). It supports the Windows AutoPilot out-of-box-experience (OOBE) and is applied when a device enrolls.

An identity protection profile can be created under Device configuration. This profile targets assigned users and devices, and is applied during check-in.

References:

<https://docs.microsoft.com/en-us/intune/protect/windows-hello>

NEW QUESTION 174

- (Exam Topic 4)

Your company has an internal portal that uses a URL of <http://contoso.com>.

The network contains computers that run Windows 10. The default browser on all the computers is Microsoft Edge.

You need to ensure that all users only use Internet Explorer to connect to the internal portal. The solution must ensure that Microsoft Edge can be used to connect to all other websites.

What should you do from each computer?

- A. From Internet Explorer, configure the Compatibility View settings
- B. From the local policy, configure Enterprise Mode
- C. From Microsoft Edge, configure the Advanced Site Settings
- D. From the Settings app, configure the default web browser settings

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-edge/deploy/emie-to-improve-compatibility>

NEW QUESTION 179

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You create a terms of use (ToU) named Terms1 in contoso.com.

You are creating a conditional access policy named Policy1 to assign a cloud app named App1 to the users in contoso.com.

You need to configure Policy1 to require the users to accept Terms1. What should you configure in Policy1?

- A. Grant in the Access controls section
- B. Conditions in the Assignments section
- C. Cloud apps or actions in the Assignments section
- D. Session in the Access controls section

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/require-tou>

NEW QUESTION 184

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: You install the Microsoft Assessment and Planning Toolkit. From the Microsoft Assessment and Planning Toolkit, you collect inventory data and run the Windows 8.1 Readiness scenario.

Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 185

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune.

From the Microsoft Endpoint Manager admin center, you plan to create a baseline to monitor the Startup score and the App reliability score of enrolled Windows 10 devices.

You need to identify which tool to use to create the baseline and the minimum number of devices required to create the baseline.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to use:

Workbooks
Log Analytics
Endpoint analytics
Security baselines

Minimum number of devices:

1
5
10
25

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application, table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/analytics/scores#understanding-scores>

NEW QUESTION 190

- (Exam Topic 4)

Your company has several Windows 10 devices that are enrolled in Microsoft Intune.

You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup. You need to enroll Computer1 in Intune.

Solution: From Computer1, you sign in to <https://portal.manage.microsoft.com> and use the Devices tab. Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Use MDM enrolment.

MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods>

NEW QUESTION 194

- (Exam Topic 4)

You have a public computer named Public1 that runs Windows 10. Users use Public1 to browse the Internet by using Microsoft Edge.

You need to view events associated with website phishing attacks on Public1. Which Event Viewer log should you view?

A. Applications and Services Logs > Microsoft\Windows > DeviceGuard > Operational

B. Applications and Services Logs > Microsoft > Windows > Security-Mitigations> User Mode

- C. Applications and Services Logs > Microsoft > Windows > SmartScreen > Debug
D. Applications and Services Logs > Microsoft > Windows > Windows Defender > Operational

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-smartscreen/microsoft-defender-smartscreen-overview#viewing-windows-event-logs-for-microsoft-defender-smartscreen>

NEW QUESTION 199

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer is used by a user named User1. You need to ensure that when User1 opens websites from untrusted locations by using Microsoft Edge, Microsoft Edge runs in isolated container. What should you do first?

- A. From Windows Features, turn on Windows Defender Application Guard.
B. From Windows Security, configure the Device security settings.
C. From Windows Security, configure the Virus & threat protection settings.
D. From Windows Features, turn on Hyper-V Platform.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-application-guard/wd-a> <https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-application-guard/instal>

NEW QUESTION 202

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The domain contains 500 laptops that run Windows 8.1 Professional. The users of the laptops work from home.

Your company uses Microsoft Intune, the Microsoft Deployment Toolkit (MDT), and Windows Configuration Designer to manage client computers.

The company purchases 500 licenses for Windows 10 Enterprise.

You verify that the hardware and applications on the laptops are compatible with Windows 10.

The users will bring their laptop to the office, where the IT department will deploy Windows 10 to the laptops while the users wait.

You need to recommend a deployment method for the laptops that will retain their installed applications. The solution must minimize how long it takes to perform the deployment.

What should you include in the recommendation?

- A. an in-place upgrade
B. a clean installation by using a Windows Configuration Designer provisioning package
C. Windows AutoPilot
D. a clean installation and the User State Migration Tool (USMT)

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios#in-place-upgrade>

NEW QUESTION 203

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains two users named User1 and User2. You need to ensure that the users can perform the following tasks:

- User1 must be able to create groups and manage users.
- User2 must be able to reset passwords for nonadministrative users.

The solution must use the principle of least privilege.

Which role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Roles	Answer Area
Global Administrator	User1: <input type="text"/>
Helpdesk Administrator	User2: <input type="text"/>
Security Administrator	
User Administrator	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: User Administrator User admin

Assign the user admin role to users who you want to access and manage user password resets and manage users and groups. They can also open and manage

support requests to Microsoft support.

Box 2: Helpdesk Administrator

Assign the Helpdesk admin role to users who want to reset passwords, force users to sign out for any security issues. They can also open and manage support requests to Microsoft support. The Helpdesk admin can only help non-admin users and users assigned these roles: Directory reader, Guest inviter, Helpdesk admin, Message center reader, and Reports reader.

Reference: <https://docs.microsoft.com/en-us/microsoft-365/admin/add-users/admin-roles-page>

NEW QUESTION 208

- (Exam Topic 4)

You have a Microsoft 365 subscription. All devices run Windows 10.

You need to prevent users from enrolling the devices in the Windows Insider Program.

What two configurations should you perform from Microsoft 365 Device Management? Each correct answer is a complete solution.

NOTE: Each correct selection is worth one point.

- A. a device restrictions device configuration profile
- B. an app configuration policy
- C. a custom device configuration profile
- D. a Windows 10 security baseline
- E. a Windows 10 update ring

Answer: BE

NEW QUESTION 210

- (Exam Topic 4)

Your company uses Microsoft Intune to manage devices. You need to ensure that only Android devices that use Android work profiles can enroll in Intune.

Which two configurations should you perform in the device enrollment restrictions? Each correct answer presents part of the solution.

NOTE: each correct selection is worth one point.

- A. From Select platforms, set Android work profile to Allow.
- B. From Configure platforms, set Android Personally Owned to Block.
- C. From Configure platforms, set Android Personally Owned to Allow.
- D. From Select platforms, set Android to Block.

Answer: AD

Explanation:

<https://docs.microsoft.com/en-us/Intune/enrollment-restrictions-set>

NEW QUESTION 215

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You need to configure access to Microsoft Office 365 for unmanaged devices. The solution must meet the following requirements:

- Allow only the Microsoft Intune Managed Browser to access Office 365 web interfaces.
- Ensure that when users use the Intune Managed Browser to access Office 365 web interfaces, they can only copy data to applications that are managed by the company.

Which two settings should you configure from the Microsoft Intune blade? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/app-configuration-managed-browser#application-protection-policies-for>

NEW QUESTION 217

- (Exam Topic 4)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. All users have computers that run Windows 10. The computers are joined to Azure AD and managed by using Microsoft Intune.

You need to ensure that you can centrally monitor the computers by using the Update Compliance solution.

What should you create in Intune?

- A. a device configuration profile
- B. a conditional access policy
- C. a device compliance policy
- D. an update policy

Answer: A

Explanation:

Reference:

<https://www.jeffgilb.com/update-compliance-with-intune/>

NEW QUESTION 222

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD)

You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.

You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computer.

What should you use?

- A. Roaming user profiles
- B. Folder Redirection
- C. The Microsoft SharePoint Migration Tool
- D. Enterprise State Roaming

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-faqs>

NEW QUESTION 227

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer that runs Windows 8.1.
Two days ago, you upgraded the computer to Windows 10. You need to downgrade the computer to Windows 8.1. Solution: From the Settings app, you use the Recovery options. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:
https://answers.microsoft.com/en-us/windows/forum/windows_10-windows_install/how-to-recover-restore-your

NEW QUESTION 228

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com.
You plan to create a Conditional Access policy to block users that have a high sign-in risk level.
You need to identify the required license, and what to use to identify the sign-in risk level. The solution must minimize costs.
To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

License:

Azure Active Directory Premium Plan 1

Azure Active Directory Premium Plan 2

Microsoft Office 365 E3

Use:

Azure AD Identity Protection

Security defaults

Verifiable credentials

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Azure AD Premium Plan 2
You will need an Azure AD Premium P1 license to get access to the Microsoft Office 365 conditional access policy feature.
However, need Azure AD Premium Plan 2 to sign-in risk. Box 2: Azure AD Identity Protection
A sign-in risk represents the probability that a given authentication request isn't authorized by the identity owner. Organizations with Azure AD Premium P2 licenses can create Conditional Access policies incorporating Azure AD Identity Protection sign-in risk detections.
Reference:
<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-policy-risk>
<https://blog.mydock365.com/what-is-conditional-access-in-microsoft-365>

NEW QUESTION 233

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com.
You create a provisioning package named Package1 as shown in the following exhibit.

Steps	Summary
Set up device	Set up device Enter device name: Comp%RAND:1% Share devices: No Remove pre-installed software: No
Set up network	Network settings Network: Wired
Account management	Account management Domain name: Contoso.com Domain user name: contoso\administrator Domain user password: *****
Add applications	Add applications
Add certificates	Add certificates
Finish	Protect your package Protect the content of your package by specifying a password. The password length must be 8-16 characters.

☐ No

What is the maximum number of devices on which you can run Package1 successfully?

- A. 1
- B. 10
- C. 25
- D. unlimited

Answer: D

NEW QUESTION 235

- (Exam Topic 4)

Your company implements Microsoft Azure Active Directory (Azure AD), Microsoft 365, Microsoft Intune, and Azure Information Protection. The company's security policy states the following:

- > Personal devices do not need to be enrolled in Intune.
- > Users must authenticate by using a PIN before they can access corporate email data.
- > Users can use their personal iOS and Android devices to access corporate cloud services.
- > Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.

You need to configure a solution to enforce the security policy. What should you create?

- A. a data loss prevention (DLP) policy from the Security & Compliance admin center
- B. a supervision policy from the Security & Compliance admin center
- C. an app protection policy from the Intune admin center
- D. a device configuration profile from the Intune admin center

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/app-protection-policy>

NEW QUESTION 238

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You plan to enroll devices in Microsoft Endpoint Manager that have the platforms and versions shown in the following table.

Platform	Version
Android	8, 9
iOS	11, 12

You need to configure device enrollment to meet the following requirements:

- > Ensure that only devices that have approved platforms and versions can enroll in Endpoint Manager.
- > Ensure that devices are added to Microsoft Azure Active Directory (Azure AD) groups based on a selection made by users during the enrollment.

Which device enrollment setting should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Ensure that only devices that have approved platforms and versions can enroll in Endpoint Manager:

	▼
Android enrollment	
Apple enrollment	
Corporate device identifiers	
Device categories	
Enrollment restrictions	
Windows enrollment	

Ensure that devices are added to Azure AD groups based on a selection made by users during enrollment:

	▼
Android enrollment	
Apple enrollment	
Corporate device identifiers	
Device categories	
Enrollment restrictions	
Windows enrollment	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set> <https://docs.microsoft.com/en-us/mem/intune/enrollment/device-group-mapping>

NEW QUESTION 239

- (Exam Topic 4)

You have 100 computers that run Windows 8.1.

You need to identify which computers can be upgraded to Windows 10. What should you use?

- A. Microsoft Deployment Toolkit (MDT)
- B. Update Compliance Azure
- C. Windows Assessment Toolkit
- D. Microsoft Assessment and Planning (MAP) Toolkit.

Answer: D

Explanation:

Reference:

<https://www.techielass.com/using-maps-azure-readiness/>

NEW QUESTION 241

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS devices. The solution must minimize administrative effort.

What should you do?

- A. From the Microsoft Endpoint Manager admin center, create a configuration profile.
- B. From the Microsoft Endpoint Manager admin center, create a security baseline.
- C. Onboard the macOS devices to the Microsoft 365 compliance center.
- D. Install Defender for Endpoint on the macOS devices.

Answer: D

Explanation:

Just install, and use Defender for Endpoint on Mac. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/microsoft-defender-endpoint-mac>

NEW QUESTION 246

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have 25 Microsoft Surface Hub devices that you plan to manage by using Microsoft Endpoint Manager. You need to configure the devices to meet the following requirements:

- Enable Windows Hello for Business.
- Configure Microsoft Defender SmartScreen to block users from running unverified files.

Which profile types should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Windows Hello for Business:

▼

Device restrictionsDevice restrictions (Windows 10 Team)Endpoint protectionIdentity protectionMicrosoft Defender ATP (Windows 10 Desktop)

Windows Defender SmartScreen:

▼

Device restrictionsDevice restrictions (Windows 10 Team)Endpoint protectionIdentity protectionMicrosoft Defender ATP (Windows 10 Desktop)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/intune/protect/identity-protection-windows-settings?toc=/intune/configur> <https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-windows-10?toc=/intune/configuratio>

NEW QUESTION 250

- (Exam Topic 4)
You have a Microsoft 365 E5 subscription.
You create an app protection policy for Android devices named Policy1 as shown in the following exhibit.

Home > Apps >

Create policy ...

✓ Basics2 Apps1 Data protection4 Access requirements...

Choose how you want to apply this policy to apps on different devices. Then add at least one app.

Target to apps on all device types ⓘ

YesNo

Device types * ⓘ

Unmanaged▼

Target policy to

All Apps▼

ⓘ We'll continue to add managed apps to your policy as they become available in Intune. [View a list of apps that will be targeted](#)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

To apply Policy1 to an Android device, you must [answer choice].

install the Company Portal app on the deviceinstall the Microsoft Authenticator app on the deviceonboard the device to Microsoft Defender for Endpointonboard the device to the Microsoft 365 compliance center

When Policy1 is assigned, the policy will apply to [answer choice].

users onlydevices onlyusers and devices

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Install the Intune Company Portal app on the device

On Android, Android devices will prompt to install the Intune Company Portal app regardless of which Device type is chosen.

Bix 2: Devices only

For Android devices, unmanaged devices are devices where Intune MDM management has not been detected. This includes devices managed by third-party MDM vendors.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies#app-protection-policies-for-iosipado>

NEW QUESTION 255

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1, Group3
Device2	Android	Group2, Group3
Device3	Windows 10	Group3
Device4	Windows 10	Group2
Device5	Windows 10	Group1

You create an app protection policy named Policy1 that has the following settings:

- Platform: Windows 10
- Protected apps: App1
- Exempt apps: App2
- Network boundary: Cloud resources, IPv4 ranges

You assign Policy1 to Group1 and Group2. You exclude Group3 from Policy1.

Which devices will apply Policy1?

- A. Device1, Device2, Device4, and Device5
- B. Device1, Device4, and Device5 only
- C. Device4 and Device5 only
- D. Device1, Device3, Device4 and Device5

Answer: A

Explanation:

Policy1 is applied to all devices in Group1 and Group2. It is not applied to any devices in Group3, unless those devices are also members of Group1 or Group2.

Note: The phrase "You exclude Group3 from Policy1" is misleading. It means that Policy1 is not applied to Group3, rather than Group3 being blocked.

NEW QUESTION 257

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Replicator
User3	Guests

User1 signs in to Computer1, creates the following files, and then signs out:

- docx in C:\Users\User1\Desktop
- docx in C:\Users\Public\Public Desktop
- docx in C:\Users\Default\Desktop

User3 signs in to Computer1 and creates a file named File4.docx in C:\Users\User3\Desktop. User2 has never signed in to Computer1.

How many DOCX files will appear on the desktop of each user the next time each user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Number of documents that will appear for User1:

	M
0	
1	
2	
3	
4	

Number of documents that will appear for User2:

	M
0

	M
0	
1	
2	
3	
4	

NEW QUESTION 262

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD). The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- > The configuration must be managed from a central location.
- > Internet traffic must be minimized.
- > Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Windows Update technology to use:

Windows Server Update Services (WSUS)
Microsoft Endpoint Configuration Manager
Windows Update for Business

Manage the configuration by using:

A Group Policy object (GPO)
Microsoft Endpoint Configuration Manager
Microsoft Intune

Manage the traffic by using:

Delivery Optimization
BranchCache
Peer cache

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Windows Server Update Services (WSUS)

Windows Server Update Services (WSUS) enables information technology administrators to deploy the latest Microsoft product updates. You can use WSUS to fully manage the distribution of updates that are released through Microsoft Update to computers on your network.

Windows Server Update Services is a built-in server role that includes the following enhancements: Can be added and removed by using the Server Manager Includes Windows PowerShell cmdlets to manage the most important administrative tasks in WSUS Etc.

Box 2: A Group Policy object

In an Active Directory environment, you can use Group Policy to define how computers and users can interact with Windows Update to obtain automatic updates from Windows Server Update Services (WSUS).

Box 3: BranchCache

BranchCache is a bandwidth-optimization feature that has been available since the Windows Server 2008 R2 and Windows 7 operating systems. Each client has a cache and acts as an alternate source for content that devices on its own network request. Windows Server Update Services (WSUS) and Microsoft Endpoint Manager can use BranchCache to optimize network bandwidth during update deployment, and it's easy to configure for either of them. BranchCache has two operating modes: Distributed Cache mode and Hosted Cache mode.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache> <https://docs.microsoft.com/en-us/windows-server/administration/windows-server-update-services/deploy/4-conf>

NEW QUESTION 265

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune. You plan to use Endpoint analytics. You need to create baseline metrics. What should you do first?

- A. Create an Azure Monitor workbook.
- B. Onboard 10 devices to Endpoint analytics.
- C. Create a Log Analytics workspace.
- D. Modify the Baseline regression threshold.

Answer: B

Explanation:

Onboarding from the Endpoint analytics portal is required for Intune managed devices. Reference: <https://docs.microsoft.com/en-us/mem/analytics/enroll-intune>

NEW QUESTION 267

- (Exam Topic 4)

You have a Microsoft 365 subscription.

A remote user purchases a laptop from a retail store. The laptop is intended for company use and has Windows 10 Pro edition installed.

You need to configure the laptop to meet the following requirements:

- > Modify the layout of the Start menu
- > Upgrade Windows 10 to Windows 10 Enterprise
- > Join the laptop to a Microsoft Azure Active Directory (Azure AD) domain named contoso.com

What should you do?

- A. Create a custom Windows image (.wim) file that contains an image of Windows 10 Enterprise and upload the file to a Microsoft
- B. Create a provisioning package (.ppkg) file and email the file to the user
- C. Create a Windows To Go workspace and ship the workspace to the user
- D. Create a Sysprep Unattend (.xml) file and email the file to the user

Answer: B

Explanation:

Reference:

NEW QUESTION 271

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	iOS

You plan to enroll the devices in Microsoft Intune.

How often will the compliance policy check-ins run after each device is enrolled in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device1:

Every 15 minutes for one hour, and then every eight hours
Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours
Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

Device2:

Every 15 minutes for one hour, and then every eight hours
Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours
Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Every three minutes for 15 minutes, then every 15 minutes for two hours, and then around every eight hours

If devices recently enroll, then the compliance, non-compliance, and configuration check-in runs more frequently. The check-ins are estimated at:

Windows 10: Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Graphical user interface, text, application, email Description automatically generated

Platform	Frequency
iOS/iPadOS	Every 15 minutes for 1 hour, and then around every 8 hours
macOS	Every 15 minutes for 1 hour, and then around every 8 hours
Android	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 10/11 PCs enrolled as devices	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 8.1	Every 5 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Box 2: Every 15 minutes for one hour, and then every eight hours iOS/iPadOS: Every 15 minutes for 1 hour, and then around every 8 hours

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-troubleshoot>

NEW QUESTION 272

- (Exam Topic 4)

You have a Microsoft 365 tenant

You have devices enrolled in Microsoft Intune.

You assign a conditional access policy named Policy1 to a group named Group1. Policy1 restricts devices marked as noncompliant from accessing Microsoft OneDrive for Business.

You need to identify which noncompliant devices attempt to access OneDrive for Business. What should you do?

- A. From the Microsoft Endpoint Manager admin center, review the Settings compliance report.
- B. From the Microsoft Endpoint Manager admin center, review the Noncompliant devices reporter.
- C. From the Microsoft Endpoint Manager admin center, review Device compliance report.
- D. From the Azure Active Directory admin center, review the Conditional Access Insights and Reporting workbook.

Answer: B

Explanation:

The Noncompliant devices report provides data typically used by Helpdesk or admin roles to identify problems and help remediate issues. The data found in this report is timely, calls out unexpected behavior, and is meant to be actionable.

Note: Compliance reports help you understand when devices fail to meet your compliance configurations and can help you identify compliance-related issues in your organization.

Open the compliance dashboard

Open the Intune Device compliance dashboard:

- > Sign in to the Microsoft Endpoint Manager admin center.
- > Select Devices > Overview > Compliance status tab.

When the dashboard opens, you get an overview with all the compliance reports. In these reports, you can see and check for:

Overall device compliance Per-policy device compliance Per-setting device compliance Threat agent status

Device protection status View compliance reports

In addition to using the charts on Compliance status, you can go to Reports > Device compliance.

- > Sign in to the Microsoft Endpoint Manager admin center.
- > Select Devices > Monitor, and then from below Compliance select the report you want to view. Some of the available compliance reports include:

Device compliance Noncompliant devices

Devices without compliance policy Setting compliance

Policy compliance Noncompliant policies (preview)

Windows health attestation report Threat agent status

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-monitor>

NEW QUESTION 275

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.

You need to prevent users and apps from accessing dangerous websites. What should you configure?

- A. Microsoft Defender Application Control
- B. Microsoft Defender Exploit Guard
- C. Microsoft Defender Application Guard
- D. Microsoft Defender Firewall

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/enable-network-protection?view=o365-worldwide>

NEW QUESTION 280

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,200 computers that run Windows 8.1.

You deploy an Upgrade Readiness solution in Microsoft Azure and configure the computers to report to Upgrade Readiness.

From Upgrade Readiness, you open a table view of the applications.

You need to filter the view to show only applications that can run successfully on Windows 10.

How should you configure the filter in Upgrade Readiness? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Filter column:

	▼
Issue	
UpgradeAssessment	
UpgradeDecison	

Filter value:

	▼
No known issues	
Ready to upgrade	
Supported version available	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/upgrade-readiness-resolve-issues>

NEW QUESTION 281

- (Exam Topic 4)

You have an on-premises server named Server1 that hosts a Microsoft Deployment Toolkit (MDT) deployment share named MDT1.

You need to ensure that MDT1 supports multicast deployments. What should you install on Server1?

- A. Windows Server Update Services (VVSUS)
- B. Multipath I/O (MPIO)
- C. Windows Deployment Services (WDS)
- D. Multipoint Connector

Answer: C

NEW QUESTION 283

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.
You need to identify which computers can be upgraded to Windows 10.
Solution: From Windows on the Devices blade of the Microsoft Endpoint Manager admin center, you create a filter and export the results as a CSV file.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 286

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. All users use Roaming User Profiles.
You have a user named Public1 that is used to sign-in to a public computer.
You need to prevent changes to the user settings of Public1 from being saved to the user profile. What should you do?

- A. Rename the Roaming User Profile folder to Public1.man
- B. Rename Ntuser.dat to Ntuser.v6
- C. Rename Ntuser.dat to Ntuser.man
- D. Rename the Roaming User Profile folder to Public1.v1

Answer: C

Explanation:

Reference:
<https://docs.microsoft.com/en-us/answers/questions/168551/set-roaming-profile-download-from-server-to-pc> but <https://docs.microsoft.com/en-us/windows/client-management/mandatory-user-profile>

NEW QUESTION 288

- (Exam Topic 4)

You have computers that run Windows 10 and are configured by using Windows AutoPilot. A user performs the following tasks on a computer named Computer1:

- > Creates a VPN connection to the corporate network
- > Installs a Microsoft Store app named App1
- > Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.
What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

The Wi-Fi connection will be:

Removed

Retained and the passphrase will be retained

Retained but the passphrase will be reset

App1 will be:

Reinstalled at sign-in

Removed

Retained

The VPN connection will be:

Removed

Retained and the credentials will be cached

Retained but the credentials will be reset

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

NEW QUESTION 289

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 10 Android Enterprise devices. Each device has a corporate-owned work profile and is enrolled in

Microsoft Intune.

You need to configure the devices to run a single app in kiosk mode.

Which Configuration settings should you modify in the device restrictions profile?

- A. General
- B. Users and Accounts
- C. System security
- D. Device experience

Answer: D

Explanation:

Device experience

Use these settings to configure a kiosk-style experience on your dedicated devices, or to customize the home screen experiences on your fully managed devices.

You can configure devices to run one app, or run many apps. When a device is set with kiosk mode, only the apps you add are available.

Device experience, Enrollment profile type: Select an enrollment profile type to start configuring Microsoft Launcher or the Microsoft Managed Home Screen on your devices. Your options:

* Dedicated device, Kiosk mode, Single App

* etc.

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-android-for-work>

NEW QUESTION 293

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

The Active Directory domain contains 200 computers that run Windows 10. The computers are managed by using Microsoft System Center Configuration Manager (Current Branch).

You need to pilot co-management for only five of the computers.

What should you create first?

- A. a domain local distribution group in Active Directory
- B. an Intune Connector for Active Directory
- C. a device collection in Configuration Manager
- D. a dynamic device group in Azure AD

Answer: C

Explanation:

The Pilot Intune setting switches the associated workload only for the devices in the pilot collection.

Note: When you enable co-management, you'll assign a collection as a Pilot group. This is a group that contains a small number of clients to test your co-management configurations. We recommend you create a suitable collection before you start the procedure. Then you can select that collection without exiting the procedure to do so.

References:

<https://docs.microsoft.com/en-us/configmgr/comanage/tutorial-co-manage-new-devices>

NEW QUESTION 297

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2
User3	Group3

Group1 is a member of Group3.

You are creating a file named Kiosk.xml that specifies a lockdown profile for a multi-app kiosk. Kiosk.xml contains the following section.

```
<Configs>
  <Config>
    <UserGroup Type="LocalGroup" Name="Group3" />
    <DefaultProfile Id="{9A2A490F-10F6-4764-974A-43B19E722C23}"/>
  </Config>
</Configs>
```

You apply Kiosk.xml to Computer1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The lockdown profile applies to User1.	<input type="radio"/>	<input type="radio"/>
The lockdown profile applies to User2.	<input type="radio"/>	<input type="radio"/>
The lockdown profile applies to User3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/lock-down-windows-10-to-specific-apps#config-for-gr>

NEW QUESTION 298

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You assign a Windows 10 license to User1. You instruct User1 to sign in to Computer1. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 301

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) solution that is used to manage Windows 10 deployment tasks.

MDT contains the operating system images shown in the following table.

Name	Description
Image1.wim	Custom-built Windows 10 image that has preinstalled custom apps
Image2.wim	Custom-built Windows 10 image without apps
Install.wim	Default Windows 10 image

You need to perform a Windows 10 in-place upgrade on several computers that run Windows 8.1. From the Deployment Workbench, you open the New Task Sequence Wizard.

You need to identify which task sequence template and which operating system image to use for the task sequence. The solution must minimize administrative effort.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Task sequence template:

Standard Client Task Sequence
Standard Client Replace Task Sequence
Standard Client Upgrade Task Sequence

Operating system image:

Image1.wim
Image2.wim
Install.wim

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Standard Client Upgrade Task Sequence

Use Template: Standard Client Upgrade Task Sequence

In-place upgrade is the preferred method to use when migrating from Windows 10 to a later release of Windows 10, and is also a preferred method for upgrading from Windows 7 or 8.1 if you do not plan to significantly change the device's configuration or applications. MDT includes an in-place upgrade task sequence template that makes the process really simple.

Box 2: Install.wim

In-place upgrade differs from computer refresh in that you cannot use a custom image to perform the in-place upgrade. I

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

NEW QUESTION 303

- (Exam Topic 4)

Your company has a main office and six branch offices. The branch offices connect to the main office by using a WAN link. All offices have a local Internet connection and a Hyper-V host cluster.

The company has a Microsoft System Center Configuration Manager deployment. The main office is the primary site. Each branch has a distribution point. All computers that run Windows 10 are managed by using both Configuration Manager and Microsoft Intune.

You plan to deploy the latest build of Microsoft Office 365 ProPlus to all the computers.

You need to minimize the amount of network traffic on the company's Internet links for the planned deployment.

What should you include in the deployment plan?

A. From Intune, configure app assignments for the Office 365 ProPlus suite. In each office, copy the Office 365 distribution files to a Microsoft Deployment Toolkit (MDT) deployment share.

B. From Intune, configure app assignments for the Office 365 ProPlus suite. In each office, copy the Office 365 distribution files to a Configuration Manager distribution point.

C. From Configuration Manager, create an application deployment. Copy the Office 365 distribution files to a Configuration Manager cloud distribution point.

D. From Configuration Manager, create an application deployment. In each office, copy the Office 365 distribution files to a Configuration Manager distribution point.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/deployoffice/deploy-office-365-proplus-with-system-center-configurationmana>

NEW QUESTION 304

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

The Wi-Fi network profile for Computer1 is configured as shown in the following exhibit.

Connect automatically when in range

Network profile

☒ Public

Your PC is hidden from other devices on the network and can't be used for printer and file sharing.

☐ Private

For a network you trust, such as at home or work. Your PC is discoverable and can be used for printer and file sharing if you set it up.

[Configure firewall and security settings](#)

The Delivery Optimization options for Computer1 are configured as shown in the following exhibit.

Allow downloads from other PCs

☐ PC's on my local network

☒ PCs on my local network, and PCs on the Internet

From which computers will Computer1 will receive updates and to which computers will Computer1 provide updates? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Receive updates from:

Local computers only

Computers on the internet only

Local computers and computers on the internet

Provide updates to:

Local computers only

Computers on the internet only

Local computers and computers on the internet

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated

NEW QUESTION 307
- (Exam Topic 4)
You are licensed for Microsoft Endpoint Manager.
You use Microsoft Endpoint Configuration Manager and Microsoft Intune.
You have devices enrolled in Configuration Manager as shown in the following table.

Name	Collection
Device1	Collection1
Device2	Collection2
Device3	Collection1, Collection2

In Configuration Manager, you enable co-management and configure the following settings:

- > Automatic enrolment in Intune: Pilot
- > Intune Auto Enrollment: Collection1

In Configuration Manager, you configure co-management staging to have the following settings:

- > Compliance policies: Collection2
- > Device Configuration: Collection1

In Configuration Manager, you configure co-management workloads as shown in the following exhibit.

Properties

Tenant onboarding

Enablement

Workloads

Staging

For Windows 10 devices that are in a co-management state, you can have Microsoft Intune start managing different workloads. Choose Pilot Intune to have Intune manage the workloads for only clients in the Pilot group (specified later in this wizard). If you are not ready to move workloads to Intune, select Configuration Manager.

<https://docs.microsoft.com/en-us/mem/configmgr/comanage/workloads>

NEW QUESTION 309

- (Exam Topic 4)

Your company has a Microsoft 365 subscription.

A new user named Admin1 is responsible for deploying Windows 10 to computers and joining the computers to Microsoft Azure Active Directory (Azure AD).

Admin1 successfully joins computers to Azure AD.

Several days later, Admin1 receives the following error message: "This user is not authorized to enroll. You can try to do this again or contact your system administrator with the error code (0x801c0003)."

You need to ensure that Admin1 can join computers to Azure AD and follow the principle of least privilege.

- A. Assign the Global administrator role to Admin1.
 B. Modify the Device settings in Azure AD.
 C. Assign the Cloud device administrator role to Admin1.
 D. Modify the User settings in Azure AD.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/device-management-azure-portal>

NEW QUESTION 314

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain that contains the locations shown in the following table.

Name	Internal IP address	Public Network Address Translation (NAT) IP address	Active Directory site
Location1	10.10.0.0/16	131.107.15.0/24	Site1
Location2	10.20.0.0/16	131.107.16.0/24	Site1
Location3	172.16.0.0/16	131.107.196.0/24	Site2

In Microsoft Intune, you enroll the Windows 10 devices shown in the following table.

Name	IP address
Device1	10.10.0.50
Device2	10.20.1.150
Device3	10.10.1.155
Device4	172.16.0.30

You have a Delivery Optimization device configuration profile applied to all the devices. The profile is configured as shown in the following exhibit.

Delivery Optimization

Windows 10 and later

NEW QUESTION 323

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the Windows 10 devices shown in the following table.

Name	Used by	Azure Active Directory (Azure AD) join type	Managed by using Microsoft Intune
Device1	User1	Joined	Yes
Device2	User1	Registered	Yes
Device3	User1	Joined	No

You enable Enterprise State Roaming

You need to ensure that User1 can sync Windows settings across the devices. What should you do?

- A. Join Device2 to Azure AD.
- B. Add a Microsoft account to each device.
- C. Remove Device1 and Device2 from Intune.
- D. Enroll Device3 in intune.

Answer: D

NEW QUESTION 327

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 Android devices enrolled in Microsoft intune. You create an app configuration policy that contains the following settings:

- Device enrollment type: Managed devices
- Profile Type: All Profile Types
- Platform: Android Enterprise

Which two types of apps can be associated with the policy? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Android Enterprise system app
- B. Android store app
- C. Web link
- D. Managed Google Play store app
- E. Built-in Android app

Answer: AD

NEW QUESTION 332

- (Exam Topic 4)

You have the Microsoft Deployment Toolkit (MDT) installed in three sites as shown in the following table.

MDT instance name	Site	Default gateway
MDT1	New York	10.1.1.0/24
MDT2	London	10.5.5.0/24
MDT3	Dallas	10.4.4.0/24

You use Distributed File System (DFS) Replication to replicate images in a share named Production. You configure the following settings in the Bootstrap.ini file.
[Settings] Priority=DefaultGateway, Default [DefaultGateway] 10.1.1.1=NewYork 10.5.5.1=London
[NewYork] DeployRoot=\\MDT1\Production\$ [London] DeployRoot=\\MDT2\Production\$ KeyboardLocale=en-gb
[Default]
DeployRoot=\\MDT3\Production\$ KeyboardLocale=en-us

You plan to deploy Windows 10 to the computers shown in the following table.

Name	IP address
LT1	10.1.1.240
DT1	10.5.5.115
TB1	10.2.2.193

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
TB1 will download the image from MDT3.	<input type="radio"/>	<input type="radio"/>
DT1 will have a KeyboardLocale of en-gb.	<input type="radio"/>	<input type="radio"/>
LT1 will download the image from MDT1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

NEW QUESTION 334

- (Exam Topic 4)

You have 100 Windows 10 devices enrolled in Microsoft Intune.

You need to configure the devices to retrieve Windows updates from the internet and from other computers on a local network.

Which Delivery Optimization setting should you configure, and which type of Intune object should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Delivery Optimization setting:

▼

Bandwidth optimization type

Download mode

VPN peer caching

Intune object:

▼

A configuration profile

App configuration policies

Windows 10 quality updates

Windows 10 update rings

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

Box 1: Download mode

Download mode specifies the download method that Delivery Optimization uses to download content.

Box 2: A configuration profile

Delivery Optimization settings are configured as part of the device configuration profile. Reference:
<https://docs.microsoft.com/en-us/mem/intune/configuration/delivery-optimization-settings> <https://docs.microsoft.com/en-us/mem/intune/configuration/delivery-optimization-windows>

NEW QUESTION 335

- (Exam Topic 4)

Your company has a computer named Computer1 that runs Windows 10 Pro.
The company develops a proprietary Universal Windows Platform (UWP) app named App1. App1 is signed with a certificate from a trusted certification authority (CA).
You need to sideload App1 to Computer1.
What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To enable sideloading:

<input type="checkbox"/>	Configure the Apps & features settings in the Settings app
<input type="checkbox"/>	Configure the For developers settings in the Settings app
<input type="checkbox"/>	Run the Enable-WindowsOptionalFeature cmdlet
<input type="checkbox"/>	Run the Set-WindowsEdition cmdlet

To sideload App1:

<input type="checkbox"/>	Double-click App1.appx in File Explorer
<input type="checkbox"/>	Use the Add a package option in the Settings app
<input type="checkbox"/>	Run the Install-Package cmdlet
<input type="checkbox"/>	Run the Add-AppxPackage cmdlet

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

NEW QUESTION 336

- (Exam Topic 4)

You have a Microsoft 365 tenant and an internal certification authority (CA).
You need to use Microsoft Intune to deploy the root CA certificate to managed devices.
Which type of Intune policy and profile should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Policy type:

<input type="checkbox"/>	App configuration policy
<input type="checkbox"/>	App protection policy
<input type="checkbox"/>	Compliance policy
<input type="checkbox"/>	Configuration profile

Profile:

<input type="checkbox"/>	Imported public key pair (PKCS) certificate
<input type="checkbox"/>	Public key pair (PKCS) certificate
<input type="checkbox"/>	Simple Certificate Enrollment Protocol (SCEP) certificate
<input type="checkbox"/>	Trusted certificate

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Configuration profile Create a trusted certificate profile. Box 2: Trusted certificate
When using Intune to provision devices with certificates to access your corporate resources and network, use a trusted certificate profile to deploy the trusted root certificate to those devices. Trusted root certificates establish a trust from the device to your root or intermediate (issuing) CA from which the other certificates are issued.
Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/certificates-trusted-root>

NEW QUESTION 341

- (Exam Topic 4)
Your company uses Windows Defender Advanced Threat Protection (Windows Defender ATP). Windows Defender ATP includes the machine groups shown in the following table.

Rank	Name	Members
1	Group1	Tag Equals demo And OS In Windows 10
2	Group2	Tag Equals demo
3	Group3	Domain Equals adatum.com
4	Group4	Domain Equals adatum.com And OS In Windows 10
5	Group5	Name starts with COMP
Last	Ungrouped machines (default)	Not applicable

You onboard a computer to Windows Defender ATP as shown in the following exhibit.

What is the effect of the Windows Defender ATP configuration? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Computer1 will be a member of:

Group3 only

Group4 only

Grou5 only

Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

Group1 only

Group2 only

Group1 and Group2 only

Group1, Group2, Group3, Group4, and Group5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Computer1 will be a member of:

Group3 only

Group4 only

Grou5 only

Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

Group1 only

Group2 only

Group1 and Group2 only

Group1, Group2, Group3, Group4, and Group5

NEW QUESTION 343

- (Exam Topic 4)
You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the devices shown in the following table.

Name	Operating system
Device1	Windows 10
Device2	Android 8.0
Device3	Android 9
Device4	iOS 11.0
Device5	iOS 11.4.1

All devices contain an app named App1 and are enrolled in Microsoft Intune.
You need to prevent users from copying data from App1 and pasting the data into other apps.
Which type of policy and how many policies should you create in Intune? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Policy type:

	▼
App configuration policy	
App protection policy	
Conditional access policy	
Device compliance policy	

Minimum number of policies:

	▼
1	
2	
3	
4	
5	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

NEW QUESTION 345

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You redirect Windows known folders to Microsoft OneDrive for Business. Which folder will be included in the redirection?

- A. Saved Games
- B. Documents
- C. Music
- D. Downloads

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders>

NEW QUESTION 350

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 8.1.

Two days ago, you upgraded the computer to Windows 10. You need to downgrade the computer to Windows 8.1.

Solution: You restart the computer to Windows Recovery Environment (Windows RE) and use the Advanced options.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 353

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: At a command prompt, you change the current folder to C:\Folder1, and then you run the RegSvr32.exe Package1.ppkg command.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select

the package to install.
Reference:
<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 357

- (Exam Topic 4)
You have five computers that runs Windows 10.
You need to create a provisioning package to configure the computers to meet the following requirements: ➤ Run an interactive app.
➤ Automatically sign in by using a local user account.
➤ Prevent users from accessing the desktop and running other applications.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Apply the provisioning package.

Run the Provision desktop devices project.

Copy the provisioning package to each computer.

Run the Provision kiosk devices project.

Install the Microsoft Deployment Toolkit (MDT).

Enable Microsoft User Experience Virtualization (UE-V).

Install the Windows Configuration Designer.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 360

- (Exam Topic 4)
You have the on-premises servers shown in the following table.

Name	Description
DC1	Domain controller that runs Windows Server 2022
Server1	Standalone server that runs Windows Server 2022
Server2	Member server that runs Windows Server 2022 and has the Remote Access role installed
Server3	Member server that runs Windows Server 2019
Server4	Red Hat Enterprise Linux (RHEL) 8.4 server

You have a Microsoft 365 E5 subscription that contains Android and iOS devices. All the devices are managed by using Microsoft Intune.
You need to implement Microsoft Tunnel for Intune. The solution must minimize the number of open firewall ports.
To which server can you deploy a Tunnel Gateway server, and which inbound ports should be allowed on the server to support Microsoft Tunnel connections? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Server:

Server1

Server2

Server3

Server4

Ports:

TCP 443 only

UDP 443 only

TCP 1723 only

TCP 443 and UDP 443 only

TCP 443, TCP 1723, and UDP 443

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Server4

Microsoft Tunnel is a VPN gateway solution for Microsoft Intune that runs in a container on Linux and allows access to on-premises resources from iOS/iPadOS and Android Enterprise devices using modern authentication and Conditional Access.

Box 2: TCP 443 and UDP 443 only

Some traffic goes to your public facing IP address for the Tunnel. The VPN channel will use TCP, TLS, UDP, and DTLS over port 443.

By default, port 443 is used for both TCP and UDP, but this can be customized via the Intune Saerver Configuration – Server port setting. If changing the default port (443) ensure your inbound firewall rules are adjusted to the custom port.

Incorrect:

TCP 1723 is not used.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/microsoft-tunnel-overview>

NEW QUESTION 365

.....

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

MD-101 Practice Exam Features:

- * MD-101 Questions and Answers Updated Frequently
- * MD-101 Practice Questions Verified by Expert Senior Certified Staff
- * MD-101 Most Realistic Questions that Guarantee you a Pass on Your First Try
- * MD-101 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
