Note: The New-CsTeamsNetworkRoamingPolicy cmdlet allows IT Admins to create policies for Network Roaming and Bandwidth Control experiences in Microsoft Teams.

The TeamsNetworkRoamingPolicy cmdlets enable administrators to provide specific settings from the TeamsMeetingPolicy to be rendered dynamically based upon the location of the Teams client. The TeamsNetworkRoamingPolicy cannot be granted to a user but instead can be assigned to a network site. The settings from the TeamsMeetingPolicy included are AllowIPVideo and MediaBitRateKb. When a Teams client is connected to a network site where a CsTeamRoamingPolicy is assigned, these two settings from the TeamsRoamingPolicy will be used instead of the settings from the TeamsMeetingPolicy.

Set up common area phones for Microsoft Teams Set policies for common area phones

Use policies to control which features are available to users on common area phones. Set up Advanced calling on common area phones (optional)

By default, the basic calling experience will be on the common area phone's home screen, but you can turn on an advanced calling experience.

To use these advanced calling features on supported Teams phone device models, you can turn on the Advanced calling toggle in the Teams admin center or on your Teams phone device that is signed into your Teams Shared Devices account.

Turning on advanced calling capabilities requires you to purchase hardware models that can support all required capabilities.

* 1. Turn on Advanced calling in Teams admin center

* 2. Sign into the Teams admin center with a Microsoft 365 admin account.

* 3. From the left-side menu, navigate to Teams devices > Phones > and select the Configuration profiles tab.

* 4. From the list, select the configuration profile assigned to your common area phone.

* 5. Under the Calling settings section, find the Advanced calling toggle.

* 6. Turn on the toggle.

NEW QUESTION 101

- (Exam Topic 3)

You have a Teams Phone deployment that uses Direct Routing on a single Session Border Controller (SBC). Users report that outbound PSTN calls are failing, but inbound PSTN calls are successful.

When you review the SBC logs, you discover that Microsoft is responding to SIP option requests, but is NOT sending SIP option requests.

What is the cause of the issue?

- A. The online PSTN gateway is disabled.
- B. An SBC certificate is expired.
- C. An external DNS entry is missing from the FQDN of the SBC.
- D. The phone numbers of the users are defined by running the New-CsTeamsUnassignedNuirtoer Treatment cmdlet.

Answer: A

Explanation:

Issues that affect outbound direct routing calls

You might experience various issues when you use Direct Routing to make outbound calls from a Microsoft Teams client to a Session Border Controller (SBC).

These issues include the following:

An incorrect caller ID is displayed to the call recipient. A connection to the SBC is not established.

Some users in a tenant are unable to make calls. No users in a tenant are able to make calls.

No users are able to make calls

If none of the users are able to make calls, the calls are probably not reaching the SBC. Check for one of the following causes.

Cause 1

Teams has a disabled gateway. Resolution 1

Use the Microsoft Teams admin center to make sure that the gateway that's used by Teams is available and enabled.

NEW QUESTION 106

You have a Teams Phone deployment that contains a branch office.

You need to restrict toll bypass for a user based on the office in which the user is working during an inbound or outbound PSTN call.

What should you use?

- A. a voice routing policy
- B. Local Media Optimization
- C. Location-Based Routing
- D. dial plans
- E. a calling policy

Answer: E

Explanation:

Calling policies in Teams

In Microsoft Teams, calling policies control which calling and call forwarding features are available to users. Calling policies determine whether a user can make private calls, use call forwarding or simultaneous ringing to other users or external phone numbers, route calls to voicemail, send calls to call groups, use delegation for inbound and outbound calls, and so on.

You can use the global (Org-wide default) policy that's created automatically or create and assign custom policies.

Calling policies include:

* Prevent toll bypass and send calls through the PSTN

Turning on this setting sends calls through the Public Switched Telephone Network (PSTN) and incur charges rather than sending them through the network and bypassing the tolls. This setting is off by default.

There are a number of Microsoft Teams certified devices on the market from several different manufactures. These devices are listed on the Microsoft Teams Devices Page.

Once a device is logged in and the user setup, the device is registered to the tenant and a policy applied against it from the Configuration Profiles listed in the Microsoft Teams Admin Portal.

These Configuration Profiles allow you to set options like the devices: Timeout and lock status

Language Timezone Time format Screen saver

Network settings; and

To enable or disable the second PC port

If the Microsoft 365 tenant also has Intune setup, then the device is registered to Intune and any compliance policies are applied when the first user logs in.

- B. Not Mastered

Answer: A

Explanation:

Box 1: Grant-CsDialoutPolicy

Least bad option perhaps, but it does not seem to be a good answer.

* Grant-CsDialoutPolicy

Use the Grant-CsDialoutPolicy cmdlet to assign the tenant global, a group of users, or a per-user outbound calling restriction policy to one or more users.

Syntax

Grant-CsDialoutPolicy [[-Identity] <string>]

[[[-PolicyName] <string>] [-PassThru]

[-WhatIf] [-Confirm]

[<CommonParameters>]

Note: Set-CsUserCallingSettings would be a good answer, but it is not an option.

This cmdlet will set the call forwarding, simultaneous ringing and call group settings for the specified user.

-UnansweredTargetType

The unanswered target type. Supported values are Voicemail, SingleTarget, MyDelegates and Group.

SingleTarget is used when forwarding the unanswered call to another user or phone number. MyDelegates is used when forwarding the unanswered call to the users's delegates. Group is used when forwarding the unanswered call to the specified user's call group.

Box 2: -UnansweredTargetType Incorrect:

* Grant-CsIPPhonePolicy, Skype for Business Server 2019

Use the Grant-CsIPPhonePolicy cmdlet to assign an Internet Protocol (IP) phone policy to a user or a group of users. IP phone policies determine the features of Microsoft Teams, Skype for Business Online, or Skype for Business Server 2019 that are available to users. For example, you might enable the Better Together Over Ethernet feature for some users while disabling it for others.

Syntax

[-PolicyName] <String> [-Tenant <Guid>]

[-DomainController <Fqdn>] [-PassThru]

[-WhatIf] [-Confirm]

[<CommonParameters>]

* Grant-CsOnlineVoiceRoutingPolicy

Assigns a per-user online voice routing policy to one user, a group of users, or sets the Global policy instance. Online voice routing policies manage online PSTN usages for Phone System users.

Syntax
