## **Exam Questions PMI-RMP**

PMI Risk Management Professional

#### NEW QUESTION 1

You work as a project manager for BlueWell Inc. You are involved with the project team on the different risk issues in your project. You are using the applications of IRGC model to facilitate the understanding and managing the rising of the overall risks that have impacts on the economy and society. One of your team member wants to know that what is the need to use the IRGC. What will be your reply?

- A. IRGC addresses questions such as the understanding of the secondary impacts of a risk.
- B. IRGC models aim at building robust, integrative inter-disciplinary governance models for emerging and existing risks.
- C. IRGC addresses the development of resilience and the capacity of organizations and people to face unavoidable risks.
- D. IRGC is both a concept and a tool.

**Answer:** B

#### NEW QUESTION 2

Ben is the project manager of the YHT Project for his company. Alice, one of his team members, is confused about when project risks will happen in the project. Which one of the following statements is the most accurate about when project risk happens?

- A. Project risk can happen at any moment.
- B. Project risk happens throughout the project execution.
- C. Project risk is always in the future.
- D. Project risk is uncertain, so no one can predict when the event will happen.

**Answer:** C

#### NEW QUESTION 3

Where can a project manager find risk-rating rules?

- A. Risk management plan
- B. Organizational process assets
- C. Enterprise environmental factors
- D. Risk probability and impact matrix

**Answer:** B

#### NEW QUESTION 4

Frank is the project manager of the NHQ project for his company. Frank is working with the project team, key stakeholders, and several subject matter experts on risks dealing with the new materials in the project. Frank wants to utilize a risk analysis method that will help the team to make decisions in the presence of the current uncertainty surrounding the new materials. Which risk analysis approach can Frank use to create an approach to make decisions in the presence of uncertainty?

- A. Monte Carlo Technique
- B. Qualitative risk analysis process
- C. Quantitative risk analysis process
- D. Delphi Technique

**Answer:** C

#### NEW QUESTION 5

Jeff, a key stakeholder in your project, wants to know how the risk exposure for the risk events is calculated during quantitative risk analysis. He is worried about the risk exposure which is too low for the events surrounding his project requirements. How is the risk exposure calculated?

- A. The risk exposure of a risk event is determined by historical information.
- B. The probability of a risk event times the impact of a risk event determines the true risk exposure.
- C. The probability of a risk event plus the impact of a risk event determines the true risk exposure.
- D. The probability and impact of a risk event are gauged based on research and in-depth analysis.

**Answer:** B

#### NEW QUESTION 6

You are the project manager of a large project that will last four years. In this project, you would like to model the risk based on its distribution, impact, and other factors. There are three modeling techniques that a project manager can use to include both event-oriented and project-oriented analysis. Which modeling technique does NOT provide event-oriented and project-oriented analysis for identified risks?

- A. Sensitivity analysis
- B. Jo-Hari Window
- C. Expected monetary value
- D. Modeling and simulation

**Answer:** B

#### NEW QUESTION 7

Stephen is the project manager of the GBB project. He has worked with two subject matter experts and his project team to complete the risk assessment technique. There are approximately 47 risks that have a low probability and a low impact on the project. Which of the following answers best describes what Stephen should do with these risk events?

- A. The low probability and low impact risks should be added to a watchlist for future monitoring.

- B. Because they are low probability and low impact, the risks can be dismissed.
- C. The low probability and low impact risks should be added to the risk register.
- D. Because they are low probability and low impact, Stephen should accept the risks.

**Answer:** A

#### NEW QUESTION 8

You work as a project manager for BlueWell Inc. Management has asked you to work with the key project stakeholder to analyze the risk events you have identified in the project. They would like you to analyze the project risks with a goal of improving the project's performance as a whole. What approach can you use to achieve the goal of improving the project's performance through risk analysis with your project stakeholders?

- A. Focus on the high-priority risks through qualitative risk analysis
- B. Involve the stakeholders for risk identification only in the phases where the project directly affects them
- C. Involve subject matter experts in the risk analysis activities
- D. Use qualitative risk analysis to quickly assess the probability and impact of risk events

**Answer:** A

#### NEW QUESTION 9

Linda is the project manager of the NAB Project. One of the risks her project team has identified is too dangerous for the project team to manage internally so she has hired a vendor to complete this portion of the project and to manage the identified risk. What risk response has Linda used in this instance?

- A. Transference
- B. Avoidance
- C. Contractual
- D. Mitigation

**Answer:** A

#### NEW QUESTION 10

During qualitative risk analysis you want to define the risk urgency assessment. All of the following are indicators of risk priority except for which one?

- A. Cost of the project
- B. Risk rating
- C. Warning signs
- D. Symptoms

**Answer:** A

#### NEW QUESTION 10

You are the project manager for the TTR project. You are in the process of gathering information for risk identification. You ask experts to participate in the process through their emails for maintaining anonymity. You collect the responses, summarize them, and are then re-circulated to the experts for further comment. Which of the following techniques are you using for risk identification?

- A. Delphi
- B. Expert judgment
- C. SWOT analysis
- D. Brainstorming

**Answer:** A

#### NEW QUESTION 11

Gary is the project manager of his organization. He is managing a project that is similar to a project his organization completed recently. Gary has decided that he will use the information from the past project to help him and the project team to identify the risks that may be present in the project. Management agrees that this checklist approach is ideal and will save time in the project. Which of the following statement is most accurate about the limitations of the checklist analysis approach for Gary?

- A. The checklist analysis approach is fast but it is impossible to build an exhaustive checklist.
- B. The checklist analysis approach saves time, but can cost more.
- C. The checklist analysis approach only uses qualitative analysis.
- D. The checklist is also known as top down risk assessment.

**Answer:** A

#### NEW QUESTION 12

Management has asked you to perform a risk audit and report back on the results. Bonny, a project team member asks you what a risk audit is. What do you tell Bonny?

- A. A risk audit is a review of all the risks that have yet to occur and what their probability of happening are.
- B. A risk audit is a review of the effectiveness of the risk responses in dealing with identified risks and their root causes, as well as the effectiveness of the risk management process.
- C. A risk audit is a review of all the risk probability and impact for the risks, which are still present in the project but which have not yet occurred.
- D. A risk audit is an audit of all the risks that have occurred in the project and what their true impact on cost and time has been.

**Answer:** B

#### NEW QUESTION 14

Mark works as a project manager of the NNH project. In this project, he has created a contingency response that the cost performance index should be less than 0.91. The NHH project has a budget at completion of \$950,000 and is 43 percent complete - though the project should be 50 percent complete. The project has spent \$470,897 to reach the 43 percent complete milestone. What is the project's cost performance index?

- A. 0.95
- B. 0.80
- C. 0.87
- D. 0.91

**Answer:** C

#### NEW QUESTION 17

Fred is the project manager of the CPS project. He is working with his project team to prioritize the identified risks within the CPS project. He and the team are prioritizing risks for further analysis or action by assessing and combining the risks probability of occurrence and impact. What process is Fred completing?

- A. Risk identification
- B. Perform qualitative analysis
- C. Perform quantitative analysis
- D. Risk Breakdown Structure creation

**Answer:** B

#### NEW QUESTION 18

The risk transference is referred to the transfer of risks to a third party, usually for a fee, it creates a contractual-relationship for the third party to manage the risk on behalf of the performing organization. Which one of the following is NOT an example of the transference risk response?

- A. Use of insurance
- B. Warranties
- C. Life cycle costing
- D. Performance bonds

**Answer:** C

#### NEW QUESTION 20

You are the project manager for your organization. You are preparing for the quantitative risk analysis. Mark, a project team member, wants to know why you need to do quantitative risk analysis when you just completed qualitative risk analysis. Which one of the following statements best defines what quantitative risk analysis is?

- A. Quantitative risk analysis is the process of numerically analyzing the effect of identified risks on overall project objectives.
- B. Quantitative risk analysis is the planning and quantification of risk responses based on probability and impact of each risk event.
- C. Quantitative risk analysis is the review of the risk events with the high probability and the highest impact on the project objectives.
- D. Quantitative risk analysis is the process of prioritizing risks for further analysis or action by assessing and combining their probability of occurrence and impact.

**Answer:** A

#### NEW QUESTION 25

The Identify Risk process determines the risks that affect the project and document their characteristics. Why should the project team members be involved in the Identify Risk process?

- A. They are the individuals that will need a sense of ownership and responsibility for the risk events.
- B. They are the individuals that will have the best responses for identified risks events within the project.
- C. They are the individuals that are most affected by the risk events.
- D. They are the individuals that will most likely cause and respond to the risk events.

**Answer:** A

#### NEW QUESTION 30

Your project has several risks that may cause serious financial impact should they happen. You have studied the risk events and made some potential risk responses for the risk events but management wants you to do more. They'd like for you to create some type of a chart that identified the risk probability and impact with a financial amount for each risk event. What is the likely outcome of creating this type of chart?

- A. Risk response
- B. Quantitative analysis
- C. Contingency reserve
- D. Risk response plan

**Answer:** C

#### NEW QUESTION 32

Shawn is the project manager of the WHT Project for his company. In this project Shawn's team reports that they have found a way to complete the project work for less cost than what was originally planned. The project team presents a new software that will help to automate the project work. While the software and the associated training costs \$25,000 it will save the project nearly \$65,000 in total costs. Shawn agrees to the software and changes to the project management plan accordingly. What type of risk response has been used in this instance?

- A. Avoidance
- B. Exploiting

- C. Accepting
- D. Enhancing

**Answer:** B

#### NEW QUESTION 34

You are the project manager of the GHY Project for your company. You have completed the risk response planning with your project team. You now need to update the WBS. Why would the project manager need to update the WBS after the risk response planning process? Choose the best answer.

- A. Because of work that was omitted during the WBS creation
- B. Because of new work generated by the risk responses
- C. Because of risk responses that are now activities
- D. Because of risks associated with work packages

**Answer:** B

#### NEW QUESTION 35

Joan is a project management consultant and she has been hired by a firm to help them identify risk events within the project. Joan would first like to examine the project documents including the plans, assumptions lists, project files, and contracts. What key thing will help Joan to discover risks within the review of the project documents?

- A. The project documents will help the project manager, or Joan, to identify what risk identification approach is best to pursue.
- B. Lack of consistency between the plans and the project requirements and assumptions can be the indicators of risk in the project.
- C. Poorly written requirements will reveal inconsistencies in the project plans and documents.
- D. Plans that have loose definitions of terms and disconnected approaches will reveal risks.

**Answer:** B

#### NEW QUESTION 40

The Project Risk Management knowledge area focuses on which of the following processes? Each correct answer represents a complete solution. Choose all that apply.

- A. Quantitative Risk Analysis
- B. Risk Monitoring and Control
- C. Potential Risk Monitoring
- D. Risk Management Planning

**Answer:** ABD

#### NEW QUESTION 43

Beth is the project manager of the BFG Project for her company. In this project Beth has decided to create a contingency response based on the performance of the project schedule. If the project schedule variance is greater than \$10,000 the contingency plan will be implemented. What is the formula for the schedule variance?

- A.  $SV=EV/PV$
- B.  $SV=PV-EV$
- C.  $SV=EV/AC$
- D.  $SV=EV-PV$

**Answer:** D

#### NEW QUESTION 44

Lamont is the project manager of a project that has recently finished the final project deliverables. The project customer has signed off on the project deliverable and Lamont has a few administrative closure activities to complete. In the project, there were several large risks that could have wrecked the project but Lamont and his project team found some creative methods to resolve the risks without affecting the project costs or project end date. What should Lamont do with the risk responses he identified during the project's monitoring and controlling process?

- A. Include the risk response in the project risk management plan.
- B. Include the responses in the project management plan.
- C. Nothin
- D. The risk responses are included in the project's risk register already.
- E. Include the risk responses in the organization's lessons learned database.

**Answer:** D

#### NEW QUESTION 47

Joyce is the project manager for her company. Joyce and her project team are working through the quantitative analysis for certain risk events within her project. According to the enterprise environmental factors the project manager is to perform sensitivity analysis on any risk with an impact greater than \$5,000 in the project. What is the sensitivity analysis?

- A. It determines which risk events have the most potential impact on the project.
- B. It uses round of anonymous surveys to predict which events are most likely to happen.
- C. It uses rounds of anonymous surveys to predict probability and impact.
- D. It determines possible combinations of risk events to predict overall project success, failure, or probability of achieving project objectives.

**Answer:** A

#### NEW QUESTION 50

Fred is the project manager of a large project in his organization. Fred needs to begin planning the risk management plan with the project team and key stakeholders. Which plan risk management process tool and technique should Fred use to plan risk management?

- A. Variance and trend analysis
- B. Information gathering techniques
- C. Planning meetings and analysis
- D. Data gathering and representation techniques

**Answer: C**

#### NEW QUESTION 52

You and your project team have identified the project risks and now are analyzing the probability and impact of the risks. What type of analysis of the risks provides a quick and high-level review of each identified risk event?

- A. A risk probability-impact matrix
- B. Quantitative risk analysis
- C. Seven risk responses
- D. Qualitative risk analysis

**Answer: D**

#### NEW QUESTION 54

Which types of project tends to have more well-understood risks?

- A. Operational work projects
- B. First-of-its kind technology projects
- C. Recurrent projects
- D. State-of-art technology projects

**Answer: C**

#### NEW QUESTION 58

You are working as a project manager in your organization. You are nearing the final stages of project execution and looking towards the final risk monitoring and controlling activities. For your project archives, which one of the following is an output of risk monitoring and control?

- A. Quantitative risk analysis
- B. Risk audits
- C. Requested changes
- D. Qualitative risk analysis

**Answer: C**

#### NEW QUESTION 63

You are the project manager of the HJK Project for your organization. You and the project team have created risk responses for many of the risk events in the project. Where should you document the proposed responses and the current status of all identified risks?

- A. Stakeholder management strategy
- B. Risk management plan
- C. Risk register
- D. Lessons learned documentation

**Answer: C**

#### NEW QUESTION 64

Della works as a project manager for Tech Perfect Inc. She is studying the documentation of planning of a project. The documentation states that there are twenty-eight stakeholders with the project. What will be the number of communication channels for the project?

- A. 378
- B. 300
- C. 28
- D. 250

**Answer: A**

#### NEW QUESTION 67

Tom is the project manager of the GGG project for his company. He is working with the project team on the Perform Qualitative Risk Analysis process. Tom is having the project team to review the project scope statement as an input to the qualitative risk analysis process. Why?

- A. The project scope statement must be understood to see the project requirements and the inherent risks of the project.
- B. The project scope statement will reveal the type of project as either a recurrent or first- of-its-kind project.
- C. The project scope identifies the risks associated with project constraints.
- D. The project scope statement must be reviewed to understand the quality requirements and the risks associated with the demand for quality.

**Answer: B**

#### NEW QUESTION 71

You are the project manager of your organization. Your organization will receive a bonus if the project finishes by December 20. Management has communicated this bonus to you and your project team and has asked you to evaluate the project to see if it is possible to realize the reward. The bonus offered to your organization is \$750,000. You have examined the project and believe that you can crash the project for an additional \$275,000 and reach the December 20 date. Management is thrilled with your assessment and they approve the crash fee. What risk response is this?

- A. Crashing can be a type of the enhancing risk response.
- B. Crashing can be considered transference because of the \$275,000 is actually paid from the bonus, which is paid by the project customer.
- C. Crashing can be a type of the exploit risk response.
- D. Crashing is the addition of labor, not a risk response.

**Answer:** A

#### NEW QUESTION 74

Lisa is the project manager of the SQL project for her company. She has completed the risk response planning with her project team and is now ready to update the risk register to reflect the risk response. Which of the following statements best describes the level of detail Lisa should include with the risk responses she has created?

- A. The level of detail is set by historical information.
- B. The level of detail should correspond with the priority ranking.
- C. The level of detail must define exactly the risk response for each identified risk.
- D. The level of detail is set of project risk governance.

**Answer:** B

#### NEW QUESTION 76

Which of the following are parts of SWOT Analysis? Each correct answer represents a complete solution. Choose all that apply.

- A. Opportunities
- B. Tools
- C. Weaknesses
- D. Threats
- E. Strengths
- F. Optimism

**Answer:** ACDE

#### NEW QUESTION 79

You work as a project manager for BlueWell Inc. You are preparing for the risk identification process. You will need to involve several of the project's key stakeholders to help you identify and communicate the identified risk events. You will also need several documents to help you and the stakeholders identify the risk events. Which one of the following is NOT a document that will help you identify and communicate risks within the project?

- A. Risk register
- B. Activity cost estimates
- C. Stakeholder register
- D. Activity duration estimates

**Answer:** A

#### NEW QUESTION 80

Which of the following documents is described in the statement below? "It is developed along with all processes of the risk management. It contains the results of the qualitative risk analysis, quantitative risk analysis, and risk response planning."

- A. Risk management plan
- B. Project charter
- C. Risk register
- D. Quality management plan

**Answer:** C

#### NEW QUESTION 83

You are the project manager of a new project in your organization. You and the project team have identified the project risks, completed risk analysis, and are planning the most appropriate risk responses. Which of the following tools is most effective to choose the most appropriate risk response?

- A. Cause-and-effect diagrams
- B. Project network diagrams
- C. Delphi Technique
- D. Decision tree analysis

**Answer:** D

#### NEW QUESTION 87

Sammy is the project manager for her organization. She would like to rate each risk based on its probability and affect on time, cost, and scope. Harry, a project team member, has never done this before and thinks Sammy is wrong to attempt this approach. Harry says that an accumulative risk score should be created, not three separate risk scores. Who is correct in this scenario?

- A. Harry is correct, because the risk probability and impact considers all objectives of the project.
- B. Harry is correct, the risk probability and impact matrix is the only approach to risk assessment.
- C. Sammy is correct, because organizations can create risk scores for each objective of the project.
- D. Sammy is correct, because she is the project manager.

**Answer:** C

#### NEW QUESTION 89

You are working with the project stakeholders to analyze and prioritize their requirements for the project. One of the project requirements is to achieve a high-level of customer satisfaction for the project deliverable. What is the danger in this project requirement?

- A. Achieving customer satisfaction is an assumption and should be documented in the project scope.
- B. Achieving customer satisfaction is a subjective requirement and entails a high level of risk of being successfully accomplished.
- C. Achieving customer satisfaction is a risk as the project manager cannot control how satisfied the customer will be with the project deliverables.
- D. Achieving customer satisfaction should always map to the quality requirements for the project.

**Answer:** B

#### NEW QUESTION 94

Which of the following processes involves choosing the alternative strategies, executing a contingency or fallback plan, taking corrective action, and modifying the project management plan?

- A. Monitor and Control risk
- B. Configuration Management
- C. Integrated Change control
- D. Scope Change control

**Answer:** A

#### NEW QUESTION 97

Harry is a project manager of a software development project. In the early stages of planning, he and the stakeholders operated with the belief that the software they were developing would work with their organization's current computer operating system. Now that the project team has started developing the software it has become apparent that the software will not work with nearly half of the organization's computer operating systems. The incorrect belief Harry had in the software compatibility is an example of what in project management?

- A. Issue
- B. Assumption
- C. Risk
- D. Constraint

**Answer:** B

#### NEW QUESTION 98

Gary is the project manager of the MMQ project for his company. He is working with his project team to plan the risk responses for his project. Sarah, a project team member, does not understand the process that Gary is using to plan the risk responses. Which approach is the preferred method to address project risks and the risk responses?

- A. Risks in the project should be addressed by their probability for creating risk responses.
- B. Risks in the project should be addressed by the organization's risk tolerance for creating risk responses.
- C. Risks in the project should be addressed by their impact for creating risk responses.
- D. Risks in the project should be addressed by their priority for creating risk responses.

**Answer:** D

#### NEW QUESTION 101

Which of the following risk responses delineates that the project plan will not be changed to deal with the risk?

- A. Exploitation
- B. Transference
- C. Acceptance
- D. Mitigation

**Answer:** C

#### NEW QUESTION 103

Gary has identified a project risk that could injure project team members. He does not want to accept any risk where someone could become injured on this project so he hires a professional vendor to complete this portion of the project work. This workaround to the risk event is known as what type of risk response?

- A. Acceptance
- B. Transference
- C. Mitigation
- D. Avoidance

**Answer:** B

#### NEW QUESTION 106

Eric is the project manager of the MTC project for his company. In this project a vendor has offered Eric a sizeable discount on all hardware if his order total for the project is more than \$125,000. Right now, Eric is likely to spend \$118,000 with vendor. If Eric spends \$7,000 his cost savings for the project will be \$12,500, but he cannot purchase hardware if he cannot implement the hardware immediately due to organizational policies. Eric consults with Amy and Allen, other project managers in the organization, and asks if she needs any hardware for their projects. Both Amy and Allen need hardware and they agree to purchase the hardware through Eric's relationship with the vendor. What positive risk response has happened in this instance?

- A. Sharing
- B. Exploiting
- C. Transference
- D. Enhancing

**Answer:** A

#### NEW QUESTION 109

Ruth is the project manager of ISFH project for her company. This project is forty percent complete and it appears that some risk events are going to happen in the project that will have an adverse affect on the project. Ruth creates a change request regarding the risks. Is this a valid response?

- A. No, change requests should not address risks, only risk response strategies should be issued.
- B. No, change requests should not address pending risks, but only scope changes.
- C. Yes, change requests can be recommended for corrective actions for contingency plans.
- D. Yes, change requests can ask for additional funds to pay for the risk impact.

**Answer:** C

#### NEW QUESTION 111

You are the project manager of the HQQ Project for your company. You are working with your project stakeholders to discuss the risks in the project that can adversely affect the project objectives. You are discussing the possibilities of causes for an identified risk event in your project. Your stakeholder is confused on the difference between causes and risk events. Which of the following is NOT an example of a cause for a project risk?

- A. Limited team members to complete the project work
- B. Quality assurance programs within the company
- C. Work permit requirements
- D. Schedule constraints on the project

**Answer:** B

#### NEW QUESTION 115

Examine the figure given below.

What will be the expected monetary value of Risk C?

- A. -\$113,750
- B. \$175,000 if the risk event actually happens
- C. -\$175,000
- D. -\$27,000

**Answer:** D

#### NEW QUESTION 119

Your project spans the entire organization. You would like to assess the risk of the project but are worried that some of the managers involved in the project could affect the outcome of any risk identification meeting. Your worry is based on the fact that some employees would not want to publicly identify risk events that could make their supervisors look bad. You would like a method that would allow participants to anonymously identify risk events. What risk identification method could you use?

- A. Delphi technique
- B. Isolated pilot groups
- C. SWOT analysis
- D. Root cause analysis

**Answer:** A

#### NEW QUESTION 121

Jenny is the project manager of the NHJ Project for her company. She has identified several positive risk events within the project and she thinks these events can save the project time and money. You, a new team member wants to know that how many risk responses are available for a positive risk event. What will Jenny reply to you?

- A. Four
- B. Three
- C. Seven
- D. Acceptance is the only risk response for positive risk events.

**Answer:** A

#### NEW QUESTION 123

You are the project manager of the HJU project for your company. This project will last for 18 months and has a project budget of \$567,000. Robert, one of your stakeholders, has introduced a scope change request that will likely have an impact on the project costs and schedule. Robert assures you that he will pay for the extra time and costs associated with the risk event. You tell Robert that the change request may affect more areas of the project than just time and cost and that

you are worried about the additional risks the change request will bring. What project management component is responsible for evaluating a change request and its impact on all of the project management knowledge areas?

- A. Project change control system
- B. Integrated change control
- C. Risk analysis
- D. Configuration management

**Answer: B**

#### NEW QUESTION 124

Harry works as a project manager for BlueWell Inc. He is determining how to conduct the risk management activities for a project. According to the PMBOK, there are six inputs to the plan risk management process. Which one of the following is NOT an input to this process?

- A. Project scope statement
- B. Risk management plan
- C. Schedule management plan
- D. Cost management plan

**Answer: B**

#### NEW QUESTION 128

You are the project manager of the GHG project. You are preparing for the quantitative risk analysis process. You are using organizational process assets to help you complete the quantitative risk analysis process. Which one of the following is NOT a valid reason to utilize organizational process assets as a part of the quantitative risk analysis process?

- A. You will use organizational process assets for risk databases that may be available from industry sources.
- B. You will use organizational process assets for studies of similar projects by risk specialists.
- C. You will use organizational process assets to determine costs of all risks events within the current project.
- D. You will use organizational process assets for information from prior similar projects.

**Answer: C**

#### NEW QUESTION 130

You and your project team are just starting the risk identification activities for a project that is scheduled to last for 18 months. Your project team has already identified a long list of risks that need to be analyzed. How often should you and the project team do risk identification?

- A. It depends on how many risks are initially identified.
- B. At least once per month
- C. Identify risks is an iterative process.
- D. Several times until the project moves into execution

**Answer: C**

#### NEW QUESTION 131

Your organization has named you the project manager of the JKN Project. This project has a BAC of \$1,500,000 and it is expected to last 18 months. Management has agreed that if the schedule baseline has a variance of more than five percent then you will need to crash the project. What happens when the project manager crashes a project?

- A. Project risks will increase.
- B. The project will take longer to complete, but risks will diminish.
- C. Project costs will increase.
- D. The amount of hours a resource can be used will diminish.

**Answer: C**

#### NEW QUESTION 132

Which one of the following is the only output for the qualitative risk analysis process?

- A. Enterprise environmental factors
- B. Project management plan
- C. Risk register updates
- D. Organizational process assets

**Answer: C**

#### NEW QUESTION 134

Your project team has identified a project risk that must be responded to. The risk has been recorded in the risk register and the project team has been discussing potential risk responses for the risk event. The event is not likely to happen for several months but the probability of the event is high. Which one of the following is a valid response to the identified risk event?

- A. Corrective action
- B. Risk audit
- C. Technical performance measurement
- D. Earned value management

**Answer: A**

#### NEW QUESTION 137

You are the project manager for the NHH project. You are working with your project team to examine the project from four different defined perspectives to increase the breadth of identified risks by including internally generated risks. What risk identification approach are you using in this example?

- A. Root cause analysis
- B. SWOT analysis
- C. Influence diagramming techniques
- D. Assumptions analysis

**Answer: B**

#### NEW QUESTION 138

Wendy is the project manager of the NNJ project for her company. As part of the variance and trend analysis tool and technique for risk governance she is using earned value management. In this approach, Wendy wants to track and compare the cost and schedule variances. What is the point of this tool and technique in regard to risk?

- A. Wendy can determine a true project completion date.
- B. Wendy can track the cost and schedule variances.
- C. Wendy can review quality performance on baselines.
- D. Wendy can forecast deviation of the project cost and schedule for completion targets.

**Answer: D**

#### NEW QUESTION 139

During which of the following processes, probability and impact matrix is prepared?

- A. Perform Qualitative Risk Analysis
- B. Monitoring and Control Risks
- C. Plan Risk Responses
- D. Perform Quantitative Risk Analysis

**Answer: A**

#### NEW QUESTION 144

You are the project manager of the NNQ Project for your company and are working with your project team to define contingency plans for the risks within your project. Mary, one of your project team members, asks what a contingency plan is. Which of the following statements best defines what a contingency response is?

- A. Some responses are designed for use only if certain events occur.
- B. Some responses have a cost and a time factor to consider for each risk event.
- C. Some responses must counteract pending risk events.
- D. Quantified risks should always have contingency responses.

**Answer: A**

#### NEW QUESTION 146

Elizabeth is a project manager for her organization and she finds risk management to be very difficult for her to manage. She asks you, a lead project manager, at what stage in the project will risk management become easier. What answer best resolves the difficulty of risk management practices and the effort required?

- A. Risk management only becomes easier the more often it is practiced.
- B. Risk management only becomes easier when the project is closed.
- C. Risk management only becomes easier when the project moves into project execution.
- D. Risk management is an iterative process and never becomes easier.

**Answer: A**

#### NEW QUESTION 151

Frank is the project manager of the NHH Project. He is working with the project team to create a plan to document the procedures to manage risks throughout the project. This document will define how risks will be identified and quantified. It will also define how contingency plans will be implemented by the project team. What document is Frank and the NHH Project team creating in this scenario?

- A. Resource management plan
- B. Project plan
- C. Project management plan
- D. Risk management plan

**Answer: D**

#### NEW QUESTION 156

You are the project manager of QSL project for your organization. You are working with your project team and several key stakeholders to create a diagram that shows how various elements of a system interrelate and the mechanism of causation within the system. What diagramming technique are you using as a part of the risk identification process?

- A. Predecessor and successor diagramming
- B. System or process flowcharts
- C. Cause and effect diagrams

D. Influence diagrams

**Answer:** B

#### NEW QUESTION 158

You are the project manager for your organization. You have determined that an activity is too dangerous to complete internally so you hire licensed contractor to complete the work.

The contractor, however, may not complete the assigned work on time which could cause delays in subsequent work beginning. This is an example of what type of risk event?

- A. Internal
- B. Secondary risk
- C. Pure risk
- D. Transference

**Answer:** B

#### NEW QUESTION 160

You work as a project manager for BlueWell Inc. You have declined a proposed change request because of the risk associated with the proposed change request. Where should the declined change request be documented and stored?

- A. Change request log
- B. Lessons learned
- C. Project archives
- D. Project document updates

**Answer:** A

#### NEW QUESTION 161

There are seven risks responses that a project manager can choose from. Which risk response is appropriate for both positive and negative risk events?

- A. Acceptance
- B. Sharing
- C. Transference
- D. Mitigation

**Answer:** A

#### NEW QUESTION 162

Ben works as a project manager for the MJH Project. In this project, Ben is preparing to identify stakeholders so he can communicate project requirements, status, and risks. Ben has elected to use a salience model as part of his stakeholder identification process. Which of the following activities best describes a salience model?

- A. Influence/impact grid, grouping the stakeholders based on their active involvement ("influence") in the project and their ability to affect changes to the project's planning or execution ("impact").
- B. Grouping the stakeholders based on their level of authority ("power") and their active involvement ("influence") in the project.
- C. Grouping the stakeholders based on their level of authority ("power") and their level or concern ("interest") regarding the project outcomes.
- D. Describing classes of stakeholders based on their power (ability to impose their will), urgency (need for immediate attention), and legitimacy (their involvement is appropriate).

**Answer:** D

#### NEW QUESTION 165

You are working with your project stakeholders to identify risks within the JKP Project. You want to use an approach to engage the stakeholders to increase the breadth of the identified risks by including internally generated risk. Which risk identification approach is most suited for this goal?

- A. Delphi Technique
- B. SWOT analysis
- C. Assumptions analysis
- D. Brainstorming

**Answer:** B

#### NEW QUESTION 167

Risks with low ratings of probability and impact are included on a for future monitoring.

- A. Risk alarm
- B. Watchlist
- C. Observation list
- D. Risk register

**Answer:** B

#### NEW QUESTION 168

You are the project manager of the NHK Project. Management wants to know how often your risk identification process will occur during the project. Considering

that your project is scheduled to last one year and involves five distinct phases, how often should risk identification take place?

- A. Monthly
- B. Once per project life cycle phase
- C. Quarterly
- D. Vary depending on the situations within the project

**Answer:** D

#### NEW QUESTION 170

Jenny is the project manager for the NBT projects. She is working with the project team and several subject matter experts to perform the quantitative risk analysis process. During this process she and the project team uncover several risks events that were not previously identified. What should Jenny do with these risk events?

- A. The events should be entered into qualitative risk analysis.
- B. The events should be determined if they need to be accepted or responded to.
- C. The events should be entered into the risk register.
- D. The events should continue on with quantitative risk analysis.

**Answer:** C

#### NEW QUESTION 172

You are the project manager of the NNH project. In this project you have created a contingency response that the cost performance index should be less than 0.93. The NNH project has a budget at completion of \$945,000 and is 45 percent complete - though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's cost performance index?

- A. 1.06
- B. 0.92
- C. -\$30,647
- D. 0.93

**Answer:** D

#### NEW QUESTION 176

You are the project manager of a large, high-profile project in your organization. You have realized that politics within your company may affect the true identification of risk events within the project. You decide that you'd like to use a method to identify risk events through an anonymous process. Which one of the following risk events will allow you to collect and distribute risk information without the stakeholders knowing what other stakeholders are communicating about the project risk events?

- A. Surveys
- B. Monte Carlo Technique
- C. Checklist analysis
- D. Delphi Technique

**Answer:** D

#### NEW QUESTION 177

You are the project manager of the GGH Project in your company. Your company is structured as a functional organization and you report to the functional manager that you are ready to move onto the quantitative risk analysis process. What things will you need as inputs for the quantitative risk analysis of the project in this scenario?

- A. You will need the risk register, risk management plan, permission from the functional manager, and any relevant organizational process assets.
- B. You will need the risk register, risk management plan, cost management plan, schedule management plan, and any relevant organizational process assets.
- C. You will need the risk register, risk management plan, outputs of qualitative risk analysis, and any relevant organizational process assets.
- D. Quantitative risk analysis does not happen through the project manager in a functional structure.

**Answer:** B

#### NEW QUESTION 182

You are the project manager of the AMD project for your organization. In this project, you are currently performing quantitative risk analysis. The tool and technique you are using is simulation where the project model is computed many times with the input values chosen at random for each iteration. The goal is to create a probability distribution from the iterations for the project schedule. What technique will you use with this simulation?

- A. Pareto modeling
- B. Expected Monetary Value
- C. Analogous modeling
- D. Monte Carlo Technique

**Answer:** D

#### NEW QUESTION 185

You are the project manager of the NHQ Project for your company. You have completed qualitative and quantitative analysis of your identified project risks and you would now like to find an approach to increase project opportunities and to reduce threats within the project. What project management process would best help you?

- A. Monitor and control project risks
- B. Create a risk governance approach

- C. Create the project risk register
- D. Plan risk responses

**Answer:** D

#### NEW QUESTION 189

You are the project manager of the NNH Project. In this project you have created a contingency response that the schedule performance index should be less than 0.93. The NHH Project has a budget at completion of \$945,000 and is 45 percent complete though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's schedule performance index?

- A. -\$37,800
- B. 0.93
- C. 0.92
- D. 1.06

**Answer:** C

#### NEW QUESTION 192

You are the project manager of a large construction project. This project will last for 18 months and will cost \$750,000 to complete. You are working with your project team, experts, and stakeholders to identify risks within the project before the project work begins.

Management wants to know why you have scheduled so many risk identification meetings throughout the project rather than just initially during the project planning. What is the best reason for the duplicate risk identification sessions?

- A. The iterative meetings allow the project manager and the risk identification participants to identify newly discovered risk events throughout the project.
- B. The iterative meetings allow all stakeholders to participate in the risk identification processes throughout the project phases.
- C. The iterative meetings allow the project manager to discuss the risk events which have passed the project and which did not happen.
- D. The iterative meetings allow the project manager to communicate pending risks events during project execution.

**Answer:** A

#### NEW QUESTION 195

Mary is a project manager in her organization. On her current project she is working with her project team and other key stakeholders to identify the risks within the project. She is currently aiming to create a comprehensive list of project risks so she is using a facilitator to help generate ideas about project risks. What risk identification method is Mary likely using?

- A. Brainstorming
- B. Delphi Techniques
- C. Checklist analysis
- D. Expert judgment

**Answer:** A

#### NEW QUESTION 199

John is the project manager of the NHQ Project for his company. His project has 75 stakeholders, some of which are external to the organization. John needs to make certain that he communicates about risk in the most appropriate method for the external stakeholders. Which project management plan will be the best guide for John to communicate to the external stakeholders?

- A. Risk Response Plan
- B. Risk Management Plan
- C. Communications Management Plan
- D. Project Management Plan

**Answer:** C

#### NEW QUESTION 203

Pete works as a project manager for BlueWell Inc. The Management has told him that he must implement an agreed-upon contingency response if the cost performance index in his project is less than 0.90. Consider that Pete's project has a budget at completion of \$275,000. His project is 65 percent complete and he has spent \$175,000 to date. However, Pete is scheduled to be 78 percent complete. What is the cost performance index for this project to determine if the contingency response should happen?

- A. 1.02
- B. 0.96
- C. 0.90
- D. 0.89

**Answer:** A

#### NEW QUESTION 205

Mark works as a project manager for TechSoft Inc. Mark, the project team, and the key project stakeholders have completed a round of qualitative risk analysis. He needs to update the risk register with his findings so that he can communicate the risk results to the project stakeholders – including management. Mark will need to update all of the following information except for which one?

- A. Prioritized list of quantified risks
- B. Watchlist of low-priority risks
- C. Trends in qualitative risk analysis
- D. Risks grouped by categories

**Answer:** A

**NEW QUESTION 208**

You are the project manager of a large construction project. You are evaluating the strengths, weaknesses, opportunities, and threats involved in a project. In which of the following processes are you on?

- A. Define Scope
- B. Plan Risk Responses
- C. Plan Risk Management
- D. Identify Risks

**Answer:** D

**NEW QUESTION 210**

Marsha is the project manager of the NHQ Project. There's a risk that her project team has identified, which could cause the project to be late by more than a month. Marsha does not want this risk event to happen so she devises extra project activities to ensure that the risk event will not happen. The extra steps, however, will cost the project an additional \$10,000. What type of risk response is this approach?

- A. Enhancing
- B. Exploiting
- C. Mitigation
- D. Transference

**Answer:** C

**NEW QUESTION 214**

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Estimating the average outcome
- B. Model development
- C. Decision making or the development of recommendations for decision makers
- D. Increased understanding or quantification of the system

**Answer:** BCD

**NEW QUESTION 216**

Frank is a project team member in your project. Frank has been adding changes to the software interface for the software that your project is creating. Because Frank has been adding these features new risks have entered into the project. You elect that these additions should be removed from the project even if it takes extra time and money to remove the features. What are these riskladen features called?

- A. Gold plating
- B. Scope creep
- C. Negative risks
- D. Corrective actions

**Answer:** B

**NEW QUESTION 221**

You are the project manager of the NHJ project for your company. This project has a budget at completion of \$1,650,000 and you are 60 percent complete. According to the project plan, however, the project should be 65 percent complete. In this project you have spent \$995,000 to reach this point of completion. There is a risk that this project may be late so you have taken some measures to recover the project schedule. Management would like to know, based on current performance, what the estimate at completion for this project will be. What is the estimate at completion?

- A. \$1,650,000
- B. \$1,666,667
- C. \$663,333
- D. -\$8,333

**Answer:** B

**NEW QUESTION 226**

Holly is the project manager of the GHH Project. During risk identification and the subsequent risk analysis process she has identified a risk with a high probability and high impact for her project. She and the stakeholder agree that the project management plan should be changed to eliminate the risk threat entirely. What risk response has Holly used in this instance?

- A. This is the risk mitigation response.
- B. This is the avoidance risk response.
- C. This is the transference risk response.
- D. This is a scope change and not a risk response.

**Answer:** B

**NEW QUESTION 229**

You are the project manager of the NJJ project. Your enterprise environmental factors require that you establish certain risk management rules regarding low risks within your project. What is the best policy for risks with low probability and low impact in the project management?

- A. These risks should be accepted.
- B. These risks should be placed on a watchlist for future monitoring.
- C. These risks should be identified, but dismissed.
- D. These risks should be placed in the risk register.

**Answer: B**

#### NEW QUESTION 231

Kelly is the project manager of the NNQ Project for her company. This project will last for one year and has a budget of \$350,000. Kelly is working with her project team and subject matter experts to begin the risk response planning process. When the project manager begins the plan risk response process, what two inputs will she need?

- A. Risk register and the risk response plan
- B. Risk register and power to assign risk responses
- C. Risk register and the risk management plan
- D. Risk register and the results of risk analysis

**Answer: C**

#### NEW QUESTION 232

There are seven risk responses for any project. Which one of the following is a valid risk response for a negative risk event?

- A. Enhance
- B. Exploit
- C. Acceptance
- D. Share

**Answer: C**

#### NEW QUESTION 233

Frank is the project manager of the NHL Project for his company and he is starting the risk identification process for the project. Frank needs to ensure that the correct stakeholders are interviewed as part of risk identification. What document will help Frank to communicate and solicit inputs of the project stakeholders during risk identification?

- A. Project charter
- B. Risk register
- C. Requirements management plan
- D. Stakeholder register

**Answer: D**

#### NEW QUESTION 234

You are the project manager for your company and a new change request has been approved for your project. This change request, however, has introduced several new risks to the project. You have communicated these risk events and the project stakeholders understand the possible effects these risks could have on your project. You elect to create a mitigation response for the identified risk events. Where will you record the mitigation response?

- A. Risk register
- B. Risk log
- C. Risk management plan
- D. Project management plan

**Answer: A**

#### NEW QUESTION 236

Della works as a project manager for SoftTech Inc. She is working with the project stakeholders to begin the quantitative risk analysis process. Which of the following inputs will be needed for the quantitative risk analysis process in her project? Each correct answer represents a complete solution. Choose all that apply.

- A. Risk management plan
- B. Project scope statement
- C. Risk register
- D. Cost management plan

**Answer: ACD**

#### NEW QUESTION 238

Donna is the project manager of the QSD Project and she believes Risk Event D in the following figure is likely to happen. If this event does happen, how much will Donna have left in the risk contingency reserve if none of the other risk events have happened?

- A. \$35,000
- B. \$41,700
- C. \$14,000
- D. \$6,700

**Answer: D**

#### NEW QUESTION 242

You are the project manager for BlueWell Inc. Your current project is a high priority and high profile project within your organization. You want to identify the project stakeholders that will have the most power in relation to their interest on your project. This will help you plan for project risks, stakeholder management, and ongoing communication with the key stakeholders in your project. In this process of stakeholder analysis, what type of a grid or model should you create based on these conditions?

- A. Stakeholder power/interest grid
- B. Influence/impact grid
- C. Salience model
- D. Stakeholder register

**Answer:** A

#### NEW QUESTION 244

Todd is the project manager of the EST project for his company. His organization has established certain rules in the enterprise environmental factors which affect the approach that Todd takes in managing his project. One of the rules requires Todd to consider the risk attitude of the stakeholders participating in risk analysis. Why must risk attitude be considered as a part of risk analysis?

- A. Risk attitude can affect the measurement of probability and impact.
- B. Risk attitude can establish a stakeholder's influence over project decisions.
- C. Risk attitude identifies stakeholders that are hygiene seekers or motivation seekers.
- D. Risk attitude establishes stakeholders as positive or negative stakeholders.

**Answer:** A

#### NEW QUESTION 249

Billy is the project manager of the HAR Project and is in month six of the project. The project is scheduled to last for 18 months. Management asks Billy how often the project team is participating in risk reassessment in this project. What should Billy tell management if he's following the best practices for risk management?

- A. Project risk management is scheduled for every month in the 18-month project.
- B. Project risk management has been concluded with the project planning.
- C. At every status meeting the project team project risk management is an agenda item.
- D. Project risk management happens at every milestone.

**Answer:** C

#### NEW QUESTION 252

Wendy is the project manager of the FBL project for your company. She has identified several risks within her project and has created a risk contingency reserve of \$45,000 total. Her project is nearly complete and many of the risks have not happened in the project. What should Wendy do with the funds in the contingency reserve?

- A. The funds remain in the contingency reserve until all of the risks have passed.
- B. The funds for the risks that have passed and have not happened are transferred to the project budget.
- C. The funds for the risks that have passed and have not happened are released.
- D. The funds remain in the contingency reserve until the project is closed.

**Answer:** C

#### NEW QUESTION 256

Who is responsible for the stakeholder expectations management in a high-profile, high- risk project?

- A. Project risk assessment officer
- B. Project management office
- C. Project sponsor
- D. Project manager

**Answer:** D

#### NEW QUESTION 258

A project team member has just identified a new project risk. The risk event is determined to have significant impact but a low probability in the project. Should the risk event happen it'll cause the project to be delayed by three weeks, which will cause new risk in the project. What should the project manager do with the risk event?

- A. Add the identified risk to a quality control management control chart.
- B. Add the identified risk to the issues log.
- C. Add the identified risk to the risk register.
- D. Add the identified risk to the low-level risk watchlist.

**Answer:** C

#### NEW QUESTION 259

You are completing the qualitative risk analysis process with your project team and are relying on the risk management plan to help you determine the budget, schedule for risk management, and risk categories. You discover that the risk categories have not been created. When should the risk categories have been created?

- A. Create work breakdown structure process

- B. Plan risk management process
- C. Risk identification process
- D. Define scope process

**Answer:** B

#### NEW QUESTION 263

Tom is the project manager for his organization. In his project he has recently finished the risk response planning. He tells his manager that he will now need to update the cost and schedule baselines. Why would the risk response planning cause Tom the need to update the cost and schedule baselines?

- A. New or omitted work as part of a risk response can cause changes to the cost and/or schedule baseline.
- B. Risk responses protect the time and investment of the project.
- C. Risk responses may take time and money to implement.
- D. Baselines should not be updated, but refined through versions.

**Answer:** A

#### NEW QUESTION 264

Neil works as a project manager for SoftTech Inc. He is working with Tom, the COO of his company, on several risks within the project. Tom understands that through qualitative analysis Neil has identified many risks in the project. Tom's concern, however, is that the priority list of these risk events are sorted in "high-risk," "moderate-risk," and "low-risk" as conditions apply within the project. Tom wants to know that is there any other objective on which Neil can make the priority list for project risks. What will be Neil's reply to Tom?

- A. Risks may be listed by the additional analysis and response
- B. Risk may be listed by the responses in the near-term
- C. Risks may be listed by priority separately for schedule, cost, and performance
- D. Risks may be listed by categories

**Answer:** C

#### NEW QUESTION 266

You work as a project manager for BlueWell Inc. You are working on a project and the management wants a rapid and cost-effective means for establishing priorities for planning risk responses in your project. Which risk management process can satisfy management's objective for your project?

- A. Historical information
- B. Qualitative risk analysis
- C. Quantitative analysis
- D. Rolling wave planning

**Answer:** B

#### NEW QUESTION 271

You are the project manager of the NHQ project for your company. You are working with your project team to complete a risk audit. A recent issue that your project team responded to, and management approved, was to increase the project schedule because there was risk surrounding the installation time of a new material. Your logic was that with the expanded schedule there would be time to complete the installation without affecting downstream project activities. What type of risk response is being audited in this scenario?

- A. Parkinson's Law
- B. Mitigation
- C. Avoidance
- D. Lag Time

**Answer:** C

#### NEW QUESTION 272

John works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following inputs of the identify risks process is useful in identifying risks associated to the time allowances for the activities or projects as a whole, with a width of the range indicating the degrees of risk?

- A. Activity duration estimates
- B. Schedule management plan
- C. Risk management plan
- D. Activity cost estimates

**Answer:** A

#### NEW QUESTION 273

You are the project manager for your organization. You have identified a risk event you're your organization could manage internally or externally. If you manage the event internally it will cost your project \$578,000 and an additional \$12,000 per month the solution is in use. A vendor can manage the risk event for you. The vendor will charge \$550,000 and \$14,500 per month that the solution is in use. How many months will you need to use the solution to pay for the internal solution in comparison to the vendor's solution?

- A. Approximately 8 months
- B. Approximately 15 months
- C. Approximately 13 months
- D. Approximately 11 months

**Answer:** D

#### NEW QUESTION 276

You are the project manager of the NNN project for your company. You and the project team are working together to plan the risk responses for the project. You feel that the team has successfully completed the risk response planning and now you must initiate what risk process it is. Which of the following risk processes is repeated after the plan risk responses to determine if the overall project risk has been satisfactorily decreased?

- A. Qualitative risk analysis
- B. Quantitative risk analysis
- C. Risk identification
- D. Risk response implementation

**Answer: B**

#### NEW QUESTION 277

You are preparing to start the qualitative risk analysis process for your project. You will be relying on some organizational process assets to influence the process. Which one of the following is NOT a probable reason for relying on organizational process assets as an input for qualitative risk analysis?

- A. Studies of similar projects by risk specialists
- B. Risk databases that may be available from industry sources
- C. Review of vendor contracts to examine risks in past projects
- D. Information on prior, similar projects

**Answer: C**

#### NEW QUESTION 280

You are the project manager of the NHQ Project for your company. You are discussing some of the project issues that need to be resolved in the project. You and the project stakeholders come to an agreement about the risk issues and how they will be resolved. Where should you document this information for issue resolution?

- A. Project management plan for execution
- B. Lessons learned documentation
- C. Issue log
- D. Risk response plan

**Answer: C**

#### NEW QUESTION 282

Which risk response is acceptable for both positive and negative risk events?

- A. Transferring
- B. Acceptance
- C. Sharing
- D. Enhancing

**Answer: B**

#### NEW QUESTION 285

You are the project manager of the GGK project for your company. The GGK project has a budget of \$1,265,100 and is currently 40 percent complete. In this project, you elected to add labor to the project to increase the likelihood of completing the project early as the project was only scheduled to be 35 percent complete at this time. This positive risk response, while keeping the project ahead of schedule, has added significant costs to the project. You have already spent \$575,000 to reach this point in the project. Management would like to know what your cost performance index and the schedule performance index is for this project. What are these values?

- A. The CPI is -\$68,960 and the SPI is \$63,255.
- B. The CPI is .88 and the SPI is zero.
- C. The CPI is .88 and the SPI is 1.14.
- D. The CPI is 1.14 and the SPI is .88.

**Answer: C**

#### NEW QUESTION 286

You work as a project manager for BlueWell Inc. You are about to complete the quantitative risk analysis process for your project. You can use three available tools and techniques to complete this process. Which one of the following is NOT a tool or technique that is appropriate for the quantitative risk analysis process?

- A. Expert judgment
- B. Data gathering and representation techniques
- C. Organizational process assets
- D. Quantitative risk analysis and modeling techniques

**Answer: C**
